Form Approved
OMB No. 0704-0188

Public reporting burden for the collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to a penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.

The Naval Research Laboratory

MISSION

The mission of the Naval Research Laboratory is to conduct scientific research and development in the physical sciences and related fields directed toward new and improved materials, equipment, techniques, and systems for the Navy. In fulfillment of this mission, the Naval Research Laboratory:

1. Initiates and conducts scientific research and development of a basic and long-range nature in scientific areas of special interest to the Navy.
2. Performs scientific research and development for the Systems Commands and offices of the Navy and, where specially qualified, for the Defense Department and, in defense related efforts, for other government agencies.
3. Provides to the Navy and its contractors standardized techniques and procedures for measurements and for the accurate calibration of standard instruments in areas of special Navy needs.
4. Furnishes scientific consultative services for the Navy and, where specially qualified, for the Defense Department and, in defense related efforts, for other government agencies.
5. Provides to the Navy unbiased determination of performance characteristics of developmental and prototype devices through limited engineering test and evaluation services.

THE NAVY'S CORPORATE LABORATORY

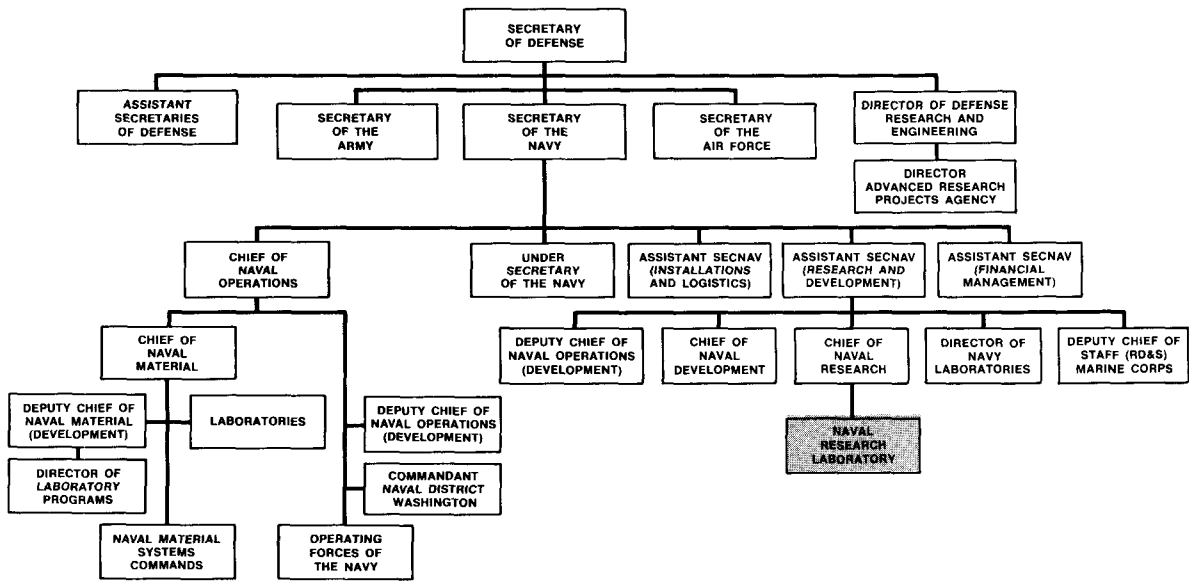

The Naval Research Laboratory is one of the principal in-house research and development institutions of the U.S. Government. It was established in 1923 to ensure that advancements in science and engineering could be readily applied to the Navy's needs. Directed always toward this end, the NRL research program has developed to its present status as a broadly based and coordinated effort in the physical, mathematical, and environmental sciences, in advanced engineering, and in naval analysis. The work of the Laboratory is conducted at the main establishment in the District of Columbia and at various field sites that provide unique environment and facilities not available at the main site.

Some principal elements of the research program include fundamental and applied work in radio wave propagation, oceanography, deep-sea instrumentation, submarine air purification, structural design theory, fracture mechanics, surface chemistry, optical physics, radar, underwater sound propagation, acoustic signal processing, sonar transducers, nuclear physics, radio astronomy, high-temperature lubricant, high-energy fuels, plasma physics, refractory metals, exotic materials for high-performance structures, x-ray astronomy, high-power lasers, solid-state physics, and stress-corrosion cracking of high-strength titanium steels and aluminum alloys.

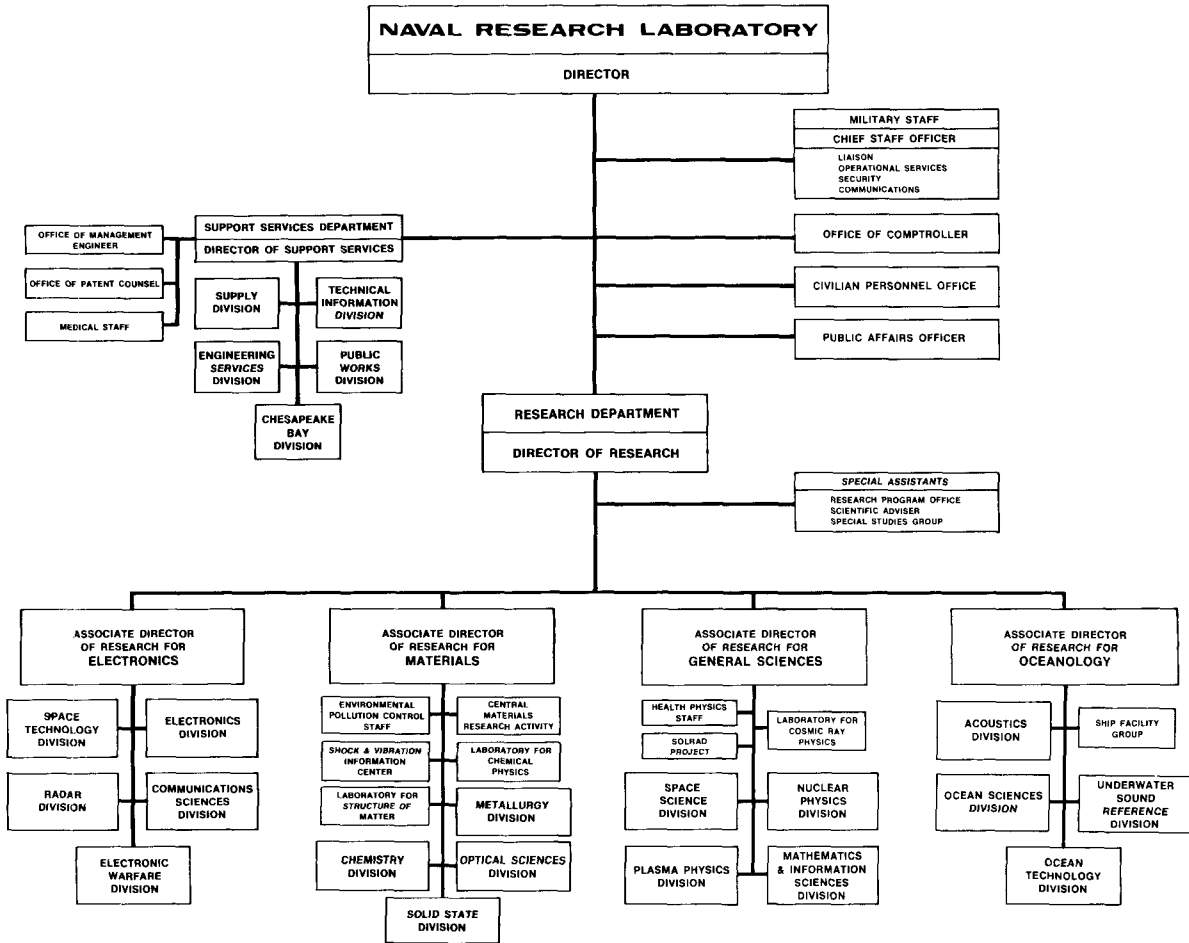

Over 1200 scientific and technical papers were produced in 1969 as a consequence of the research and development effort of the Laboratory staff. The figure includes 198 formal reports, 123 memorandum reports, 387 articles published in professional society journals, and 558 papers presented at scientific and technical meetings in the United States and in foreign countries.

In addition, 51 U.S. Patents were issued in 1969 on inventions made by present and former employees of the Naval Research Laboratory. This figure brings the grand total of NRL patents, through the calendar year 1969, to 2161.

In its investigations of broad scientific areas, in considering its findings for potential military applications, and in furnishing to the Naval Systems Commands and Secretariat expert consultative services relating to science and military systems, NRL functions as the corporate laboratory of the Navy. Thus it provides a central focus of research and development activity that supports the Navy. When NRL findings and capabilities have borne fruit in particular areas, the results are made known to and used by not only the Navy but also the Army, the Air Force, the Advanced Research Projects Agency, the Atomic Energy Commission, and other agencies of the government.

Position of NRL in the Department of Defense structure

Office of the Director

Captain Earle W. Sapp, USN
Director, Naval Research Laboratory

Captain Sapp [REDACTED], Maryland. He attended Duke University from 1944 to 1947, where he majored in physics while in the Naval Reserve Officers Training Corps. He graduated in March 1947 and was commissioned Ensign, USN, at that time. He is a graduate of the Naval War College and has attended several Naval schools in the areas of antisubmarine warfare equipment and tactics, combat information center operations, and naval electronics. Captain Sapp also has attended special oceanographic courses, and his Navy technical subspecialty is oceanography.

Captain Sapp is a line officer and is qualified to command destroyers. During his naval career, Captain Sapp acquired broad operational and command experience in destroyer-type ships and in fleet staffs. He has commanded the experimental destroyer escort USS MALOY (EDE 791) and the fleet destroyer USS EUGENE A. GREENE (DD 711). His fleet experience includes deployments to both the European and Southeast Asia theaters, as well as experimental antisubmarine warfare operations.

Captain Sapp's R&D experience includes project assignments in fleet evaluation activities, in the Office of Naval Research, and in experimental ships assigned to Navy laboratories and the operational test and evaluation force. Prior to assuming the position of Director of the Laboratory on June 30, 1970, he was on the staff of the Director of Defense Research and Engineering, where he served as Deputy to the Assistant Director for Ocean Control.

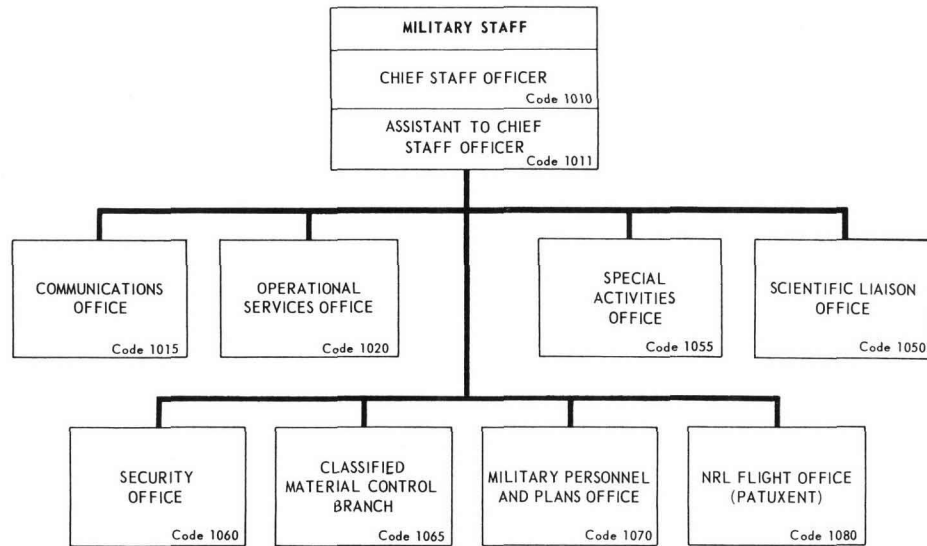

He is a member of the Acoustical Society of America and the American Society of Naval Engineers.

Military Staff Office

CDR L. R. Marshall, USN

- MILITARY PERSONNEL
- MILITARY PLANS
- OPERATIONAL SERVICES
- SCIENTIFIC LIAISON
- SECURITY
- COMMUNICATIONS

Basic Responsibilities

The Chief Staff Officer provides a military staff to the Director, Naval Research Laboratory, for the purpose of assisting the Director in the military aspects of the management of the Laboratory. He conducts liaison with DOD and Navy Commands and activities and the operating forces of the Navy in support of NRL research and development operations and the coordination of the military application of the scientific work of the Laboratory. The Staff supports four multi-engine Laboratory aircraft and obtains and coordinates such additional air, surface, and subsurface services as are required. The Military Staff is also responsible for personnel and plant security, communications, and control of classified material.

Key Personnel

<i>Name</i>	<i>Title</i>
CDR L. R. Marshall, USN	Chief Staff Officer (Acting)
LTJG L. B. Hull, USNR	Communications Officer
CDR D. F. Moxley	Operational Services Officer
CDR W. E. Heyl, USN	Scientific Liaison Officer
Mr. W. C. Bryan	Head, Special Activities Office
Mr. C. J. Dryer	Head, Security Branch
Mr. J. J. Bagley	Classified Material Control Officer
LT N. K. Matheson, USN	Military Personnel and Plans Officer
LCDR F. C. Nelson, USN	Head, NRL Flight Office (Patuxent)

Personnel Complement

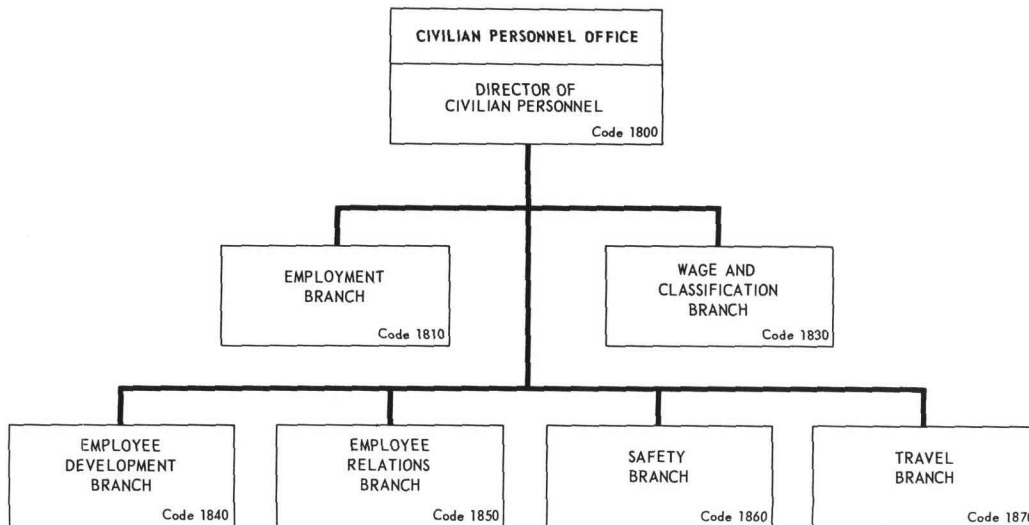

On Board: 152
(82 Civilian, 70 Military)

Civilian Personnel Office

Mr. A. G. Gross

- EMPLOYMENT
- WAGE AND CLASSIFICATION
- EMPLOYEE DEVELOPMENT
- EMPLOYEE RELATIONS
- SAFETY
- TRAVEL

Basic Responsibilities

The Civilian Personnel Office administers the Laboratory's personnel program, which provides for the selection, development, promotion, utilization, appropriate recognition, travel, and safety of all civilian personnel. It is also responsible for the establishment and review of all Classification Act and ungraded positions.

Key Personnel

<i>Name</i>	<i>Title</i>
Mr. A. G. Gross	Director of Civilian Personnel
Mr. J. E. Goss	Head, Employment Branch
Mr. K. R. Harper	Head, Wage and Classification Branch
Mr. W. J. McLaughlin	Head, Employee Development Branch
Mr. H. H. Kay	Head, Employee Relations Branch
Dr. R. G. Nebelung	Head, Safety Branch
Mrs. M. M. Harden	Head, Travel Branch

Personnel Complement

On Board: 48

Office of the Comptroller

Mr. J. P. Donovan

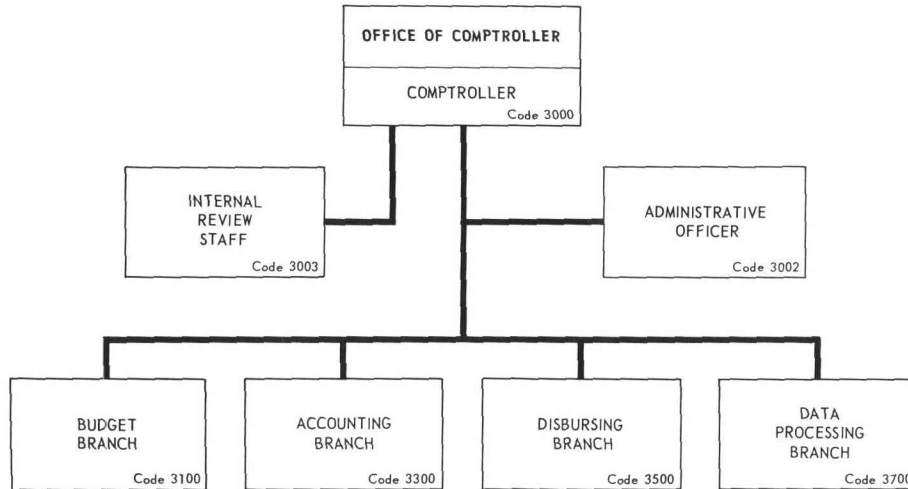

INTERNAL REVIEW

BUDGET OFFICE

COMPUTER

- BUDGET
- ACCOUNTING
- DISBURSING
- DATA PROCESSING

Basic Responsibilities

The Comptroller is the financial adviser to the Director and other officials of the Laboratory. He administers the financial program of the Laboratory.

Key Personnel

<i>Name</i>	<i>Title</i>
Mr. J. P. Donovan	Comptroller
Mr. D. M. Johnson	Budget Officer
Mr. D. K. Jones	Accounting Officer
L.TJG R. L. Klaphake, SC, USNR	Disbursing Officer
Mr. R. L. Guest	Data Processing Officer
Mr. R. A. Showman	Head, Internal Review Staff

Personnel Complement

On Board: 70

Blank Page

The Research Department

Dr. Alan Berman
Director of Research

Dr. Berman [REDACTED]
[REDACTED] He received the A.B. degree in physics from Columbia College in 1947 and the Ph.D. degree in physics from Columbia University in 1952.

From 1952 to 1955 he was a research scientist at the Hudson Laboratories of Columbia University. He became Assistant Director of Hudson Laboratories in 1955, Associate Director in 1957, and Director in 1963. On May 29, 1967, Dr. Berman became Director of Research for the Naval Research Laboratory.

Dr. Berman's research specialties include the areas of underwater acoustics, oceanography, and signal processing. He has published numerous papers on these and related subjects. At present he is a member or chairman of a wide variety of Navy and oceanographic advisory groups. He also provides advisory services for a number of Department of Defense and other Government agencies.

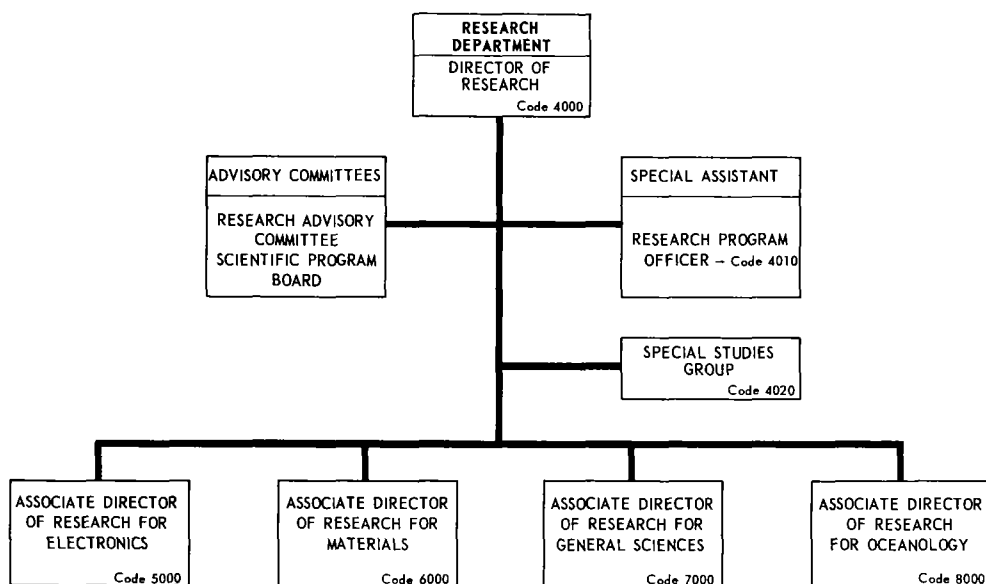

Dr. Berman has on three occasions been visiting scientist to the Admiralty Research Laboratory, Teddington, England (1955, 1957, 1960), and once at the SACLANT ASW Research Center, La Spezia, Italy (1960).

THE RESEARCH DEPARTMENT

The Research Department is headed by a civilian scientist and administrator. The research effort is divided into four major fields—electronics, materials, general sciences, and oceanology—which correspond to the principal areas of the Navy's interest in the physical and engineering sciences. There is an associate director of research for each of these four broad areas. Seventeen scientific divisions, each headed by a civilian scientist, pursue work in specific fields. Branches within these divisions form interrelated working units.

Key Personnel

<u>Name</u>	<u>Title</u>	<u>Code</u>
Dr. A. Berman	Director of Research	4000
Mr. H. P. Gates	Consultant	
Mr. E. L. Brancato	Consultant	
Mr. A. Hollings	Research Program Office	4010
Mr. C. L. Tipton	Special Studies Group	4020
Dr. W. R. Faust	Associate Director of Research for Electronics (Acting)	5000
Dr. J. H. Schulman	Associate Director of Research for Materials	6000
Dr. W. C. Hall	Associate Director of Research for General Sciences	7000
Dr. R. R. Goodman	Associate Director of Research for Oceanology	8000

RESEARCH PROGRAM OFFICE

Basic Responsibilities

The Research Program Office serves as staff to the research directorate of the Laboratory. It provides an orderly plan for coordinating NRL research programs with those of ONR and other sponsors or potential sponsors throughout the Departments of the Navy, the Army, and the Air Force, the Advanced Research Projects Agency, and other agencies of the government. It also serves as a focal point for program information for project managers and other key personnel of sponsoring activities on work in progress or in various stages of planning. The Research Program Office maintains a management information center which serves as a working tool for the Laboratory directorate, and it maintains appropriate records of the Laboratory's research programs.

Key Personnel

<i>Name</i>	<i>Title</i>
Mr. A. J. Hollings	Head, Research Program Office
Mr. R. E. Seebold	Deputy Head, Research Program Office
Mr. R. C. Spragg	Head, Management Information Center Section
Mr. R. E. Seebold	Head, Short-Range Program Planning and Appraisal Section
Mr. N. Moglin	Staff Assistant—ADP

Mr. A. J. Hollings

Personnel Complement

On Board: 11

SPECIAL STUDIES GROUP

Basic Responsibilities

The Special Studies Group provides analytical staff support to the Director of Research in the fields of strategic, tactical, and special naval warfare. Programs of operation research and system analysis are undertaken to provide substantive analytical bases for (a) the orientation of naval research and development, and (b) the general delineation of advanced naval weapon systems and force structures requirements for the mid- to long-range time period. Broad scope analyses of projected threats, operations, tactics, equipments, and forces are conducted by four study units—Operations Analysis; Systems Analysis; Systems Applications; and Amphibious Warfare, respectively.

Key Personnel

<i>Name</i>	<i>Title</i>
Mr. C. L. Tipton	Head, Special Studies Group
Mr. J. Reynolds	NRL Special Warfare Assistant

Mr. C. L. Tipton

Fiscal Year 1971: \$1,000,000 (Projected)

Electronics Area

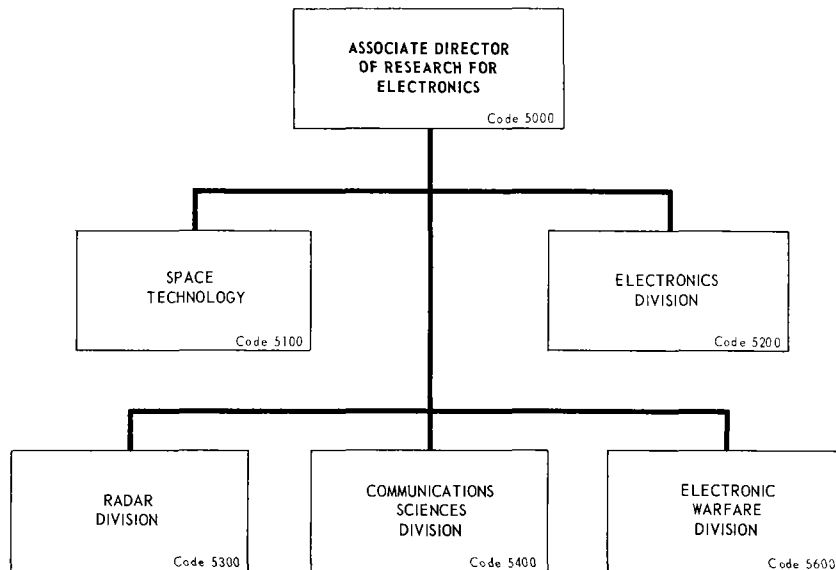

Dr. W. R. Faust
Associate Director of Research for Electronics

Dr. Faust [REDACTED]

[REDACTED]. He graduated from Oklahoma State University in 1939 with a B.S. degree in electrical engineering and from the Illinois Institute of Technology in 1941 with an M.S. degree in electrical engineering. In 1948, he received the Ph.D. degree in physics from the University of Maryland.

Dr. Faust joined the Research Department of NRL in 1941 and became Head of the Nuclear Reactions Branch of the Radiation Division in 1952. He was appointed Associate Superintendent of the Radiation Division and Head of the Analysis and Theory Branch in 1956, positions he held until January 1964, when he was detailed Superintendent of the Applications Research Division. At the present time, he is Associate Director of Research for Electronics (Acting).

Dr. Faust is a Fellow of the American Physical Society of America and a member of numerous other professional and honorary societies.

Key Personnel

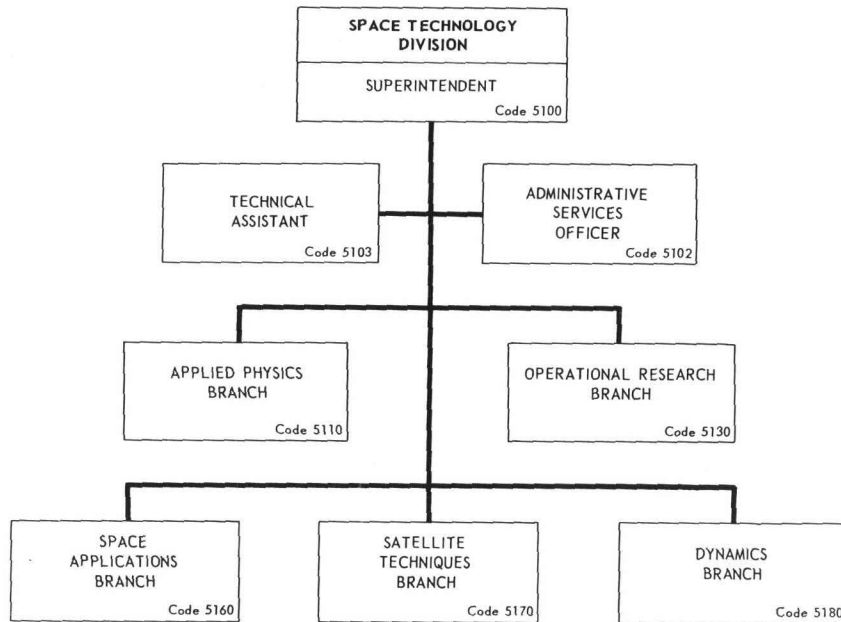

Dr. W. R. Faust	Associate Director of Research for Electronics (Acting)
Mr. L. A. Gebhard	Consultant
Mr. H. Bress	Consultant
Mr. E. F. Kulikowski	Superintendent, Space Technology Division (Acting)
Mr. A. Brodzinsky	Superintendent, Electronics Division
Dr. M. I. Skolnik	Superintendent, Radar Division
Dr. L. B. Wetzell	Superintendent, Communications Sciences Division
Mr. H. O. Lorenzen	Superintendent, Electronic Warfare Division

Mr. E. F. Kulikowski

Space Technology Division

- APPLIED PHYSICS
- OPERATIONAL RESEARCH
- SPACE APPLICATIONS
- SATELLITE TECHNIQUES
- DYNAMICS

Basic Responsibilities

The Space Technology Division conducts research and development in the fields of plasma physics, laser systems, defense against ballistic missiles including impact and penetration ballistics, data handling and processing, satellite techniques, and celestial mechanics and satellite navigation. As a result of these studies, the Division designs and develops systems (e.g., satellites) and components (e.g., antennas for use in space) as related to such naval requirements as target identification, surveillance, satellite navigation, satellite geodesy, guidance, and communications and provides for the evaluation of such systems.

Branches

Applied Physics

Lasers
Space physics and quantum electronics
Plasma physics

Operational Research

Orbit computation and celestial mechanics
Fire and missile control evaluation instrumentation
Satellite telemetry data processing

Space Applications

Satellite navigation
Satellite geodesy
Frequency standards

Satellite Techniques

Satellite development
Gravity gradient stabilization of satellites
Research satellites, especially solar radiation devices
Calibration satellites

Dynamics

Vulnerability mechanics
Hypervelocity kill mechanisms
Hypervelocity impact mechanics

MICRO ELECTRONICS

GAS LASERS

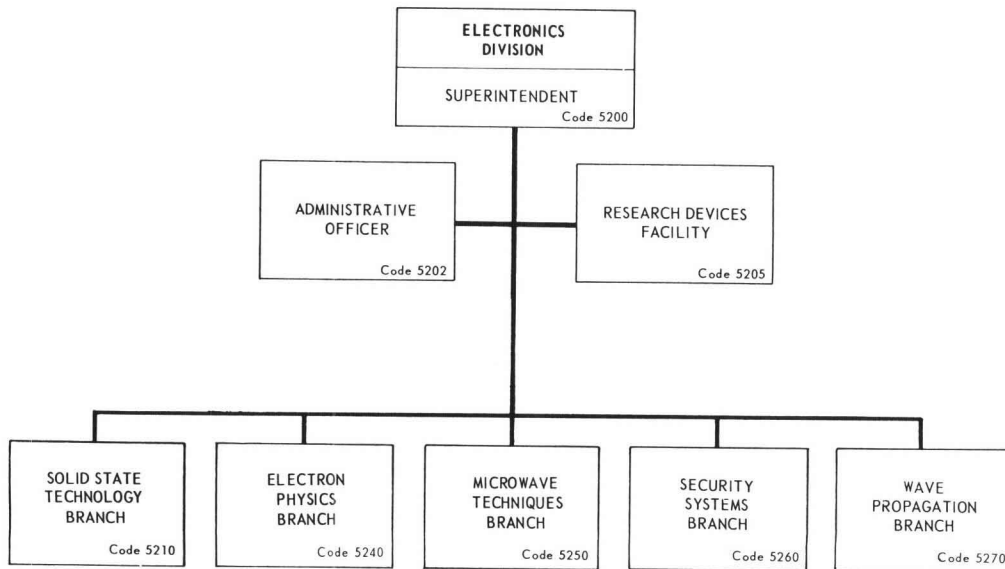

ELECTRO OPTICAL SYSTEMS

ANTENNA RESEARCH

- SOLID STATE TECHNOLOGY
- ELECTRON PHYSICS
- MICROWAVE TECHNIQUES
- SECURITY SYSTEMS
- WAVE PROPAGATION

Basic Responsibilities

The Electronics Division carries out programs of basic and applied research and development in the fields of electronic properties of solid materials, microwave antennas and components, microelectronic technology, electronic identification systems, electromagnetic wave propagation, properties of ground and sea surface radar returns, and vacuum and gaseous electron devices.

Branches

Solid State Technology

Semiconductor devices, materials and circuits, both low and microwave frequencies
Thin films

Electron Physics

Microwave tubes
Surface physics research
Microwave components

Microwave Techniques

Millimeter wave communication system
Naval electronic scanning antennas for airborne use
Advanced microwave antenna research
Microwave electronic components

Security Systems

Development of new IFF systems and components
Development of solid state transmitters at L-band
Development of IFF decision devices
Consulting services to AIMS* tri-service program

Wave Propagation

Properties of ground and sea surface radar echoes
Radar mapping of terrain
Target cross section measurements
Sea surface analysis

*AIMS

A - Air Traffic Control Radar Beacon

HF SURFACE WAVE ANTENNA

MULTI-BAND EXPERIMENTAL
RADAR COMPLEX

- RADAR TECHNIQUES
- SEARCH RADAR
- TARGET CHARACTERISTICS
- AEROSPACE RADAR
- AIRBORNE RADAR
- RADAR GEOPHYSICS

Basic Responsibilities

The Radar Division conducts research on basic physical phenomena of importance to radar and related sensors, investigates new engineering techniques applicable to radar, demonstrates the feasibility of new radar concepts and systems, performs related systems analysis and evaluation of radar, and provides special consultative services. The emphasis is on new and advanced concepts and technology in radar and related sensors which are applicable to enhancing the Navy's ability to fulfill its mission.

Branches

Radar Techniques

High-frequency radar
Signal processing

Search Radar

Phased array techniques
ASW radar
Precision tracking radar techniques
Radar evaluation
Range instrumentation

Target Characteristics

Target signature analysis
Target radar-spectra studies
Laser sensor systems

Aerospace Radar

Ocean surveillance

Airborne Radar

Airborne radar
Weapons analysis
ECCM
Airborne early warning radar
Moving target indication techniques for ship
and airborne radars

Radar Geophysics

Wave propagation
Studies of ionosphere by means of radar
and satellite transmissions
Radar measurements of satellites
and ballistic missiles

TIME STANDARDS

Basic Responsibilities

The Communications Sciences Division conducts research and development in the systems, sensors, techniques, instrumentation, and phenomenology of radio communications. The major emphasis is placed on those new concepts and techniques which will specifically enhance the Navy's communications capabilities.

Branches

Communication Systems

Secure communications
Modem and interface functions
Crypto-logic systems

Satellite Communication

Satellite communication systems
Precision satellite communication experiments
Modem studies
Orbit parameter studies

Communication Antennas

Communication antenna studies
Antenna circuitry
Underwater reception and propagation

Electromagnetic Propagation

ELF/VLF and LF propagation studies
Noise measurements and predictions
Microwave troposcatter
Effects of propagation on navigational accuracy

Systems Integration and Instrumentation

Precise frequency and time
Centralized electronic control
Integrated communication, navigation
and identification systems
Long range aircraft navigation (OMEGA)
Advanced monitoring & testing techniques

Dr. James H. Schulman
Associate Director of Research for Materials

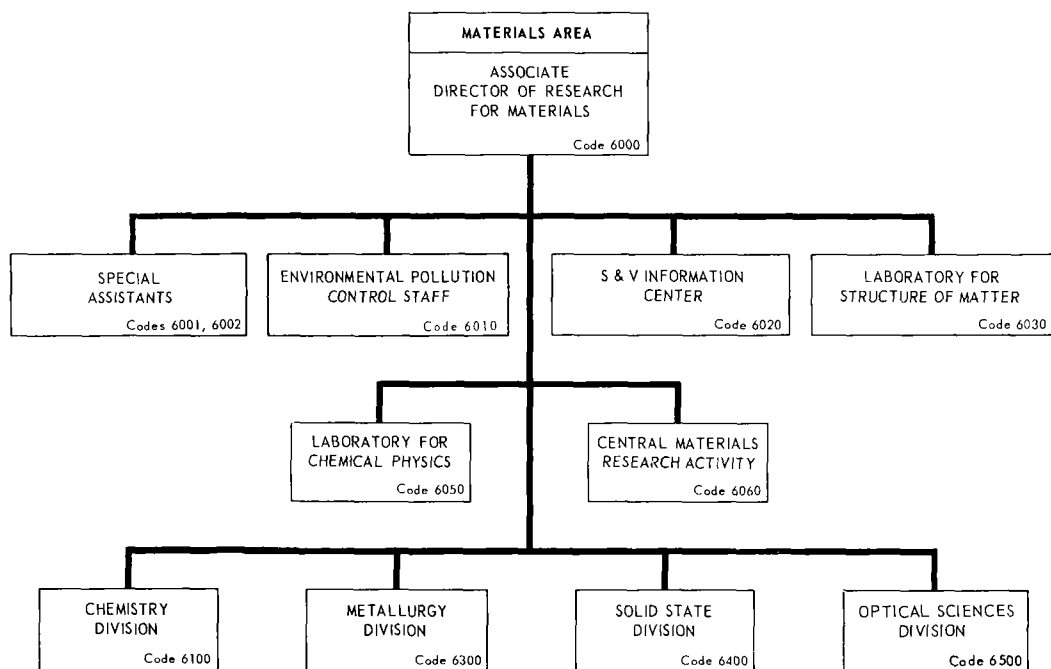

Dr. Schulman

He received the degrees of B.S. (1939) and Ph.D. (1942), both in chemistry, from the Massachusetts Institute of Technology. He has held teaching positions at Suffolk University and M.I.T. and research positions at the M.I.T. Laboratory for Insulation Research and Sylvania Electric Products.

Since coming to NRL in 1946 to initiate research on luminescence in solids, he has served as Head of Branches in the Metallurgy and Solid State Divisions and as Superintendent of the Optical Physics Division. From August 1960 until December 1961, he was Deputy Scientific Director of the London Branch of the Office of Naval Research. In November 1964, Dr. Schulman was appointed to the Chair of Materials Sciences in recognition of his distinguished research accomplishments. In September 1967, he was appointed Associate Director of Research for Materials.

Dr. Schulman received the Applied Science Award of the NRL Branch of the Research Society of America (1957) and the Navy Superior Civilian Service Award (1965), both in recognition of his many contributions to the science of luminescent materials and phenomena, radiation-induced optical effects in solids, and the application of these effects to radiation dosimetry. He is author or co-author of over 90 papers and a book on these subjects, and he holds numerous patents.

Dr. Schulman is a Fellow of the American Physical Society, the Optical Society of America, and the American Association for the Advancement of Science, as well as an Associate Editor of two scientific journals. He has served on several panels and committees of the National Academy of Sciences and of various scientific societies.

Key Personnel

Dr. J. H. Schulman	Associate Director of Research for Materials
Dr. D. A. Patterson	Special Assistant
Dr. H. Gandy	Special Assistant
Mr. V. R. Piatt	Environmental Pollution Controller Officer
Dr. W. W. Mutch	Head, S&V Information Center
Dr. J. Karle	Head, Laboratory for Structure of Matter
Dr. W. A. Zisman	Head, Laboratory for Chemical Physics
Mr. R. J. Ginther	Head, Central Materials Research Activity
Dr. R. E. Kagarise	Superintendent, Chemistry Division
Mr. W. S. Pellini	Superintendent, Metallurgy Division
Dr. C. C. Klick	Superintendent, Solid State Division
Dr. W. R. Sooy	Superintendent, Optical Sciences Division

ENVIRONMENTAL POLLUTION CONTROL STAFF

Basic Responsibilities

The Environmental Pollution Control Staff reviews current and projected programs and plans to identify present and potential sources of pollution at NRL, recommends preventative or corrective measures necessary to reduce or eliminate pollution, prepares and issues standards, directives, and publicity in this field, and conducts research related to the control of pollution.

Key Personnel

Mr. V. R. Piatt

Environmental
Pollution Control Officer

Mr. V. R. Piatt

Personnel Complement

On Board: 4

SHOCK & VIBRATION INFORMATION CENTER

Basic Responsibilities

The Shock & Vibration Information Center is one of the Information Analysis Centers established by the Director of Technical Information, ODDR&E. It is assigned to the Navy for management and operation. It provides a single source within the Department of Defense for up-to-date information in the fields of shock and vibration for scientists and engineers in government agencies and for government contractors.

Key Personnel

Dr. W. W. Mutch

Head, S&V Information Center

Dr. W. W. Mutch

Personnel Complement

On Board: 5

Total Estimated R&D Funding

Fiscal Year 1971: \$220,000

LABORATORY FOR STRUCTURE OF MATTER

Basic Responsibilities

The Laboratory for Structure of Matter carries out experimental and theoretical investigations of the atomic, molecular, glassy, and crystalline structures of materials. The methods of x-ray, electron, and neutron diffraction are used in a broad program of structure studies which can form the basis for understanding and interpreting the results of research investigations in a wide variety of scientific disciplines.

Key Personnel

Dr. J. Karle

Head, Laboratory for Structure of Matter

Dr. J. Karle

Personnel Complement

On Board: 12

Total Estimated R&D Funding

Fiscal Year 1971: \$525,000

LABORATORY FOR CHEMICAL PHYSICS

Basic Responsibilities

The Laboratory for Chemical Physics carries out an interdisciplinary program of fundamental and applied research with especial emphasis on phenomena occurring at phase boundaries, i.e., the interfaces between solids and solids, solids and liquids, solids and gases, liquids and liquids, and liquids and gases. Currently, attention is being given to adhesion and adhesion promoters, wetting, surface electric properties of metals and plastics, interfacial phenomena in composite materials, the quantitative relation of dry film lubricants to shear strength and its pressure coefficient, the ability of insoluble monolayers to dampen the surface waves in liquids, and the relation of the interfacial tension of two liquids to their solubility.

Key Personnel

Dr. W. A. Zisman

Head, Laboratory for Chemical Physics

Dr. W. A. Zisman

Personnel Complement

On Board: 10

Total Estimated R&D Funding

Fiscal Year 1971: \$301,000

CENTRAL MATERIALS RESEARCH ACTIVITY

Basic Responsibilities

The responsibilities of the Central Materials Research Activity are twofold: (1) to perform basic and applied research in the preparation and characterization of materials, and (2) to provide consultation or assistance for all laboratory research personnel in the above matters. Special research areas investigated by the staff include glasses, luminescent materials, and single-crystal high-purity and rare earth materials. The primary means involved in characterization are wet chemical analysis, x-ray fluorescent and electron beam microprobe analysis, emission and solid state spark source spectrometry, electron microscopy, and x-ray diffraction techniques.

Key Personnel

Mr. R. J. Ginther

Head, Central Materials Research Activity

Mr. D. I. Walter

Head, Analytical Chemistry Branch

Mr. R. J. Ginther

Head, Structure and Composition Branch

Mr. R. J. Ginther

PULSED-NMR APPARATUS

CHEMICAL LASER

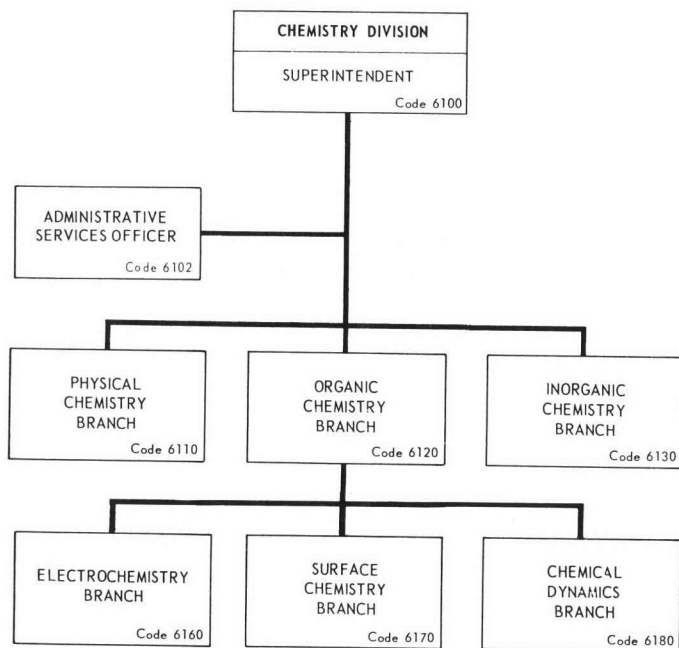

- PHYSICAL CHEMISTRY
- ORGANIC CHEMISTRY
- INORGANIC CHEMISTRY
- ELECTROCHEMISTRY
- SURFACE CHEMISTRY
- CHEMICAL DYNAMICS

TOTAL HYDROCARBON ANALYZER

AQUEOUS FILM-FORMING FOAM

Basic Responsibilities

The Chemistry Division conducts a diversified program of basic and applied research and development in physical, organic, inorganic, and analytical chemistry. Specialized programs within these fields include fuels, lubricants, corrosion, surface chemistry, fire suppression, protective coatings, polymers, electrochemistry, molecular structure, chemical lasers, submarine atmosphere purification, and BW/CW personnel protection. Consultative services form an important element in the division effort.

Branches

Physical Chemistry

Infrared and ultraviolet spectroscopy
Analytical mass spectrometry
Nuclear magnetic resonance spectroscopy
Chemical lasers

Organic Chemistry

Synthesis and properties of polymers
Functional organic coatings
Properties of resins under high compressive loads

Inorganic Chemistry

Submarine air purification
Reaction mechanisms
Corrosion mechanisms and kinetics
Ceramic materials

Electrochemistry

Fuel cells
Fundamental electrode reactions
Electrochemical power sources

Surface Chemistry

Lubricants
Salvage of equipment damaged by sea water
Surface properties of fibers
Drag reduction
Adsorbents
Surface and solid kinetics

Chemical Dynamics

Organic contaminants in submarine atmosphere
Distillate fuels research
Autoxidation and combustion dynamic
Fire suppression
CW/BW ship defense

FERMI SURFACE MODEL FOR OSMIUM

Basic Responsibilities

The Metallurgy Division is concerned with basic and applied research in physical, mechanical, chemical, and structural aspects of metals. Metal physics activities center in the investigation of electronic transport properties in terms of quantum-mechanical principles. The mechanical studies are largely related to the attainment of quantitative analytical capabilities in the definition of plastic flow and fracture properties. The chemical interests involve electrochemical aspects of various forms of catastrophic corrosion, particularly the complex phenomenon of stress corrosion cracking. The metal structure studies cover a broad range of topics including strengthening mechanisms, role of defect structures, microscale separation events in fracture, transformation processes, and mechanisms of environmental effects. This broad range of activity evolves from a balanced staff which includes materials scientists, physical metallurgists, physicists, chemists, and mechanical engineers. Important consultative services on subjects ranging from concept formulation to system development are provided to the Navy and other DoD activities.

Branches

Physical Metallurgy

Micromechanical metallurgy
Corrosion science related to advanced alloys
Marine corrosion

Metal Physics

Fermi surface studies of pure metals and alloys
Electronic, magnetic, and optical properties of metallic materials
Charged particle irradiation effects
Thermal and optical properties of metals at elevated temperatures

Thermostructural Materials

Metal ceramic composites
Interface bonding and reactions kinetics
Phase diagram and crystal structure analysis
Defect structure relationships to diffusional processes

Transformations and Kinetics

Solidification and crystal growth
Thermodynamics of lattice vacancies and dislocations
Holographic applications to metallurgical studies
Crystal plasticity

Strength of Metals

Characterization criteria
Fracture-Safe design parameters
Role of processing for high strength metals
Macroscale and microscale aspects of metal separation processes

Reactor Materials

Environmental factors in neutron irradiation
Basic mechanisms of radiation damage
Spectral analyses and dosimetry
Characterization criteria for mechanical damage

TETRAHEDRAL
PRESS AND
X-RAY EQUIPMENT

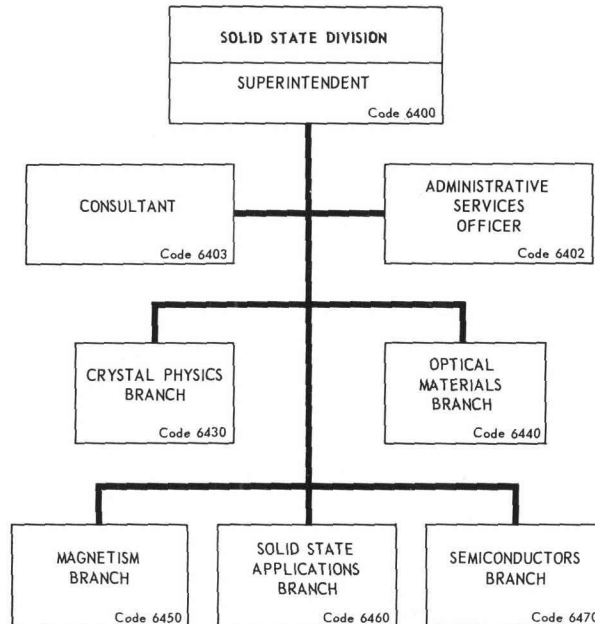

HIGH MAGNETIC FACILITY

LUMINESCENT
PROPERTIES
OF GLASS

- CRYSTAL PHYSICS
- OPTICAL MATERIALS
- MAGNETISM
- SOLID STATE APPLICATIONS
- SEMICONDUCTORS

Basic Responsibilities

The Solid State Division is concerned with basic and applied research in the physics of materials, principally solids, and with the interaction of matter with radiation. Its purposes are to increase understanding of the physical principles involved, to pursue applications related to military and industrial problems, and to serve as a corps of experts in solids for the Laboratory specifically and the Navy generally. The research work of the Division is fairly comprehensive in magnetism, semiconductors, and alkali halides. Important work is also carried on in surface physics, structure, and optical properties of glass, properties of metals at low temperatures and high magnetic fields, the effects of high pressures on solids, and radiation damage. Applications in solid state dosimeters, semiconductor photovoltaic cells, information storage systems, and infrared detectors are being pursued actively.

Branches

Crystal Physics

High-pressure effects
Ferroelectric materials

Optical Materials

Electronic properties of nonmetal crystals and glasses
Radiation induced defects, color centers
Lattice dynamics

Magnetism

Electronic and nuclear paramagnetism
Spin-ordered magnetic phenomena
Magnetism and superconductivity at ultra-low temperatures

Solid State Applications

Environmental effects on semiconductor and dielectric materials and devices

Semiconductors

Electronic energy levels and band structure
Semiconductor applications
Physical properties of semiconductors
Cryomagnetism
Lattice Vibrations
IR detectors
IR light sources such as semiconductor lasers

TILGHMAN ISLAND

Basic Responsibilities

The Optical Sciences Division carries out a variety of research, development, and application-oriented activities in the generation, propagation, detection, and use of radiation in the wavelength region between near ultraviolet and far infrared. The research, both theoretical and experimental, is concerned with discovering and understanding the basic physical principles and mechanisms involved in optical devices and phenomena. The development effort is aimed at extending this understanding in the direction of device engineering and advanced operational techniques. The applications activities including systems analysis and prototype system development and exploitation of research and development for the solution of optically related military problems. In addition to its internal program activities, the Division serves the Laboratory specifically and the Navy generally as a consulting body of experts in optical sciences. The work in the Division includes studies in quantum optics, chemical, electrical and solid state laser physics, infrared physics, atmospheric propagation, optical technology, hydrological optics, holography, optical warfare, optical radar, and optical systems. A variety of field measurement programs on optical problems of specific interest are also conducted.

General Sciences Area

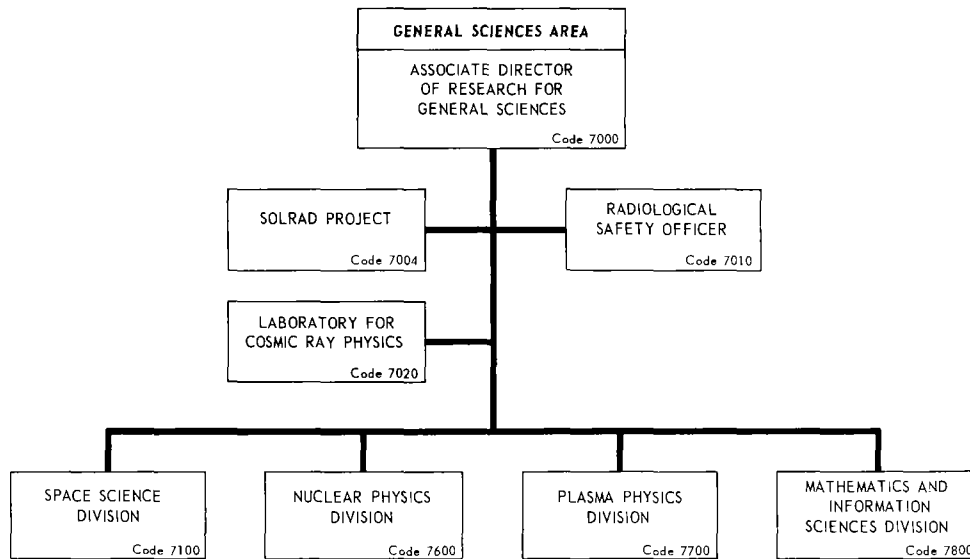

Dr. Wayne C. Hall
Associate Director of Research for General Sciences

Dr. Hall [REDACTED] [REDACTED] He attended the University of Kansas, receiving a B.S.E.E. in 1931, an M.S. in physics in 1933, and a Ph.D. in physics in 1936.

Dr. Hall came to the Laboratory in 1935 for research on the use of fuel cells to effect direct conversion of heat energy. During the next ten years he was also involved in studies on electronic strain gages, torsion meters, and static electricity. His work on precipitation static interference to aircraft radio communications ultimately led to development of the first antiprecipitation static devices used on aircraft to improve the reliability of radio communications and radio navigational aids during severe weather conditions and to reception of the Distinguished Civilian Service Award.

In 1946 Dr. Hall was appointed Superintendent of the Aircraft Electricity Division, subsequently the Solid State Division. In addition, from 1948 through 1951 he was Scientific Officer of a Los Alamos Scientific Laboratory project involving diagnostic measurements in the atomic weapons program. He was appointed Associate Director of Research in July 1954.

Key Personnel

Dr. W. C. Hall	Associate Director of Research for General Sciences
Mr. E. W. Peterkin	Technical Project Manager
Mr. L. A. Brauch	Radiological Safety Officer
Dr. M. M. Shapiro	Head, Laboratory for Cosmic Ray Physics
Dr. H. Friedman	Superintendent, Space Science Division

Dr. R. A. Shanny	Superintendent, Plasma Physics Division (Acting)
Dr. P. B. Richards	Superintendent, Mathematics & Information Sciences Division

LABORATORY FOR COSMIC RAY PHYSICS

Basic Responsibilities

The Laboratory for Cosmic Ray Physics conducts a program of fundamental investigations of cosmic radiation—its composition and spectra, its origin, its “age,” its propagation through space, its interactions with particles and fields in the regions of space that it traverses, and its role in various astrophysical phenomena. The program is framed so as to be broadly responsive to the anticipated technical requirements of the Navy and the general research and development program of the Department of Defense.

VAN DE GRAEFF

LINAC

CYCLOTRON

*Until October 15, 1970

Basic Responsibilities

The Nuclear Physics Division is engaged in a broad program of basic and applied research in nuclear physics and related areas. Included are theoretical and experimental programs in properties of nuclei, nuclear forces, nuclear reactions, shielding studies, x-ray and electron optics, materials analysis, and nuclear-weapon-related research. The Division operates a 75-MeV sector focussing cyclotron, 60-MeV Linac, 5-MeV Van de Graaff, and other particle accelerators and radiation sources.

Branches

Cyclotron

Charged particle nuclear reactions
Nuclear structure
Charged particle scattering
Neutron shielding
Radioactivation analysis
Production of radioactive sources

Linac

Electron scattering
Photonuclear reactions
Nuclear excitation
Neutron capture reactions
Pulsed radiation effects
Radioactivation analysis
Service irradiations

Nuclear Systems

Low-level nuclear radiation detectors for special purposes
Development of instruments for nuclear safeguards and radiac instrumentation

Reactors

(Disestablished October 15, 1970)

Theory

Coherent bremsstrahlung
Electron scattering by nuclei
Nuclear reactions
Nuclear structure
Nucleon-nucleon interactions
Fundamental quantum-mechanical scattering theory
High-intensity laser propagation

Van de Graaff

Materials analysis by means of charged particle beams
Implantation of ions into solids
Radiation effects caused by high energy charged particle beams
Crystal studies by means of particle channeling techniques

X-Ray Optics

X-ray spectral measurements
X-ray fluorescence analysis
Electron probe micro-analysis

LASER STUDIES

Basic Responsibilities

The Plasma Physics Division conducts both basic and applied experimental and theoretical research. Examples of effort underway include: fusion physics and the generation and containment of high-temperature plasmas, directed toward eventual power sources; laboratory astrophysics; electron beams; collision-free shock waves; laser-produced plasma and high-power lasers. This Division, the University of Maryland, and Cornell University engage in a joint program of research in plasma physics. In addition to increasing significantly the scientific breadth of the participating institutions, the program is acquainting graduate students with research frontiers in plasma physics through association with leading scientists in the field. Students have an opportunity to use NRL facilities and talent for thesis research, and NRL scientists, in turn, are able to use the research facilities of both universities.

Branches

Electronic Instrumentation

Instrumentation support to the Division for control measurement of experiments

High Temperature Physics

Physics and utilization of ultra-high-temperature plasmas
Plasma chemistry

Plasma Dynamics

Theoretical and numerical simulation studies of problems in nonlinear plasma dynamics

Plasma/Laser Technology

Production and applications of intense electron beams

Beam stabilization

Oceanology Area

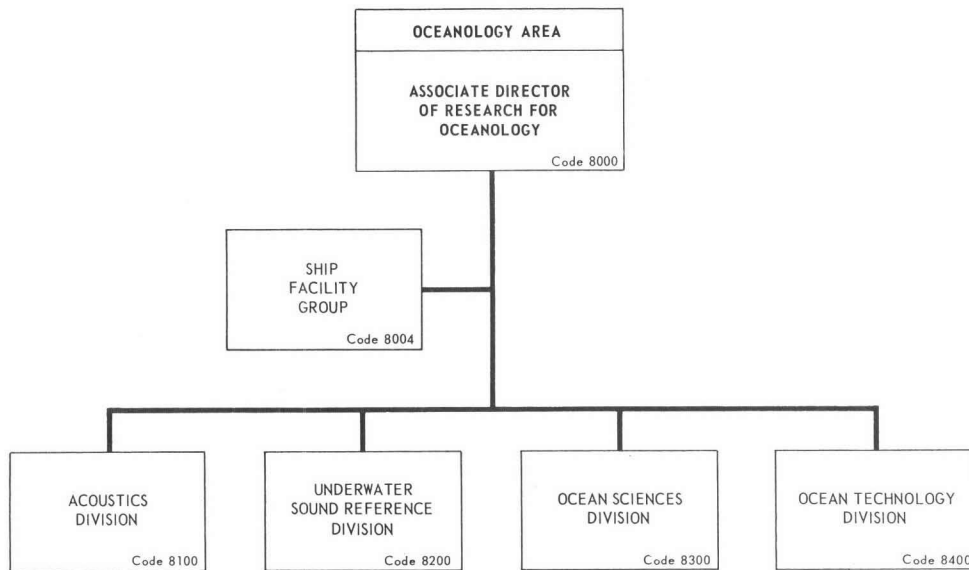

Dr. Ralph R. Goodman
Associate Director of Research for Oceanology

Dr. Goodman was born in Detroit, Michigan, on March 18, 1927. He attended the University of Michigan, Ann Arbor, where in 1950 he received a B.S. degree in mathematics, in 1951 a B.S. in physics, in 1952 an M.S. in physics, and in 1958 a Ph.D. in physics.

He began his scientific career at the Navy Electronics Laboratory in 1958, joined the staff of Colorado State University in 1959 as Assistant Professor, and served as a consultant to the Applied Physics Group at the SACLAN T ASW Research Center, La Spezia, Italy, from 1961 to 1963. He then returned to Colorado State University, where from 1963 to 1968 he served as Associate Professor and Professor of Physics and, during his last year there, as Acting Chairman of the Department of Physics. He came to NRL with the appointment of Associate Director of Research in September 1968.

Dr. Goodman's research interests are centered on acoustic propagation, scattering, and physical acoustics. He also maintains an active interest in solid state Physics.

Dr. Goodman is a member of the American Physical Society, the Acoustical Society of America, the American Geophysical Union, the American Institute of Physics, Sigma Xi, Phi Kappa Phi, and Tau Beta Pi. He was also a member of the Board of Trustees of the Colorado State University Research Foundation and the NAS/NRC Committee on Undersea Warfare.

Key Personnel

Dr. R. R. Goodman	Associate Director of Research for Oceanology
Mr. A. L. Gotthardt	Ship Facility Group
Dr. J. C. Munson	Superintendent, Acoustics Division
Mr. R. J. Bobber	Superintendent, Underwater Sound Reference Division
Dr. V. J. Linnenbom	Superintendent, Ocean Sciences Division
Dr. J. P. Walsh	Superintendent, Ocean Technology Division

SHIP FACILITY GROUP

Basic Responsibilities

The Ship Facility Group is responsible for coordinating and providing ship services, sea-going facilities, and specialized expertise common to and required by the at-sea experiments of Research Divisions under the Associate Director of Research for Oceanology.

Basic Responsibilities

The Acoustics Division has major responsibility for conducting basic research and development in undersea acoustic surveillance. The spectrum of work covered in the program ranges from theoretical acoustics through concept formulation, validation of operational concepts, and systems analysis. The Division also conducts theoretical and experimental research programs in physical acoustics, ocean acoustics, and predictive oceanography to develop theory and models of the interaction of acoustics with structures and with the ocean environment. The theoretical and experimental research programs support the Navy undersea warfare program, the Advanced Undersea Surveillance Program of the Acoustics Division, and the Division's investigations in the fields of transducers, signal processing, and acoustic warfare. The Division participates strongly in formulating the Navy's ASW program, and it renders consultative services to the Navy, the Department of Defense, other government agencies, and contractors.

Dr. J. C. Knight	Head, Systems Analysis Group
Mr. R. H. Mathes	Head, Acoustic Warfare Branch
Mr. R. H. Ferris	Head, Shallow Water Surveillance Branch
Dr. C. M. Davis, Jr.	Head, Physical Acoustics Branch
Mr. H. L. Peterson	Head, Signal Processing Branch (Acting)
Mr. S. Hanish	Head, Transducer Branch
Dr. B. B. Adams	Head, Large Aperture Systems Branch
Dr. H. P. Bucker, Jr.	Head, Propagation Branch

Personnel Complement

On Board: 146

Total Estimated R&D Funding

Fiscal Year 1971: \$9,184,000

Underwater Sound Reference Division

Mr. R. J. Bobber

- UNDERWATER ELECTROACOUSTIC MEASUREMENT METHODS
- UNDERWATER ELECTROACOUSTIC STANDARDS
- UNDERWATER ELECTROACOUSTIC TEST & EVALUATION

HIGH-FREQUENCY LABORATORY

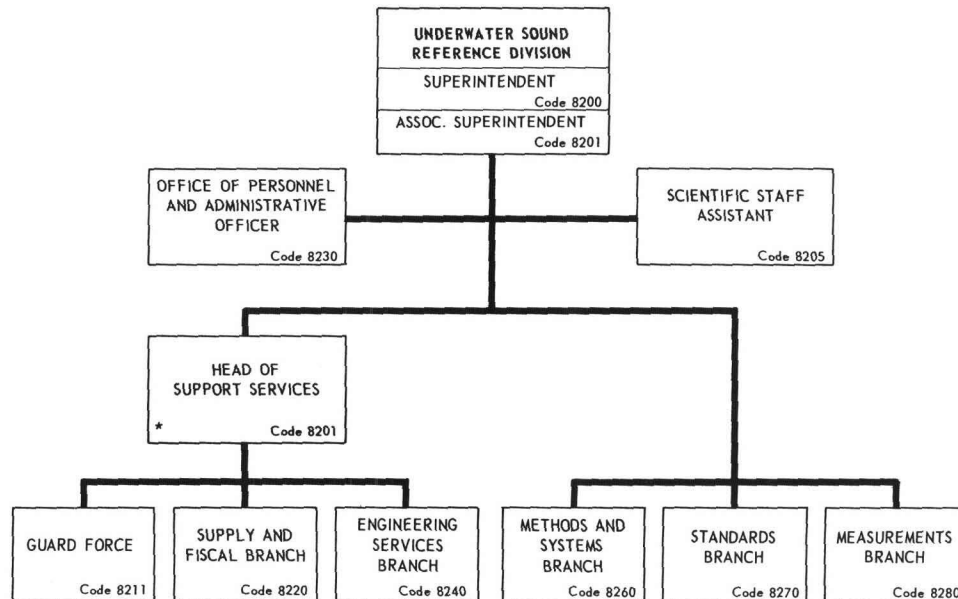

ANECHOIC TANK

UNDERWATER SOUND REFERENCE DIVISION,
ORLANDO, FLORIDA

LEESBURG FACILITY -
CALIBRATION BARGE

* Indicates collateral duty as Assoc. Superintendent.

Basic Responsibilities

The Underwater Sound Reference Division is a focal point in the Navy for standardization in the science and technology of underwater sound measurements. Its research and development program is aimed at expanding the state of the art and providing Navy in-house expertise. Reference calibration measurements in a large complex of specialized facilities and calibrated standard transducers are available to all naval activities and contractors in support of undersea warfare programs.

Research and Development Branches

Methods and Systems

Calibration theory
Measurement methods
Digital and analog systems
Acoustic absorption
Cavitation studies

Standards

Transducer materials
Electroacoustic standards
Acoustic sources
Specialized electroacoustic transducers
Vibration analysis techniques
Standard loan services

Measurements

Standard calibration services
Sonar transducer test and evaluation
Measurements on acoustic materials
Simulated deep-submergence measurements
Measurement facility development

Key Personnel

<i>Name</i>	<i>Title</i>
Mr. R. J. Bobber	Superintendent
Mr. D. T. Hawley	Associate Superintendent
Mr. J. M. Taylor	Scientific Staff Assistant
Mr. J. C. Michael	Supply and Fiscal Officer
Mrs. A. Z. Shehee	Personnel and Administrative Officer
Mr. J. F. Prandoni	Head, Engineering Services Branch
Mr. A. Z. Robinson	Head, Methods and Systems Branch
Mr. I. D. Groves	Head, Standards Branch
Dr. W. L. Paine	Head, Measurements Branch

Personnel Complement

On Board: 99
(Graded 79, Ungraded 20)

Total Estimated R&D Funding

Fiscal Year 1971: \$1,400,000

Dr. V. J. Linnenbom

Ocean Sciences Division

CLOUD PHYSICS STUDIES

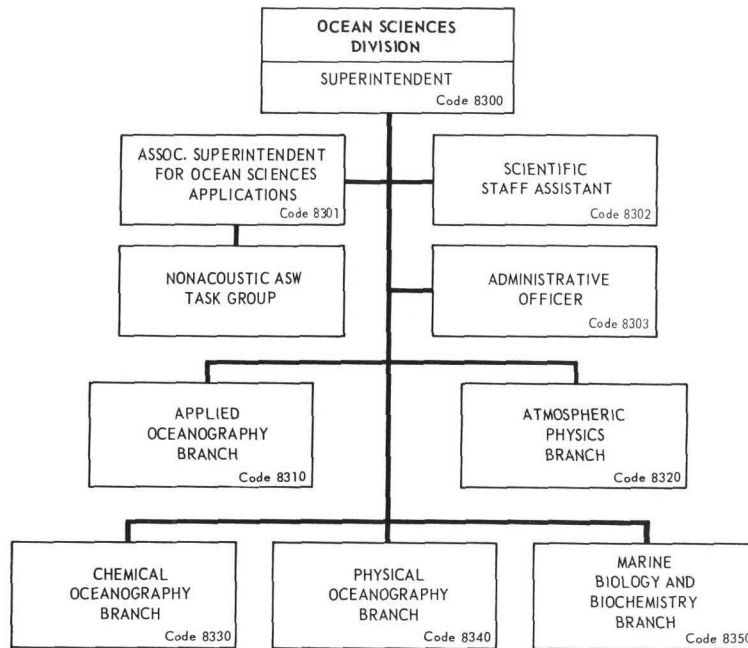

SURFACE EFFECTS

- APPLIED OCEANOGRAPHY
- ATMOSPHERIC PHYSICS
- CHEMICAL OCEANOGRAPHY
- PHYSICAL OCEANOGRAPHY
- MARINE BIOLOGY & BIOCHEMISTRY
- NONACOUSTIC ASW

NANSEN BOTTLE PREPARATION

Basic Responsibilities

The Ocean Sciences Division conducts basic and applied research and development in the ocean sciences. Included are studies of the physics, chemistry, geology, and biology of the oceans directed toward an improved understanding and use of the oceans as the major operating environment of the Navy. Practical results lead ultimately to improvement in the design and effectiveness of naval equipment, materials, and systems.

Staff Activities

Nonacoustic ASW (R&D) Task Group

Branches

Applied Oceanography

Nonacoustic detection of submarines
Hydrodynamics of submerged bodies
Infrared characteristics of the ocean

Atmospheric Physics

Air-sea interactions
Atmospheric dynamics
Cloud physics
Weather instrumentation

Chemical Oceanography

Physical and analytical chemistry of seawater,
dissolved gases, and marine sediments

Physical Oceanography

Hydrodynamics and turbulence
of the oceans
Marine geophysics

Marine Biology & Biochemistry

Biodegradation of materials in the marine
environment
Organic chemistry of seawater
Biochemistry of marine organisms

Key Personnel

<i>Name</i>	<i>Title</i>
Dr. V. J. Linnenbom	Superintendent
Dr. J. E. Elliot	Associate Superintendent
Dr. A. H. Schooley	Senior Research Scientist
Mr. J. I. Hoover	Consultant
Mr. H. L. Clark	Head, Applied Oceanography Branch
Dr. J. E. Dinger	Head, Atmospheric Physics Branch
Dr. C. H. Cheek	Head, Chemical Oceanography Branch
Dr. J. E. Elliot	Head, Physical Oceanography Branch (Acting)
Dr. J. M. Leonard	Head, Marine Biology and Biochemistry Branch

Personnel Complement

On Board: 92

Total Estimated R&D Funding

Fiscal Year 1971: \$3,391,000

Dr. J. P. Walsh

Ocean Technology Division

MIZAR

BOTTOM STUDIES

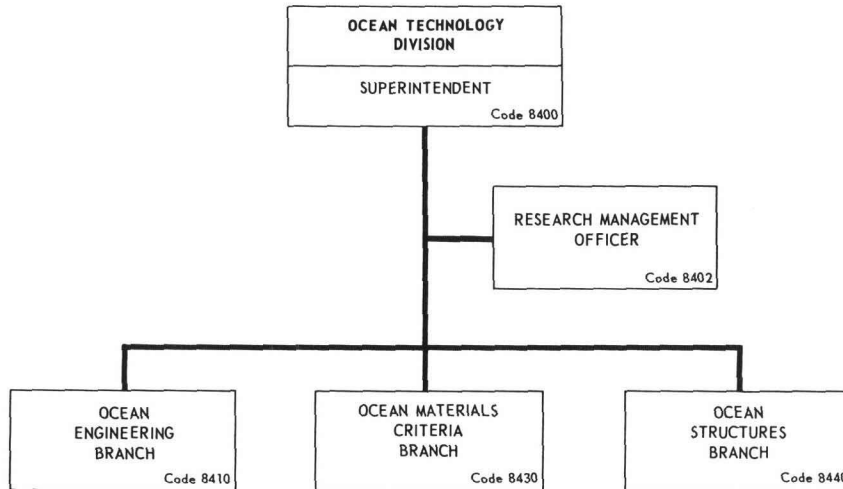

- OCEAN ENGINEERING
- OCEAN MATERIALS CRITERIA
- OCEAN STRUCTURES

PITTING SEVERE FLAKING
HYDROSTATIC PRESSURE FAILURE STUDIES

UNDERWATER CAMERA

Basic Responsibilities

The Ocean Technology Division researches, develops, and applies specialized equipment, instrumentation, and techniques for conducting ocean and ocean-floor operations, and it evolves operational technology for advanced systems. The Division utilizes advanced materials and design technology for engineering optimization of required equipment. It also conducts research activities in select areas of ocean technology with coupling and support activities related to other ongoing research and development in these and other fields of interest. This Division, in conjunction with other Divisions of NRL and out-of-house agencies, brings the collective expertise to bear on crucial problems.

Branches

Ocean Engineering

Deep-ocean instrumentation and investigations
Hydrodynamics of deep towing
Reliable acoustic paths

Ocean Materials Criteria

Fracture mechanics and fracture strength
Plastic flowing
Compression failure mechanisms
Armor research and development
Deep submergence materials-structures
Missile component failure
Nondestructive testing

Ocean Structures

Shipboard shock fundamentals
Shock protection for weapons systems
Methods for design against shock
Fracture mechanics design studies
Developmental studies of prototypes
Shock strength of materials
Shock propagation and instrumentation
Hydromechanic studies

Key Personnel

<i>Name</i>	<i>Title</i>
Dr. J. P. Walsh	Superintendent
Dr. R. O. Belsheim	Consultant
Dr. W. H. Vaughan	Consultant
Mr. C. L. Buchanan	Head, Ocean Engineering Branch
Dr. I. Wolock	Head, Ocean Materials Criteria Branch (Acting)
Mr. G. J. O'Hara	Head, Ocean Structures Branch (Acting)

Personnel Complement

On Board: 64

Total Estimated R&D Funding

Fiscal Year 1971: \$2,472,000

Blank Page

The Support Services Department

Captain Seymour N. Ross, USN
Director of Support Services

Captain Seymour N. Ross is a native of Newburgh, New York. He received his commission and B.S. degree from the U.S. Naval Academy in 1947; a Nav. E. degree from the Massachusetts Institute of Technology in 1952; and in 1957, a B.S. in metallurgy from the Carnegie Institute of Technology. He has also done graduate work in international relations at the University of California.

Prior to coming to NRL, Captain Ross served as Fleet Maintenance Officer with the staff of Commander-in-Chief, U.S. Naval Forces Europe, with Headquarters in London, England. As additional duty, he was Assistant Supervisor of Salvage, Europe. Previously, he held positions at the Boston Naval Shipyard, the Shipbuilding Liaison Office at The Hague, The Netherlands, in the Design and Research and Development Divisions of the Bureau of Ships, and in the Development Divisions of the Office of the Chief of Naval Operations. Captain Ross became Director of Support Services on September 30, 1969.

Captain Ross is a member of Sigma Xi, the American Society of Naval Engineers, and the Marine Technology Society.

THE SUPPORT SERVICES DEPARTMENT

The Director of Support Services is a naval officer with the appropriate rank, training, and experience. His primary responsibility is the supervision, coordination, and control of the administrative and service operations required to provide a wide spectrum of services in support of the work of the Research Department.

Key Personnel

<i>Name</i>	<i>Title</i>	<i>Code</i>
CAPT S. N. Ross, USN	Director of Support Services	1100
Mr. S. L. Cohen	Management Engineer	1103
Dr. A. L. Branning	Patent Counsel	1104
LT D. H. Lederer, MC, USN	Medical Officer	1106
CDR J. R. Webb, SC, USN	Supply Officer	1900
Mr. E. L. Smith	Head, Technical Information Division	2000
CDR C.M. Kunstmann, USN	Engineering Services Officer	2300
CDR J. B. Groff, CEC, USN	Public Works Officer	2500
CDR R. S. Mason, USN	Chesapeake Bay Division Officer	2700

OFFICE OF THE MANAGEMENT ENGINEER

Basic Responsibilities

The Office of the Management Engineer provides staff support to management officials of the Laboratory in matters of administrative operations, management control, and facilities planning.

Key Personnel

Mr. S. L. Cohen
Mr. A. M. Toscano

Management Engineer
Deputy Management Engineer

Mr. S. L. Cohen

Personnel Complement

On Board: 7

OFFICE OF PATENT COUNSEL

Basic Responsibilities

The Office of Patent Counsel provides services concerning inventions, patents, trademarks, copyrights, and other related matters. Patent applications are prepared, filed, and prosecuted on NRL inventions of significance to the Government. The Patent Counsel serves as consultant and adviser on patent and data clauses in R&D and procurement contracts. Assistance is provided the Research Department through state-of-the-art searches in the patent literature pertinent to particular research problems.

Key Personnel

Dr. A. L. Branning
Dr. J. G. Murray

Patent Counsel
Deputy Patent Counsel

Personnel Complement

On Board: 22
(Includes NRL and ONR)

Dr. A. L. Branning

MEDICAL STAFF

Basic Responsibilities

The Medical Staff provides a comprehensive industrial health program. Its members serve in an advisory capacity on the Radiological, Safe Driving, Eye Hazard, and other Laboratory Committees, as directed.

Key Personnel

LT D. H. Lederer, MC, USNR
Mrs. H. N. East, RN

Medical Officer
Occupational Health Nurse

Personnel Complement

On Board: 7
(Civilian 2, Military 5)

LT D.H. Lederer

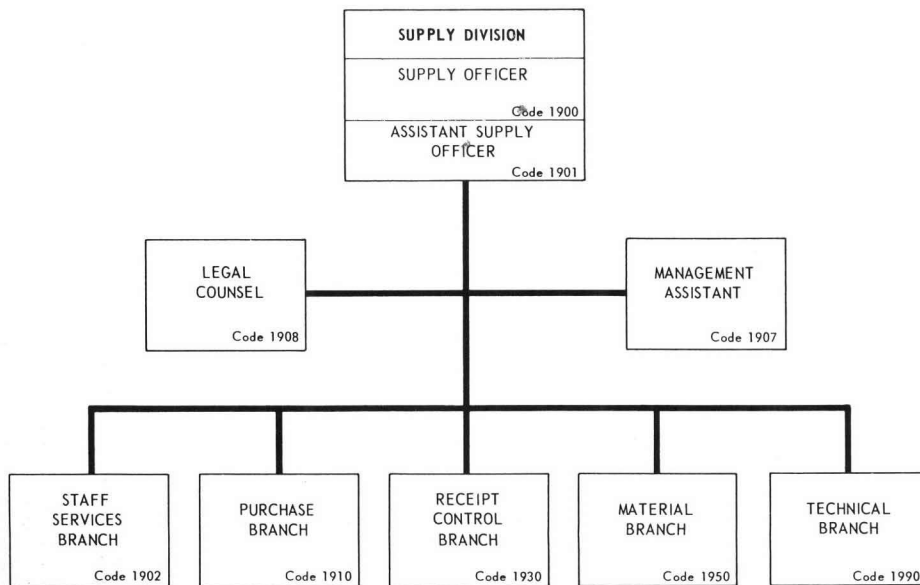

Supply Division

CDR J. R. Webb, USN

- STAFF SERVICES
- PURCHASE AND CONTROL
- MATERIAL
- TECHNICAL

Basic Responsibilities

The Supply Division provides service functions to the Laboratory including the operation of supply issue stores, procurement of equipment, material, and contractual services; receipt, inspection, and delivery of material and equipment; storage of inactive laboratory equipment; packing; shipping; traffic management; and survey and disposal of excess and unusable property.

During FY 1970 the Supply Division occupied 204,351 square feet of building space; its stores inventory value averaged \$880,000; procurements totalled \$45,500,000; stores issued totalled \$1,900,000; and disposals totalled \$3,300,000.

Key Personnel

<i>Name</i>	<i>Title</i>
CDR J. R. Webb, SC, USN	Supply Officer
LT J. R. Stafford, SC, USN	Assistant Supply Officer
Mr. A. S. Horton	Legal Counsel
Mr. L. Woods	Management Assistant
Mr. A. W. Medley, Sr.	Head, Staff Services Branch
Mr. H. E. Senasack	Head, Purchase Branch
Mrs. V. S. Thomas	Head, Receipt Control Branch
Mr. H. W. Dickinson	Head, Material Branch
Mr. R. R. Black	Head, Technical Branch

Personnel Complement

On Board: 141

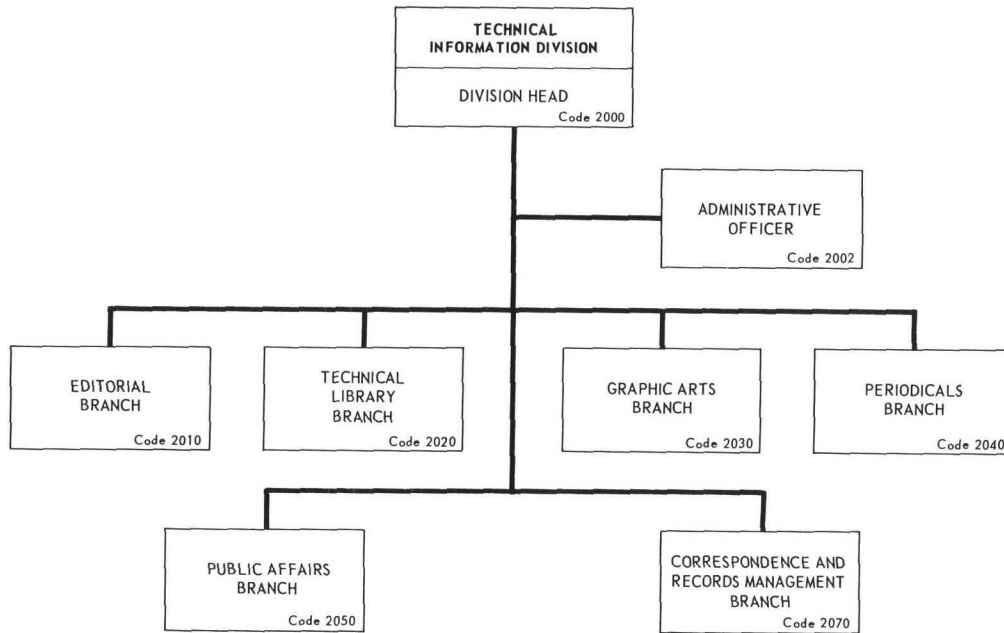

(Graded 86, Ungraded 52, Military 3)

Mr. E. L. Smith

Technical Information Division

- EDITORIAL
- LIBRARY
- GRAPHIC ARTS
- PERIODICALS
- PUBLIC AFFAIRS
- CORRESPONDENCE AND RECORDS MANAGEMENT

Basic Responsibilities

The Technical Information Division plans and administers the Laboratory's program of preparing and disseminating the results of scientific research through official publications, scientific journals, presentations, films, exhibits, and news media. It provides centralized professional services to both NRL and ONR in writing, editing, printing, exhibits, photography, graphic arts, public affairs, documentation, language-translations, and mail-records services. It operates one of the Navy's largest integrated technical libraries with holdings of 200,000 bound volumes and 350,000 technical reports.

Key Personnel

<i>Name</i>	<i>Title</i>
Mr. E. L. Smith	Head, Technical Information Division
Mrs. D. P. Baster	Librarian (Acting)
Mr. W. H. Ramey	Head, Graphic Arts Branch
Mr. W. M. Leak	Head, Periodicals Branch
Mr. I. S. Rudin	Head, Editorial Branch
Mr. H. S. Poole	Head, Public Affairs Branch (Acting)
Mrs. M. G. Beall	Head, Correspondence and Records Management Branch

Personnel Complement

On Board: 160

(Graded 144, Ungraded 16)

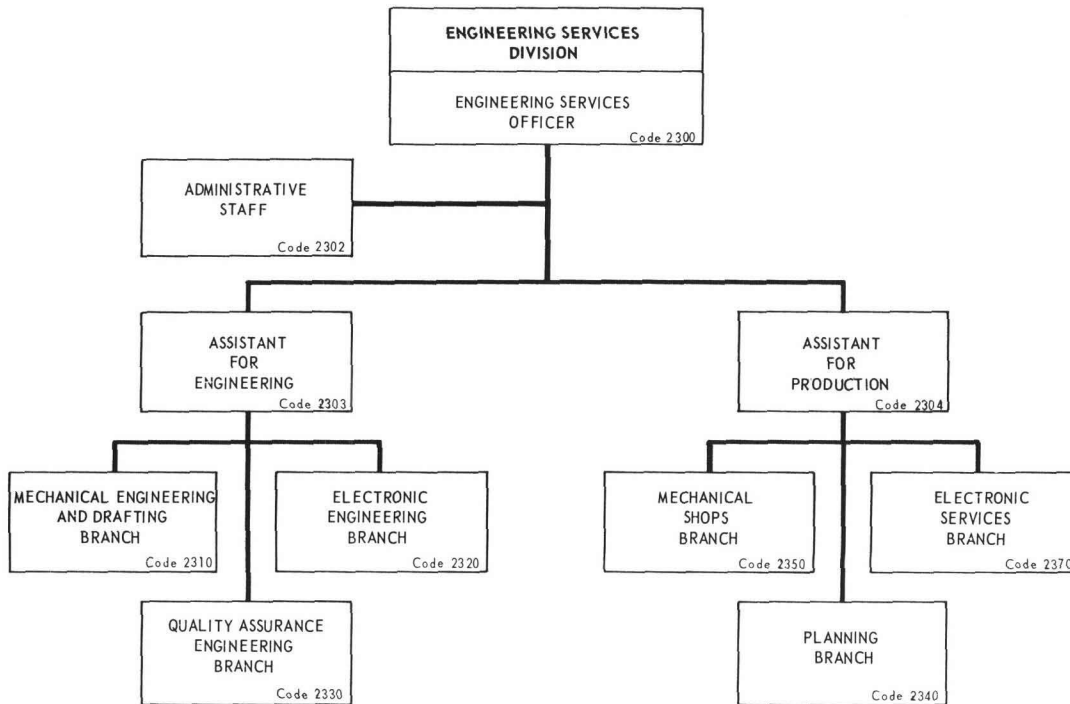

Engineering Services Division

CDR C. M. Kunstmann, USN

- MECHANICAL ENGINEERING AND DRAFTING
- ELECTRONIC ENGINEERING
- MECHANICAL SHOPS
- CHEMICAL PROCESSES SHOPS
- ELECTRONIC SERVICES
- PLANNING & PRODUCTION ENGINEERING
- PROJECT ENGINEERING

Basic Responsibilities

The Engineering Services Division provides the engineering, design, fabrication, assembly, and test of experimental research equipment in support of the Laboratory's research efforts.

Key Personnel

<i>Name</i>	<i>Title</i>
CDR C. M. Kunstmann, USN	Engineering Services Officer
Mr. P. R. Shifflett	Assistant for Engineering
Mr. J. P. Manning	Assistant for Production
Mr. C. T. McComb	Head, Mechanical Engineering and Drafting Branch
Mr. J. Brotzman	Head, Electronic Engineering Branch
Mr. E. Trexler	Head, Quality Assurance Engineering Branch
Mr. P. C. Buck	Head, Planning Branch
Mr. D. R. Eggleston	Head, Mechanical Shops Branch
Mr. J. L. Leizear	Head, Electronic Services Branch

Personnel Complement

On Board: 493

(Graded 160, Ungraded 332, Military 1)

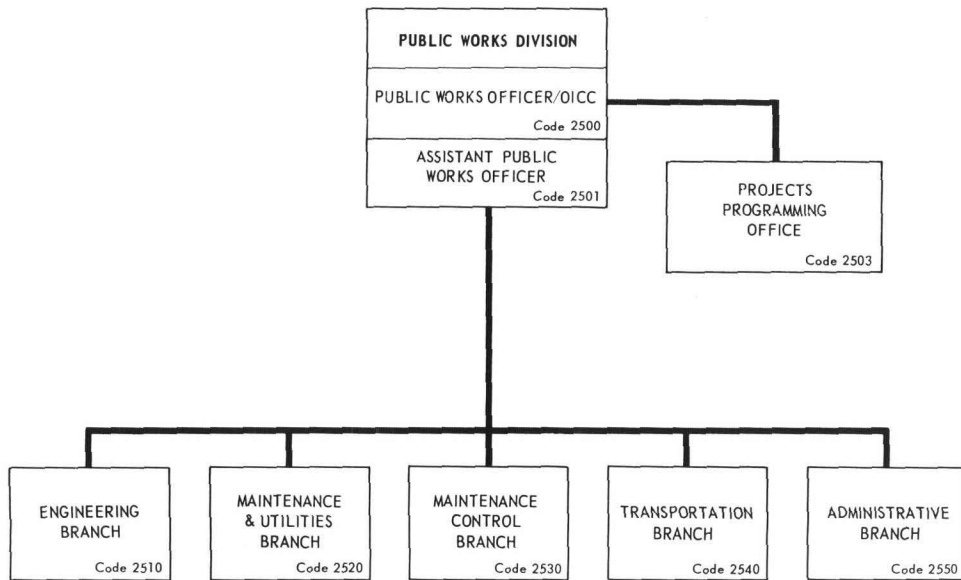

Management & Staff	57
Engineers	36
Technicians	107
Journeymen	205
Machine Operators & Helpers	35
Apprentices	53

Public Works Division

CDR J. B. Groff, USN

- ENGINEERING
- ADMINISTRATION
- MAINTENANCE AND UTILITIES
- MAINTENANCE CONTROL
- TRANSPORTATION
- CONSTRUCTION
- PROJECTS PROGRAMMING

Basic Responsibilities

The Public Works Division is responsible for the physical plant of NRL. This includes responsibility for the design, construction, operation, maintenance, and repair of all buildings, grounds, roads, utilities, and other structures and activities. Also included are transportation; weight-handling and heavy-construction equipment; heating and refrigeration plants; electric, water, steam, air, and gas supply distribution; telephone communication systems; and sewage disposal.

The Public Works Division provides professional consulting services to the scientific divisions on facilities planning and engineering.

Key Personnel

<i>Name</i>	<i>Title</i>
CDR J. B. Groff, CEC, USN	Public Works Officer/Officer in Charge of Construction
LTJG W. E. Moore, CEC, USNR	Projects Programming Office
Mr. G. H. Seaver, Jr.	Projects Programming Office
Mr. J. R. Lescault	Head, Administrative Branch
Mr. C. R. Parsons	Head, Engineering Branch
Mr. L. Carpenter	Head, Maintenance & Utilities Branch (Acting)
Mr. R. O. Weidman	Head, Maintenance Control Branch
Mr. C. P. Trexler	Head, Transportation Branch

Personnel Complement

On Board: 362

(Graded 39, Ungraded 321, Military 2)

Chesapeake Bay Division

CDR R. S. Mason, USN

Basic Responsibilities

The Chesapeake Bay Division provides and maintains facilities and services for test, development and evaluation of radar, radio, and fire control equipment. It also services and supports all research projects conducted at the Chesapeake Beach and Tilghman Island complexes of NRL.

The Physical Plant

Located in a relatively clear area away from any congestion or industrial interference, the main site, at Chesapeake Beach, covers 174.9 acres containing 197 structures of various size and construction, six of which are major laboratory buildings. There is over 200 feet of usable dock space with a water depth of 4 to 7 feet, located 2 miles north of the main site. Off-site facilities include the Tilghman Island Facility, located directly across the Bay from CBD at a distance of about 10 miles; the Theodolite House, at North Beach; and the Off-shore Platform, approximately 2 miles southeast of CBD in the Bay.

One 36-foot diesel-powered boat and five wherries are used in support of research projects and for transportation between off-site facilities. Housing includes 24 public quarters.

Key Personnel

<i>Name</i>	<i>Title</i>
CDR R. S. Mason, USN	Division Officer
Mr. F. R. Theodore	Administrative Officer
Mr. K. V. Davis	Security Officer
BMCM G. VandenBerg, USN	Operations Officer
Mr. R. M. Conlyn	Station Engineer

Research Division Representatives

Applications Research Division

Mr. A. C. Grosvenor, Applied Physics Branch
Mr. C. D. Porter, Dynamics Branch

Radar Division

Mr. M. W. Lehman, Radar Geophysics Branch
and Division Representative
Mr. J. R. Ward, Airborne Radar Branch
Mr. W. K. Fliss, Search Radar Branch

Optical Sciences Division

Mr. T. H. Cosden, Infrared Branch

Personnel Complement

On Board: 87

(Graded 35, Ungraded 50, Military 2)

Awards Received by Civilian Employees

As of July 1, 1970

<u>Government Awards</u>	Number
The Medal of Merit from the President of the United States	1
The Certificate of Merit from the President of the United States	11
National Medal of Science from the President of the United States	1
The President's Award for Distinguished Federal Civilian Service	2
Department of Defense Distinguished Civilian Service Award	4
Department of Defense Certificate of Merit	1
Department of the Navy Award for Distinguished Achievement in Science	2
Navy Distinguished Civilian Service Award	55
Navy Captain Robert Dexter Conrad Award	4
Navy Superior Civilian Service Award (established 1959)	28
Navy Meritorious Civilian Service Award	189
E. O. Hulburt Annual Science Award (local NRL award)	15
 <u>Non-Government Awards</u>	
Rockefeller Public Service Award	1
Henry Draper Medal of the National Academy of Sciences	1
Engineering Science Award of the Washington Academy of Sciences	2
Physical Sciences Award of the Washington Academy of Sciences	4
Morris Liebmann Memorial Prize of the Institute of Radio Engineers	1
Medal of Merit Award of the Institute of Radio Engineers	2
Harry Diamond Award of the Institute of Radio Engineers	4
John Scott Medal of the City of Philadelphia	1
Patrons Award of the Institute of Radio Engineers (Washington section)	1
Reliability and Quality Control Award of the Radio Engineers Professional Group	1
Frederic Ives Award of the Optical Society of America	2
A. G. Bissell Memorial Award of the American Welding Society	1
Joseph S. Seaman Gold Medal Award of the American Foundrymen's Society	1
John A. Penton Gold Medal Award of the American Foundrymen's Society	1
Eisenman Medal of the American Society for Metals (Philadelphia Chapter)	1
Burgess Prize Award of the American Society for Metals	3
Burgess Memorial Lecture of the American Society for Metals (Washington Section)	1
Charles B. Dudley Medal of the American Society for Testing Materials	1
Sam Tour Award of the American Society for Testing Materials	1
Gold Medal Award of the American Society of Naval Engineers	2
Trent-Crede Award of the Acoustical Society of America	1

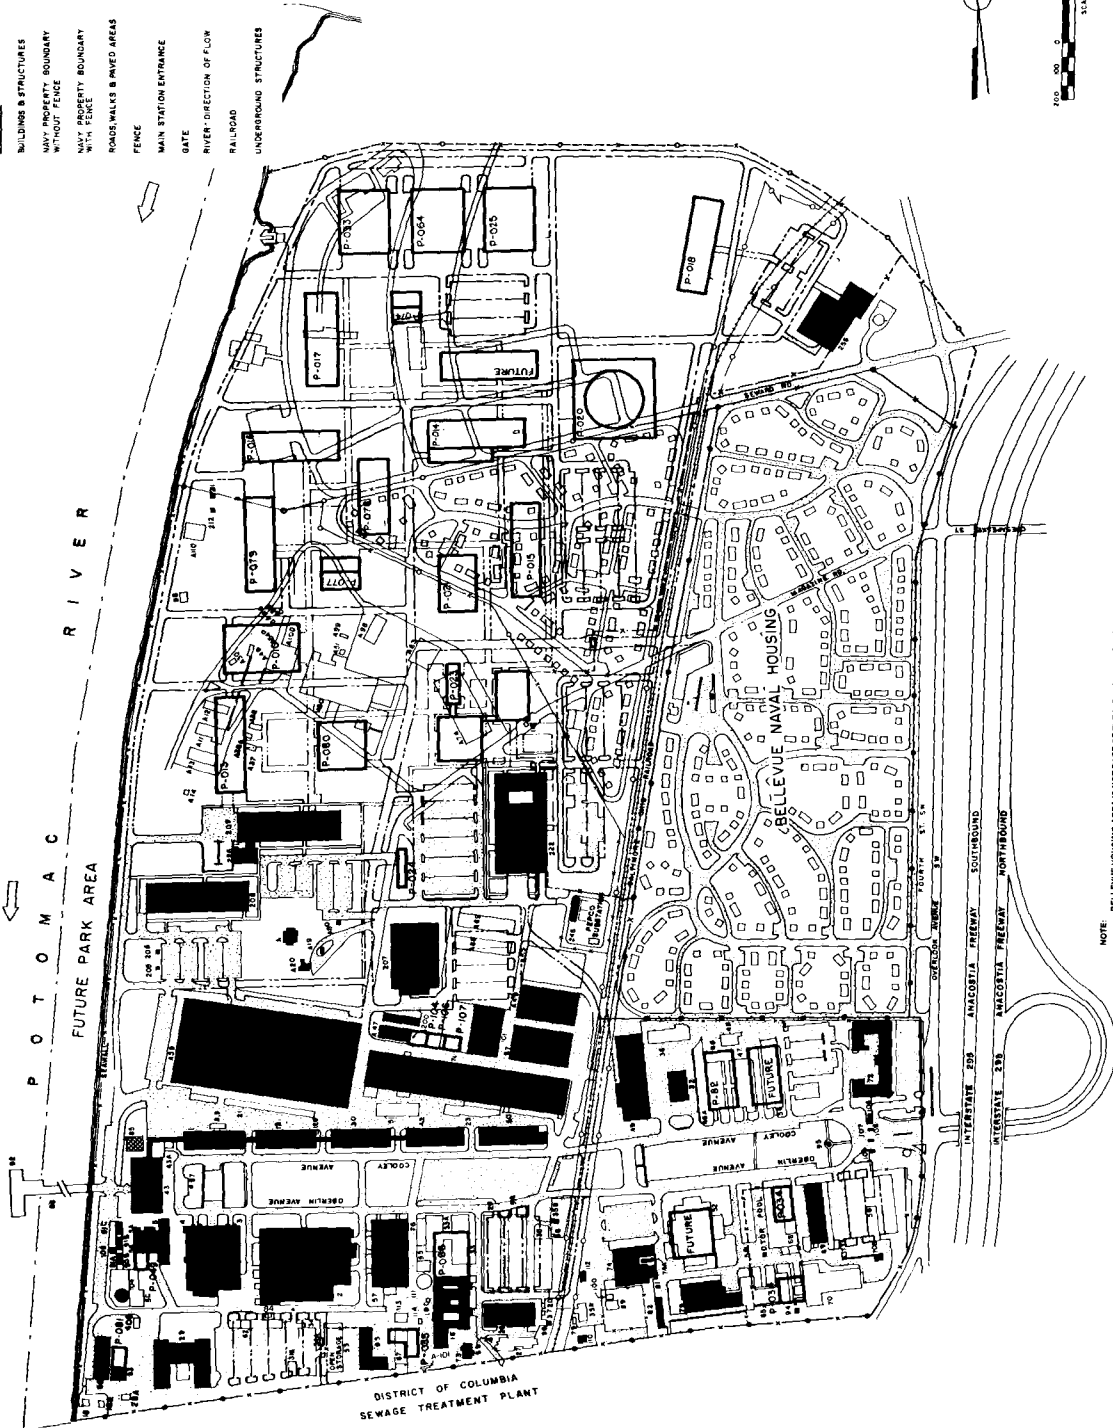

<u>Non-Government Awards (Continued)</u>	Number
District Meritorious Certificate Award of the American Welding Society	1
Stuart Ballantine Medal of the Franklin Institute of Pennsylvania	1
A. K. Doolittle Award of the National American Chemical Society	1
Kendall Company Award of the American Chemical Society	1
Hillebrand Prize of the American Chemical Society	2
William Blum Award of the Washington-Baltimore Electrochemical Society	2
National Award of the American Society of Lubrication Engineers	1
Annual Award of the Society for Applied Spectroscopy	2
E. Edward Pendray Award of the American Rocket Society	1
James H. Wyld Memorial Award of the American Rocket Society	1
Space Science Award of the American Institute of Aeronautics and Astronautics	1
Eddington Medal of the Royal Astronomical Society (Great Britain)	1
Janssen Medal of the French Photographic Society	1
Ancel Prize of the French Photographic Society	1
Progress Award of the Photographic Society of America	1
Professional Achievement Award of the D. C. Council of Engineers and Architectural Studies	1
National Capital Award of the D. C. Council of Engineers and Architectural Studies	3
Award for Technical Achievement of the American Society of Mechanical Engineers	1
Mayo D. Hersey Award of the American Society of Mechanical Engineers	1
Service to Mankind Award of the Washington Sertoma Club	1
Pittsburgh Spectroscopy Award of the Spectroscopy Society of Pittsburgh	
Pure Science Award of the Scientific Research Society of America (NRL Branch)	16
Applied Science Award of the Scientific Research Society of America (NRL Branch)	16
Arthur S. Fleming Award of the Washington Chamber of Commerce	2
Society of Women Engineers Achievement Award	1
Notre Dame Centennial of Science Award	2
M. Barry Carlton Award - Institute of Electrical and Electronics Engineers	1
National Civil Service League Merit Citation	1
Brazilian Ordem do Merito Naval (Legion of Naval Merit) Cavaleiro	1

Another station is located at Sugar Grove, W. Va. The Underwater Sound Reference Division is located at Orlando, Fla.

Research Platforms

Aircraft

1. The S2D (BUNO 149240) contains specially installed equipment and wing mounted pods for cloud physics research. It is also used in chaff research and for short-term experiments compatible with space limitations of the aircraft.
2. The EC-121K (BUNO 128324) is used for wave propagation studies in the four-frequency radar system.
3. The EC-121K (BUNO 135753) is used for research in cloud physics, ECM, low-frequency radar, and various projects requiring minimal aircraft conversion.
4. The EC-121K (BUNO 141297) is used mainly by the Electronic Warfare Division to experiment, evaluate, and improve Fleet electronic warfare capabilities.

Available Ships

1. USNS GIBBS (T-AGOR-1) Under operational control of
MSTSLANT. Scheduled by NRL.
2. USNS MIZAR (T-AGOR-11)
3. USNS HAYES (T-AGOR-16)
(To be delivered July 1971)
4. USS X-1 (SSX-1) is a one-sixth scale research submarine used mainly for oceanographic research. It is under operational control of COMSUBLANT, but is scheduled by NRL.
5. Fleet units are occasionally scheduled for NRL in support of CNO assigned projects by OPTEVFOR.

The Naval Research Laboratory has a continuing need for physical scientists, mathematicians, engineers, and supporting personnel. Vacancies are filled without regard to race, creed, color, sex, or national origin. Information concerning current vacancies will be gladly furnished upon request. Address all such inquiries to the Personnel Office (Code 1800), Naval Research Laboratory, Washington, D. C. 20390.
