about the Naval Research Laboratory.

March 1974

The Naval Research Laboratory has a continuing need for physical scientists, mathematicians, engineers, and supporting personnel. Vacancies are filled without regard to race, creed, color, sex, or national origin. Information concerning current vacancies will be gladly furnished upon request. Address all such inquiries to the Personnel Office (Code 1800), Naval Research Laboratory, Washington, D.C. 20375.

The Naval Research Laboratory

MISSION

To conduct a broadly based multidiscipline program of scientific research and advanced technological development directed toward new and improved materials, equipment, techniques, systems, and related operational procedures for the Navy. In fulfillment of this mission, the Naval Research Laboratory:

- (a) Initiates and conducts scientific research of a basic and long-range nature in scientific areas of special interest to the Navy.
- (b) Conducts exploratory and advanced technological development deriving from or appropriate to the scientific program areas.
- (c) Within areas of technological expertise, develops prototype systems applicable to specific projects.
- (d) Performs scientific research and development for other Naval commands and, where specially qualified, for other agencies of the Department of Defense and, in defense related efforts, for other Government agencies.
- (e) Upon request from appropriate naval commands, assumes responsibility as the Navy's principal R&D center in areas of unique professional competence.
- (f) Provides to the Navy and its contractors standardized techniques and procedures for measurements and the accurate calibration of standard instruments in areas of special Navy needs.
- (g) Furnishes scientific consultative services for the Navy and, where specially qualified, for other agencies of the Department of Defense and, in defense related efforts, for other Government agencies.
- (h) Provides to the Navy determinations of performance characteristics of developmental and prototype devices through limited engineering test and evaluation services.

THE NAVY'S CORPORATE LABORATORY

The Naval Research Laboratory is one of the principal in-house research and development institutions of the U.S. Government. It was established in 1923 to ensure that advancements in science and engineering could be readily applied to the Navy's needs. Directed always toward this end, the NRL research program has developed to its present status as a broadly based and coordinated effort in the physical, mathematical, and environmental sciences, in advanced engineering, and in naval analysis. The work of the Laboratory is conducted at the main establishment in the District of Columbia and at various field sites that provide unique environment and facilities not available at the main site.

Some principal elements of the research program include fundamental and applied work in radio wave propagation, oceanography, deep-sea instrumentation, submarine air purification, structural design theory, fracture mechanics, surface chemistry, optical physics, radar, underwater sound propagation, acoustic signal processing, sonar transducers, nuclear physics, radio astronomy, high-temperature lubricant, high-energy fuels, plasma physics, refractory metals, exotic materials for high-performance structures, x-ray astronomy, high-power lasers, solid-state physics, and stress-corrosion cracking of high-strength titanium steels and aluminum alloys.

Over 1800 scientific and technical papers were produced in 1972 as a consequence of the research and development effort of the Laboratory staff. The figure includes 156 formal reports, 159 memorandum reports, 600 articles published in professional society journals, and over 862 papers presented at scientific and technical meetings in the United States and in foreign countries.

In addition, 45 U.S. patents were issued in 1972 on inventions made by present and former employees of the Naval Research Laboratory. This figure brings the grand total of NRL patents, through the calendar year 1972, to 2338.

In its investigations of broad scientific areas, in considering its findings for potential military applications, and in furnishing to the Naval Systems Commands and Secretariat expert consultative services relating to science and military systems, NRL functions as the corporate laboratory of the Navy. Thus it provides a central focus of research and development activity that supports the Navy. When NRL findings and capabilities have borne fruit in particular areas, the results are made known to and used by not only the Navy but also the Army, the Air Force, the Defense Advanced Research Projects Agency, the Atomic Energy Commission, and other agencies of the government.

Office of the Director

The Director of the Naval Research Laboratory is a Navy Captain with appropriate educational background and experience. He is responsible for the overall operation and management of the Laboratory and its programs, and he executes the usual functions of command of a naval shore activity. The Directors of the Laboratory's two Departments, Research and Support Services, report to the Director. In carrying out the functions of his office, the Director is assisted by the Chief Staff Officer, the Comptroller, the Director of Civilian Personnel, an Executive Assistant, an EEO Coordinator, and a Public Affairs Officer.

Director, Naval Research Laboratory

Captain John T. Geary, USN

CAPT GEARY [REDACTED] He graduated from the U.S. Naval Academy in 1946, at which time he was commissioned Ensign, USN. He received an M.S. degree in engineering electronics from the U.S. Naval Postgraduate School in 1953 and an M.S. degree in business administration from the George Washington University in 1970. He graduated from ICAF (Industrial College of the Armed Forces) in 1970; he also attended numerous service schools, including, among others, the Defense Weapons Systems Management School and the Naval Radar Training School.

CAPT GEARY served in various shipboard assignments, including destroyers, cruisers, and amphibious ships, and as the operations officer for Commander, Destroyer Squadron 15, and was an instructor in electronics at the Naval Academy. Designated for Engineering Duty in 1956, he was assigned to Pearl Harbor Naval Shipyard and to Commander, Service Force U.S. Atlantic Fleet in electronics billets before coming to NRL in 1962 as Project Officer and BUSHIPS Liaison Officer. In 1964, he transferred to BUSHIPS, where he became the Head, Electronics Warfare Branch and managed many R&D Programs (approximately \$50M annually) in electronics countermeasures systems and equipments. After 1 year at ICAF, he reported to NAVAIR as Director, Astronautics Division, providing SYSCOM management of Navy R&D efforts in Space, including Program 749, SOLRAD, and Timation, among others. CAPT GEARY served for 2 years in NAVELEX as ELEX 01, the Deputy Commander for Planning, Programming, and Resources Management, responsible for the overall management of NAVELEX's growing programs and budget, and as ELEX 05, Deputy Commander for Acquisition Engineering, as well as the Command's Inspector General.

He is a member of the Institute of Electrical and Electronics Engineers and the American Society of Naval Engineers.

OFFICE OF THE DIRECTOR

Key Personnel

<u>Name</u>	<u>Title</u>	<u>Code</u>
CAPT J.T. Geary, USN	Director	1000
Mr. S.L. Cohen	Executive Assistant	1001
Mr. W.H. Webster	EEO Coordinator	1003
Mr. J.E. Sullivan	Public Affairs Officer (Acting)	1005
CAPT J. Brozena, USN	Chief Staff Officer	1200
Mr. R.A. Showman	Comptroller (Acting)	1300
Mr. F.D. Wallace	Director of Civilian Personnel	1800
CAPT J.A. Bortner	Director of Support Services	2000
Dr. A. Berman	Director of Research	4000

EXECUTIVE ASSISTANT

Basic Responsibilities

The Executive Assistant provides the Director with executive level staff and managerial support in connection with the duties, interests, and activities of the Director.

Mr. S. L. Cohen

EQUAL EMPLOYMENT OPPORTUNITY COORDINATOR

Basic Responsibilities

The Equal Employment Opportunity Coordinator serves as an advisor to the Director on EEO matters; conducts surveys and studies relating to NRL's Affirmative Action Plan and recommends methods for achieving its goals of a fully integrated work force; acts as ex officio member of the EEO Committee; and assists the EEO counselors in settling initial complaints of alleged discrimination.

Mr. W. H. Webster

PUBLIC AFFAIRS OFFICER

Basic Responsibilities

The Public Affairs Officer advises the Director and staff on all matters concerning public information, and he supervises the Laboratory's public affairs programs.

Mr. J. E. Sullivan
(Acting)

CAPT J. Brozena, USN

Chief Staff Office

- OPERATIONAL SERVICES
- SECURITY
- CLASSIFIED MATERIAL CONTROL
- SCIENTIFIC AND TECHNICAL LIAISON

Basic Responsibilities

The Chief Staff Officer provides a military staff to the Director, Naval Research Laboratory, for the purpose of assisting the Director in the military aspects of the management of the Laboratory. He conducts liaison with DOD and Navy Commands and activities and the operating forces of the Navy in support of NRL research and development operations and the coordination of the military application of the scientific work of the Laboratory. The Staff supports four multi-engine Laboratory aircraft and obtains and coordinates such additional air, surface, and subsurface services as are required. The Military Staff is also responsible for personnel and plant security, communications, and control of classified material.

Key Personnel

<u>Name</u>	<u>Title</u>
CAPT J. Brozena, USN	Chief Staff Officer
Mr. J.R. Gallagher	Administrative Services Officer
LT T.R. Cocozza, USN	Communications/Military Personnel Officer
CDR D.F. Moxley, USN	Operational Services Officer
CDR L.R. Marshall	Administrative/Security Officer
Mr. W.C. Bryan	Head, Special Activities Office
Mr. J.M. Manser	Head, Security Section
Mr. J.J. Bagley	Classified Material Control Officer
CDR W. Glickman, USN	Scientific and Technical Liaison Officer
CDR G. Janulis, USN	OIC, NRL Flight Detachment (Patuxent)

Personnel Complement

On Board: 160
(86 Civilian, 70 Military)

Office of the Comptroller

Mr. R. A. Showman

INTERNAL
REVIEW

BUDGET OFFICE

COMPUTER

- BUDGET
- ACCOUNTING
- DISBURSING
- DATA PROCESSING

Basic Responsibilities

The Comptroller is the financial adviser to the Director and other officials of the Laboratory. He administers the financial program of the Laboratory.

Key Personnel

<u>Name</u>	<u>Title</u>
Mr. R.A. Showman	Comptroller (Acting)
Mr. D.M. Johnson	Budget Officer
Mr. D.K. Jones	Accounting Officer
WO2 Lydia C. Gelardi, USN	Disbursing Officer
Mr. R.L. Guest	Data Processing Officer
Mr. R.A. Showman	Head, Internal Review Staff

Personnel Complement

On Board: 101

Mr. F. D. Wallace

Civilian Personnel Office

- EMPLOYMENT
- WAGE AND CLASSIFICATION
- EMPLOYEE DEVELOPMENT
- EMPLOYEE RELATIONS

Basic Responsibilities

The Civilian Personnel Office administers the Laboratory's personnel program, which includes selection, development, promotion, utilization, appropriate recognition, and employee counseling and services for all civilian personnel.

Key Personnel

<u><i>Name</i></u>	<u><i>Title</i></u>
Mr. F.D. Wallace	Director of Civilian Personnel
Mr. D.E. Chaquette	Information Systems Analyst
Mr. D. Blome	Head, Employment Branch
Miss D.A. Myers	Head, Wage and Classification Branch
Mr. J.E. Goss	Head, Employee Development Branch
Mr. H.H. Kay	Head, Employee Relations Branch

Personnel Complement

On Board: 44

The Research Department

The Research Department is headed by a civilian Director of Research who reports to the Director of NRL. The Department is comprised of four organizational areas of research — Electronics, Materials and General Sciences, Space Science and Technology, and Oceanology — each of which is headed by an Associate Director of Research. Encompassed by these four broad areas of research, which correspond to the principal areas of the Navy's interest in the physical and engineering sciences, are 17 divisions and additional special groups. Each division is headed by a civilian scientist and is comprised of an average of about 110 scientific, technical, and administrative personnel. The special groups average about 13 persons each. Three of the special groups (Laboratory for the Structure of Matter, Laboratory for Chemical Physics, and Laboratory for Cosmic Ray Physics) are headed by Chief Scientists who occupy corresponding "Chairs of Science."

The Director of Research is the Chief Scientist for the Laboratory; in this capacity he is responsible for:

- the conduct and effectiveness of the research program with direct authority and accountability for the technical work.
- long range and broad overall planning and programming.
- evaluating and accepting, modifying, or rejecting R&D proposals from NRL's scientific divisions; and for evaluating and recommending to the Director of NRL the acceptance or rejection of new problems from other activities.
- Research Department administration and the budgeting of funds.
- hiring, promoting, and effecting other personnel actions for Research Department personnel.

The Director of Research keeps the Director of Support Services informed at all times of the service needs of the scientific divisions and of any obstacles which may be impeding technical work of the Laboratory; he advises the Comptroller relative to requirements and control of funds; he also is encouraged to advise the Chief of Naval Research directly of the progress of the research program and of the overall climate for research at the Laboratory.

Director of Research

Dr. Alan Berman

Dr. Berman [REDACTED]. He received the A.B. degree in physics from Columbia College in 1947 and the Ph.D. degree in physics from Columbia University in 1952.

From 1952 to 1955 he was a research scientist at the Hudson Laboratories of Columbia University. He became Assistant Director of Hudson Laboratories in 1955, Associate Director in 1957, and Director in 1963. On May 29, 1967, Dr. Berman became Director of Research for the Naval Research Laboratory.

Dr. Berman's research specialties include the areas of underwater acoustics, oceanography, and signal processing. He has published numerous papers on these and related subjects. At present he is a member or chairman of a wide variety of Navy and oceanographic advisory groups. He also provides advisory services for a number of Department of Defense and other Government agencies.

Dr. Berman has on three occasions been visiting scientist to the Admiralty Research Laboratory, Teddington, England (1955, 1957, 1960), and once at the SACLANT ASW Research Center, La Spezia, Italy (1960).

Key Personnel

<u>Name</u>	<u>Title</u>	<u>Code</u>

Dr. J.H. Schulman	Associate Director of Research for Materials and General Sciences	6000
Dr. H. Rabin	Associate Director of Research for Space Science and Technology	7000
Dr. R.R. Goodman	Associate Director of Research for Oceanology	8000

RESEARCH PROGRAM OFFICE

Basic Responsibilities

The Research Program Office serves as staff to the research directorate of the Laboratory. It provides an orderly plan for coordinating NRL research programs with those of ONR and other sponsors or potential sponsors throughout the Departments of the Navy, the Army, and the Air Force, the Defense Advanced Research Projects Agency, and other agencies of the government. It also serves as a focal point for program information for project managers and other key personnel of sponsoring activities on work in progress or in various stages of planning. The Research Program Office maintains a management information center which serves as a working tool for the Laboratory directorate, and it maintains appropriate records of the Laboratory's research programs.

SPECIAL STUDIES OFFICE

Basic Responsibilities

The Special Studies Office provides analytical staff support to the Director of Research in the fields of strategic, tactical, and special warfare as well as data management science. Programs of operations research, systems analysis, and equipment developments are undertaken to provide a substantive basis for (a) the orientation and conduct of naval research and development, and (b) the general delineation of advanced weapon systems and force structure requirements for the mid- to long-range time period.

Electronics Area

The Navy's operational effectiveness depends greatly on its ability to make optimum use of the electromagnetic spectrum ranging from the very low to the extremely high frequencies. Accordingly, most of this Area's work is directed toward extending both the knowledge and the technological applications of the electromagnetic spectrum. The effort includes investigations of electronic devices, the phenomenology and advanced instrumentation associated with radio communications, radar, and related sensors, and digital computation and information-processing. NRL also serves as the lead laboratory for the Navy's exploratory development program in electronic warfare.

Associate Director of Research for Electronics

Dr. John L. Allen

Dr. Allen [REDACTED] He graduated from Pennsylvania State University in 1958 with a B.S. degree in engineering science and from Massachusetts Institute of Technology with an M.S. in electrical engineering in 1962 and a Ph.D. in communication biophysics in 1968.

Dr. Allen joined the Research Department of NRL as the Associate Director of Research for Electronics on March 1, 1971 where he has responsibility for work in radar, communications, electronic warfare and electronic devices. He served in the USAF and worked at what is now HRB Singer and at M.I.T. Lincoln Laboratory. At Lincoln he organized and was the first leader of the Array Radar Group. He was later promoted to Associate Head of the Radar Measurements Division.

Dr. Allen is a fellow of the Institute of Electrical and Electronic Engineers and a member of the Tau Beta Pi Engineering Honor Society. He has served on several studies and committees for professional societies and for the Department of Defense.

FOUR-WAVE INFRARED MIXING EXPERIMENT

GLASS LASER

CO₂ PULSE LASER

Basic Responsibilities

The Optical Sciences Division carries out a variety of research, development, and application-oriented activities in the generation, propagation, detection, and use of radiation in the wavelength region between near ultraviolet and far infrared. The research, both theoretical and experimental, is concerned with discovering and understanding the basic physical principles and mechanisms involved in optical devices and phenomena. The development effort is aimed at extending this understanding in the direction of device engineering and advanced operational techniques. The applications activities include systems analysis and prototype system development and exploitation of research and development for the solution of optically related military problems. In addition to its internal program activities, the Division serves the Laboratory specifically and the Navy generally as a consulting body of experts in optical sciences and focuses some of this effort through the Electro-Optical Technology Program Office. The work in the Division includes studies in quantum optics, laser physics, laser-matter interactions, atmospheric propagation, optical technology, holography, optical warfare, optical radar, and optical systems. A variety of field measurement programs on optical problems of specific interest are also conducted.

Staff Activities

Electro-Optical Technology Program Office

Electro-optical program assessment
and advisory support

Senior Scientific and Consultant Staff

Special systems analysis
Technical study groups
Technical contract monitoring

Branches

Optical Physics

Nonlinear optical phenomena
Picosecond light pulses
Light scattering in solids
Nonlinear effects in materials
Optical waveguides
Liquid crystals

Interaction Physics

Laser controlled fusion
Laser x-ray generation
X-ray lasers
Laser-matter interactions
High-power glass laser development

Optical Warfare

Optical and IR countermeasures
Optical intelligence
Optical and electro-optical techniques

Optical Radiation

Laser system engineering
Electro-optic applications
Optical instrumentation

Materials and General Sciences Area

The Materials and General Sciences Area is an administrative grouping of chemists, metallurgists, and solid-state, optical, and nuclear scientists who (a) carry on interdisciplinary basic and applied research on the mechanical, electrical, thermal, magnetic, optical, and nuclear properties of matter, and (b) develop components, devices, and systems based on the phenomena and principles of the several disciplines involved

Associate Director of Research for Materials and General Sciences

Dr. James H. Schulman

Dr. Schulman was born in Chicago, Illinois, on November 15, 1915. He received the degrees of B.S. (1939) and Ph.D. (1942), both in chemistry, from the Massachusetts Institute of Technology. He has held teaching positions at Suffolk University and M.I.T. and research positions at the M.I.T. Laboratory for Insulation Research and Sylvania Electric Products.

Since coming to NRL in 1946 to initiate research on luminescence in solids, he has served as Head of Branches in the Metallurgy and Solid State Divisions and as Superintendent of the Optical Physics Division. From August 1960 until December 1961, he was Deputy Scientific Director of the London Branch of the Office of Naval Research. In November 1964, Dr. Schulman was appointed to the Chair of Materials Sciences in recognition of his distinguished research accomplishments. In September 1967, he was appointed Associate Director of Research for Materials. In February 1971 the Materials Area was broadened to include the Optical Science and Nuclear Science Divisions and was renamed the Materials and General Sciences Area.

Dr. Schulman received the Applied Science Award of the NRL Branch of the Research Society of America (1957) and the Navy Superior Civilian Service Award (1965), both in recognition of his many contributions to the science of luminescent materials and phenomena, radiation-induced optical effects in solids, and the application of these effects to radiation dosimetry. He is author or co-author of over 90 papers and a book on these subjects, and he holds numerous patents.

Dr. Schulman is a Fellow of the American Physical Society, the Optical Society of America, and the American Association for the Advancement of Science, as well as an Associate Editor of two scientific journals. He has served on several panels and committees of the National Academy of Sciences and of various scientific societies.

LABORATORY FOR STRUCTURE OF MATTER

Basic Responsibilities

The Laboratory for Structure of Matter carries out experimental and theoretical investigations of the atomic, molecular, glassy, and crystalline structures of materials. The methods of x-ray, electron, and neutron diffraction are used in a broad program of structure studies which can form the basis for understanding and interpreting the results of research investigations in a wide variety of scientific disciplines.

LABORATORY FOR CHEMICAL PHYSICS

Basic Responsibilities

The Laboratory for Chemical Physics carries out an interdisciplinary program of fundamental and applied research with especial emphasis on phenomena occurring at phase boundaries, i.e., the interfaces between solids and solids, solids and liquids, solids and gases, liquids and liquids, and liquids and gases. Currently, attention is being given to adhesion and adhesion promoters, wetting and spreading of liquids on solids including liquid metals and ceramics, surface electric properties of metals and plastics, interfacial phenomena in composite materials, the quantitative relation of dry film lubricants to shear strength and its pressure coefficient, the ability of insoluble monolayers to dampen capillary waves on liquids, the relation of interfacial properties to various aspects of blood clotting and bioadhesion.

RADIOLOGICAL AND ENVIRONMENTAL PROTECTION STAFF

Basic Responsibilities

The Radiological & Environmental Protection Staff is assigned the responsibility for radiological safety and the overall minimization of pollution from all sources at NRL and its field stations. The NRL radiological protection program has three primary purposes: (1) to assure that all operations using ionizing and microwave radiation are safe and in compliance with Federal Regulations; (2) to provide employees with instruments, instructions, and assistance to assure radiological safety in the performance of their duties; and (3) to conduct research in radiation dosimetry, instrumentation, and methodology. The environmental control responsibilities are to: (1) review programs to identify sources of pollution at NRL; (2) recommend preventative or corrective measures necessary to reduce or eliminate pollution; (3) monitor the air and water to determine compliance with pertinent Federal or Navy Rules and Regulations; and (4) conduct research in environmental control.

CHEMICAL LASER

FIRE SUPPRESSION

- PHYSICAL CHEMISTRY
- ORGANIC CHEMISTRY
- INORGANIC CHEMISTRY
- ELECTROCHEMISTRY
- SURFACE CHEMISTRY
- CHEMICAL DYNAMICS

CHEMICAL SYNTHESIS

ELECTRON SPECTROSCOPY FOR
CHEMICAL ANALYSIS (ESCA)

Basic Responsibilities

The Chemistry Division conducts a diversified research and development program in the general areas of physical, organic, inorganic and analytical chemistry. Specialized technological programs within these fields include polymeric materials (protective coatings, composites, drag reducing agents, adhesives, and high temperature lubricants), ceramics, advanced inorganic fluids, fuel technology and combustion, fire suppression, chemical lasers, electrochemical power sources, and atmosphere analysis and control (mainly in nuclear submarines).

Branches

Physical Chemistry

Applications of spectroscopic techniques
Kinetics of gas phase reactions
Chemical lasers and energy transfer
Thermal and oxidative degradation
Trace analysis

Organic Chemistry

Synthesis of unique polymers
Functional organic coatings
High strength composites
Photophysical processes in polymers
Gas phase organic reactions

Inorganic Chemistry

Submarine air purification
Solid state chemistry
Ceramic materials
Synthesis of novel inorganic compounds
Corrosion prevention

Electrochemistry

Fuel cells
Fundamental electrode reactions
Electrochemical power sources

Surface Chemistry

Lubricants
Surface properties of fibers
Adhesion and structural adhesives
Surface and solid kinetics
Drag reduction

Chemical Dynamics

Atmosphere analysis and control
Distillate fuels research
Autoxidation and combustion dynamics
Fire suppression
Personnel protection in fires

Key Personnel

A FERMI SURFACE MODEL FOR OSMIUM SUGGESTED BY THE BANG, STRILLING AND COVIELL TEST WITH THE EXPERIMENTAL DE HAAS-VAN ALPHEN RESULTS

FERMI SURFACE MODEL FOR OSMIUM

COPLANAR SLIP: S.C.G. IN Ti ALLOYS

Basic Responsibilities

The Metallurgy Division is concerned with basic and applied research in physical, mechanical, chemical, and structural aspects of metals. Metal physics activities center in the investigation of electronic transport properties in terms of quantum-mechanical principles. The mechanical studies are largely related to the attainment of quantitative analytical capabilities in the definition of plastic flow and fracture properties. The chemical interests involve electrochemical aspects of various forms of catastrophic corrosion, particularly the complex phenomenon of stress corrosion cracking. The metal structure studies cover a broad range of topics including strengthening mechanisms, role of defect structures, microscale separation events in fracture, transformation processes, and mechanisms of environmental effects. This broad range of activity evolves from a balance staff which includes materials scientists, physical metallurgists, physicists, chemists, and mechanical engineers. Important consultative services on subjects ranging from concept formulation to system development are provided to the Navy and other DOD activities.

Branches

Analysis and Microscopy

Microstructural characterization and crystal mechanics
Composition and phase analysis
Micromechanisms of crack growth

Metal Physics

Fermi surface studies of pure metals and alloys
Electronic, magnetic, and optical properties of metallic materials
Charged particle irradiation effects
Electronic, thermal and optical properties of liquid metals
Response of metallic systems to high rates of energy deposition

Transformations and Kinetics

Phase transformations, solidification, metallic crystal growth
Thermodynamics of lattice defects, crystal plasticity
Applications of holography to metallurgical studies
Preparation and processing of electronically active alloys

Strength of Metals

Characterization criteria
Fracture-safe design parameters
Role of processing for high strength metals
Macroscale and microscale aspects of metal separation processes
Corrosion science related to advanced alloys
Marine corrosion and cathodic protection

Reactor Materials

Environmental factors in neutron irradiation
Basic mechanisms of radiation damage
Spectral analyses and dosimetry
Characterization criteria for mechanical damage

Key Personnel

OF GLASS

- GLASS CHEMISTRY
- MATERIALS PREPARATION
- CRYSTAL PHYSICS
- OPTICAL MATERIALS
- MAGNETISM
- SOLID STATE APPLICATIONS
- SEMICONDUCTORS

Basic Responsibilities

The Solid State Division is concerned with basic and applied research in the physics of materials, principally solids, and with the interaction of matter with light and nuclear radiation. Its purposes are to increase understanding of the physical principles involved, to pursue applications of military and industrial problems, and to serve as a corps of experts in solids for the Laboratory specifically and the Navy generally. The research work of the Division is fairly comprehensive in magnetism, superconductivity, semiconductors, and insulators. Important work is also carried on in surface physics, structure and optical properties of glass, properties of materials at high magnetic fields, the effects of high pressures on solids, and radiation damage. Applications in solid state dosimeters, thin magnetic films, superconducting electronics, information storage systems, and infrared detectors are being pursued actively.

Branches and Facilities

Glass Chemistry

Glass research and materials
fabrication

Materials Preparation

Preparation and development of magnetic,
dielectric, optic and semiconducting
materials

Cryogenics and Superconductivity

High-pressure effects
Superconducting materials
Superconducting electronics

Optical Materials

Electronic properties of nonmetal crystals
and glasses
Radiation induced defects, color centers
Lattice dynamics

Magnetism

Electronic and nuclear paramagnetism
Spin-ordered magnetic phenomena
Rare earth magnetic materials
Magnetic properties of amorphous
materials

Solid State Applications

Environmental effects on semiconductor
and dielectric materials and devices
Semiconductor applications
IR light sources such as semiconductor
lasers

Semiconductors

Electronic energy levels and band structure

VAN DE GRAAFF

LINAC

CYCLOTRON

Basic Responsibilities

The Nuclear Sciences Division is engaged in a broad program of research and development in nuclear and atomic sciences. Included are: radiation damage studies, transient radiation effects in solid state devices, materials analysis by x-ray fluorescence and nuclear reactions, ion implantation to modify devices and materials, neutron beams for cancer therapy, radio-isotope production, and radiation instrumentation. The Division operates a 75 MeV sector focussing cyclotron, a 60 MeV electron linear accelerator, a 5 MV Van de Graaff, and several smaller accelerators and radiation sources. A strong theoretical and experimental research effort supports the above program.

Staff Activities

Consultant Staff

- Radiation dosimetry
- Electromagnetic pulse effects (EMP)
- Terrestrial and planetary radiation belts
- Radiation effects on satellite components
- Radiation curing of adhesives
- Radiations from nuclear power sources
- Radiation instrumentation

Branches

Cyclotron

- Charged particle nuclear reactions
- Nuclear structure
- Charged particle scattering
- Neutron beams for cancer therapy
- Ion-induced x-rays
- Radioisotope production
- Radiation damage

Theory

- Nuclear reactions
- Nuclear structure
- Coherent bremsstrahlung
- Electron scattering by nuclei
- Scattering theory
- High-intensity laser beam propagation
- Deposition of energy by charged particles

Linac

- Electron scattering
- Nuclear excitation
- Neutron capture reactions
- Transient radiation effects on electronics

Linac (continued)

- Radioactivation analysis
- Measurement of neutrons and high-energy x rays from pulsed sources

Van de Graaff

- Materials analysis by means of charged particle beams
- Implantation of ions into solids
- Radiation effects caused by high energy charged particle beams
- Crystal studies by means of particle channeling techniques
- Ion-induced x-rays

X-Ray Optics

- X-ray spectral measurements
- X-ray fluorescence analysis
- X-ray production by charged particles
- X-ray shielding
- Plasma diagnostics by x-ray measurements
- Metal alloy analysis by x rays

Space Science and Technology Area

The Naval Research Laboratory conducts basic and applied research in upper air physics, astronomy, and astrophysics to improve naval capabilities in communications, navigation, detection, surveillance, and other fields; the investigations are made by means of several radio telescopes and a wide variety of space probes. Both experimental and theoretical techniques are used to conduct plasma research, to understand more fully natural and man-made plasma phenomena, and to develop controlled thermonuclear power sources. The area is involved also in the study and application of advanced mathematical techniques and in the many approaches afforded by the computer sciences.

Associate Director of Research for Space Science and Technology

Dr. Herbert Rabin

Dr. Rabin was born in Milwaukee, Wisconsin, on November 14, 1928. He received a B.S. degree in physics from the University of Wisconsin in 1950, an M.S. degree in physics from the University of Illinois in 1951, and a Ph.D. degree in physics from the University of Maryland in 1959.

He has been employed at the Naval Research Laboratory since 1952, working in the fields of high-energy gamma ray and electron facilities, radiation dosimetry, solid state studies of lattice defects, and nonlinear optics and laser physics. In these research areas Dr. Rabin has authored or coauthored well over a hundred papers and conference presentations. In addition, Dr. Rabin holds five patents.

Prior to his present appointment Dr. Rabin held several supervisory positions at NRL, the most recent being Head, Quantum Optics Branch, Optical Sciences Division. He has taught courses in the Physics Department at George Washington University; he was a visiting scientist at the Technische Hochschule in Stuttgart, Germany; and he was a consultant to the school of Engineering of the University of Sao Paulo, Sao Carlos, Brazil, under sponsorship of the Pan American Union.

Dr. Rabin is a Fellow of the American Physical Society and holds membership in the Optical Society of America, the Philosophical Society of Washington, the American Association for the Advancement of Science, the American Institute of Aeronautics and Astronautics, and several honorary societies. He is also a corresponding member of the Brazilian Academy of Sciences. Dr. Rabin received the Navy Meritorious Civilian Service Award in 1969 and the E.O. Hulburt Annual Science Award for 1970.

LABORATORY FOR COSMIC RAY PHYSICS

Basic Responsibilities

The Laboratory for Cosmic Ray Physics conducts a program of fundamental investigations of cosmic radiation — its composition and spectra, its origin, its propagation through space, its interactions with particles and fields in the regions of space that it traverses, and its role in astrophysics. Solar energetic particles constitute another major area of research. The program is framed so as to be broadly responsive to the anticipated technical requirements of the Navy and the general research and development program of the Department of Defense.

SPACECRAFT TECHNOLOGY CENTER

Basic Responsibilities

The Spacecraft Technology Center is responsible for providing complete spacecraft systems for purposes of conducting research and development in the space environment. This involves a broad and complete spectrum of activities ranging from system concept formulation, preliminary and detailed design, prototype development through to complete flight systems. The Center maintains all of the necessary special facilities for aerospace type fabrication and environmental testing and the expertise which is generally required in the spacecraft system. The Center also maintains dedicated ground stations for the purpose of transmitting command/control signals to, and receiving and analyzing telemetered data from, those of its spacecraft which have been placed into orbit.

Basic Responsibilities

The Space Science Division conducts research, development, and tests in the fields of upper air physics, astronomy, and astrophysics. Satellites and rockets are used to obtain information on radiation from the sun and celestial sources, and to study the composition and behavior of the ionosphere. Radio telescopes are used for astronomical observations. Results are of importance to radio communications, to utilization of the space environment, and to the fundamental understanding of natural radiation phenomena.

Branches

Advanced Space Sensing Applications

Active and passive sensor development for remote sensing
Satellite radar altimetry
Remote sensing of ocean environment and surface properties
Remote sensing of arctic conditions
Determining volume of oil spills at sea

Upper Air Physics

Gamma-ray, x-ray, ultraviolet, and infrared astronomy
Aeronomy

- HIGH TEMPERATURE PHYSICS
- PLASMA DYNAMICS
- PLASMA APPLICATIONS
- SYSTEMS & ENGINEERING
- IMPACT VULNERABILITY

Basic Responsibilities

The Plasma Physics Division conducts both basic and applied experimental and theoretical research. Examples of effort underway include: fusion physics and the generation and containment of high temperature plasmas, directed toward eventual power sources, laser produced plasmas, laboratory astrophysics, collision-free shock waves, the behavior of the ionosphere as a partial plasma, electron beam experiments, and the production and effects of hypervelocity particles.

Branches

High Temperature Physics

Generation and diagnostics of high temperature plasmas
Experimental research of ultra short wavelength lasers
Experimental study of plasma chemistry
Experimental study of laser-matter interactions

Plasma Dynamics

Theoretical and numerical simulation studies of problems in nonlinear plasma dynamics
Global ionospheric modeling
Numerical simulation of super high density plasmas

Plasma Applications

Production of intense relativistic electron beams
Electron beam propagation and focussing
Interaction of high current relativistic electron beams with plasmas
Experimental research in high power exploding wires
Application of high current relativistic electron beams to microwave generation

Systems and Engineering

Technical support of major division experiments

Impact Vulnerability

Vulnerability mechanics
Hypervelocity kill mechanism
Hypervelocity impact mechanics

Key Personnel

Mathematics and Information Sciences Division

- RESEARCH COMPUTATION CENTER
- MATHEMATICS RESEARCH CENTER
- OPERATIONS RESEARCH BRANCH

RESEARCH
COMPUTATION
CENTER

CDC 3800 COMPUTER

Basic Responsibilities

The Mathematics and Information Sciences Division conducts research in mathematics and the information sciences to meet the short and long range needs of the Navy and the Department of Defense; assists in the solution of technical and operational/command-control problems of the Navy and DOD through the application of mathematics and the information sciences; and also operates and maintains a major computing facility to service NRL.

Branches

Research Computation

Central Computer Operation
Time sharing computer operation
Data translation services
Customer support services
Operating systems support
Applications programming
ADP logistics services

Operations Research

Image processing research
Radiative transfer
Potential theory applications
Signal analysis

Operations Research (continued)

Satellite trajectory studies
Space mission analysis
Military OR methods
Management techniques
Formula manipulation on computers

Mathematics Research

Ordinary differential equations
Approximation theory
Stability theory
Computer sciences
Numerical analysis
Optimization methods

TIMATION*

Space Systems Division

- SPACE TECHNOLOGY
- AEROSPACE SYSTEMS
- AEROSPACE APPLICATIONS
- SPACE METROLOGY

*150-FOOT
ANTENNA
SUGAR GROVE*

SOLID STATE FACILITY

Basic Responsibilities

The Space Systems Division is responsible for research and development leading to the design, fabrication, launch, operation, and support of space systems for the Navy. The application of space technology to the naval mission extends through all of the R&D spectrum, from concept formulation to launch techniques of the completed spacecraft and interface with boosters. Both active and passive sensor technology are developed for space use. The Division is also responsible for R&D in environmental problem areas which affect the operation and performance of these space vehicles and for sharing the results with other related activities.

Branches

Space Technology

Large parabolic antenna systems
Electromagnetic radiation observations
Special media propagation
Electromagnetic exosphere phenomena
National radio quiet zone

Aerospace Systems

Ocean surveillance
Electromagnetic scatter research
Propagation research

Aerospace Applications

Data technology and technique
Space systems engineering
Systems analysis

Oceanology Area

The Naval Research Laboratory conducts research at sea and in the laboratory in the fields of underwater acoustics, oceanography marine geophysics, atmospheric physics, and ocean engineering and technology. Subjects of investigation include antisubmarine warfare, acoustic propagation and scattering, ambient noise in the ocean, signal processing, marine and atmospheric pollution, instrumentation systems for deep ocean search and inspection, and methods of design and installation of structures and apparatus for use in the ocean. NRL also serves as a focal point in the Navy for standardization of underwater sound measurements, and it holds a major responsibility for research and development in undersea acoustic surveillance.

Associate Director of Research for Oceanology

Dr. Ralph R. Goodman

Dr. Goodman [REDACTED] He attended the University of Michigan, Ann Arbor, where in 1950 he received a B.S. degree in mathematics, in 1951 a B.S. in physics, in 1952 an M.S. in physics, and in 1958 a Ph.D. in physics.

He began his scientific career at the Navy Electronics Laboratory in 1958, joined the staff of Colorado State University in 1959 as Assistant Professor, and served as a consultant to the Applied Physics Group at the SACLANT ASW Research Center, La Spezia, Italy, from 1961 to 1963. He then returned to Colorado State University, where from 1963 to 1968 he served as Associate Professor and Professor of Physics and, during his last year there, as Acting Chairman of the Department of Physics. He came to NRL with the appointment of Associate Director of Research in September 1968.

Dr. Goodman's research interests are centered on acoustic propagation, scattering, and physical acoustics. He also maintains an active interest in solid state physics.

Dr. Goodman is a member of the American Physical Society, the Acoustical Society of America, the American Geophysical Union, the American Institute of Physics, Sigma Xi, Phi Kappa Phi, and Tau Beta Pi. He was also a member of the Board of Trustees of the Colorado State University Research Foundation and the NAS/NRC Committee on Undersea Warfare.

Dr. J.O. Elliott	Superintendent, Ocean Sciences Division (Acting)
Dr. J.P. Walsh	Superintendent, Ocean Technology Division

SHIPBOARD COMPUTING GROUP

Basic Responsibilities

The Shipboard Computing Group develops, operates, and maintains computer facilities on NRL research ships. The Group assists experimenters in the use of their measuring equipment and the utilization of the shipboard computer system in the automatic acquisition, reduction and processing of their data. The Group performs this work under the Associate Director of Research for Oceanology.

Acoustics Division

- LARGE APERTURE SYSTEMS
- PHYSICAL ACOUSTICS
- TRANSDUCER
- PROPAGATION
- SHALLOW WATER SURVEILLANCE

AMBIENT NOISE BUOY

RING TRANSDUCER ARRAY

Basic Responsibilities

The Acoustics Division has major responsibilities for basic and applied research and development in the Navy's undersea warfare programs. The spectrum of work covered in the program includes acoustic radiation and transduction, propagation and scattering, environmental prediction, surveillance system concepts, and system analysis. The Division conducts theoretical and experimental research programs in physical acoustics and ocean acoustics; it develops models of the interaction of acoustic energy with the ocean environment and with structures; it conducts experiments in the deep ocean, in acoustically shallow water and in the Arctic. The Division program is heavily oriented toward research and development in support of the undersea surveillance mission but also includes other missions. The Division is supported by an Engineering Staff in the conduct of at sea experiments aboard the USNS HAYES and often uses other ships and aircraft in multiplatform experiments. The Division interacts with research programs outside the Division in areas such as oceanography, deep ocean technology, systems analysis and Fleet operations.

Staff Activities

<u>System Engineering</u>	<u>Systems Analysis</u>	<u>Advanced Projects</u>
Support and ship facility	Systems studies	Advanced surveillance systems
Acoustic sources	Surveillance systems	Information processes for
Engineering research	planning and evaluation	underwater acoustics

Branches

<u>Shallow Water Surveillance</u>	<u>Large Aperture Systems</u>
Mode analysis	Active target detection and classification
Model the signal, noise and reverberation fields	Propagation, coherency, and wave front behavior
Source and receiving array configurations	Low frequency monostatic and bistatic reverberation studies
Signal design and processing requirements	Propagation models
<u>Physical Acoustics</u>	Natural and man-made noise
Ultrasonic investigation of liquids and amorphous solids	Microstructure
Reflection, diffraction, scattering by bodies	<u>Propagation</u>
Target strength modeling	Long-range propagation models
Light-sound interaction	Application of long-range low-frequency propagation
Bulk and interface wave properties	Scattering from ocean bottom, surface, and volume
<u>Transducer</u>	Arctic underwater acoustics
Basic radiation theory	Very low frequency propagation
Electroacoustic modeling	Acoustic fluctuations
Transducer physical models	
Calibration of large transducer arrays	
Acoustic array calculations	

Key Personnel

<u>Name</u>	<u>Title</u>
Dr. J.C. Munson	Superintendent

TANK FACILITY

LEESBURG FACILITY -
CALIBRATION BARGE

HOLOGRAM OF VIBRATING
TRANSDUCER DIAPHRAGM

Basic Responsibilities

The Underwater Sound Reference Division is a focal point in the Navy for standardization in the science and technology of underwater sound measurements. Its research and development program is aimed at expanding the state of the art and providing Navy in-house expertise. Reference calibration measurements in a large complex of specialized facilities and calibrated standard transducers are available to all naval activities and contractors in support of undersea warfare programs.

Research and Development Branches

Methods and Systems

Calibration theory and accuracy
Measurement methods
Digital and analog systems
Computerized data reduction
Signal analysis

Standards

Acoustic materials
Electroacoustic standards
Acoustic sources
Specialized electroacoustic transducers
Vibration analysis techniques
Standard loan services

Measurements

Standard calibration services
Sonar transducer test and evaluation

Ocean Sciences Division

- APPLIED OCEANOGRAPHY
- ATMOSPHERIC PHYSICS
- CHEMICAL OCEANOGRAPHY
- PHYSICAL OCEANOGRAPHY
- MARINE BIOLOGY & BIOCHEMISTRY
- NONACOUSTIC ASW

SEAWATER PROPERTIES

AIR-SEA INTERACTIONS

ATMOSPHERIC PHYSICS

Basic Responsibilities

The Ocean Sciences Division conducts basic and applied research and development in the ocean sciences. Included are studies of the physics, chemistry, and biology of the oceans and atmosphere directed toward an improved understanding and then use as the major operating environments of the Navy. Results lead ultimately to improvement in the design and effectiveness of naval equipment, materials, and systems.

Staff Activity

Nonacoustic ASW (R&D) Task Group

Branches

Applied Oceanography

Antisubmarine warfare
Hydrodynamics of submerged bodies
Radiometric characteristics of the ocean

Atmospheric Physics

Atmospheric dynamics
Cloud physics
Weather instrumentation
Fog studies

Chemical Oceanography

Physical and analytical chemistry of
seawater, dissolved gases, and marine
sediments

Physical Oceanography

Hydrodynamics and turbulence of the
oceans
Marine geophysics
Air-sea interactions

Marine Biology & Biochemistry

Biodegradation in the marine environment
Marine biochemistry
Biological oceanography
Bioluminescence

Key Personnel

- OCEAN MATERIALS CRITERIA
- OCEAN INSTRUMENTATION
- APPLIED MECHANICS
- SHOCK AND VIBRATION INFORMATION CENTER

LIBEC

VORTEX SHEDDING FROM A VIBRATING CYLINDER

UNDERWATER SHOCK TESTS

MIZAR

CABLE ARRAYS

Basic Responsibilities

The Ocean Technology Division researches, develops, and applied specialized equipment, instrumentation, and techniques for conducting ocean and ocean-floor operations, and it evolves operational technology for advanced systems. The division utilizes advanced materials and design technology for engineering optimization of required equipment. It also conducts research activities in select areas of ocean technology with coupling and support activities related to other ongoing research and development in these and other fields of interest. The DoD Shock and Vibration Information Center is included in the Division; this Center provides a single source for up-to-date information on shock and vibration for scientists and engineers. This Division, in conjunction with other Divisions of NRL and out-of-house agencies, brings the collective expertise to bear on crucial problems.

Staff Activity

S&V Information Center

Branches

Ocean Engineering

Research and development on ocean systems,
subsystems, and components
Systems engineering
Design
Conduct at-sea operations

Ocean Materials Criteria

Fracture mechanics and fracture strength
Plastic flowing
Compression failure mechanisms
Armor research and development
Deep submergence materials-structures
Missile component failure
Nondestructive testing

Applied Mechanics

Shipboard shock fundamentals
Shock protection for weapons systems
Methods for design against shock
Fracture mechanics design studies
Developmental studies of prototypes
Shock strength of materials
Hydromechanic studies

Ocean Instrumentation

Instrumentation analysis, research and
development
Sensors, detectors
Data and signal processing
Stress and kinematic quantities measurements

The Support Services Department

The Director of Support Services is a Navy Captain with appropriate training and experience; he reports to the Director of NRL. His primary responsibility is the supervision, coordination, and control of the administrative and service operations required in support of the work of the Research Department. Usually, he is the next senior officer to the Director and assumes the responsibilities of and acts for the Director in his absence.

The Director of Support Services is responsible for:

- guiding and coordinating the service divisions of the Laboratory (Engineering Services, Supply, Public Works, Technical Information, and Chesapeake Bay) and also his staff functions (Management Engineer and Patent Counsel) so that services rendered are adequate, prompt, accurate, and economical in the use of men and money.
- implementing, for the Director of NRL, the orders and instructions of higher authority in a manner appropriate to the research environment as manifested in the policies and the organization of the Laboratory.
- being familiar with the scientific program and for following the progress of the scientific efforts of the Laboratory in sufficient detail to ensure that administrative decisions are made which support the scientific program.
- assisting the Director of NRL in maintaining an overall plan of organization for the best direction and control of the Laboratory.
- keeping the Director of NRL advised of matters requiring his attention, decision, or other action; acting for the Director of NRL in the approval of usual or routine matters; for assisting the Director of NRL generally with administrative detail, correspondence, reports, and similar matters.
- formulating, amending, and issuing instructions, policy statements, and procedures approved by the Director of NRL.

The Director of Support Services keeps in constant touch with the Director of Research to ensure that the service units of the Laboratory are providing complete support to the scientific divisions. He coordinates with the Director of Research in the planning and carrying out of administrative actions affecting Research Department organization and personnel; and he maintains a close working relationship with the Chief Staff Officer and officers assigned to him to assure provision of support services in operations conducted by the Chief Staff Officer. He also has direct "line" authority over the heads of special staff and service divisions.

Director, Support Services

Captain James A. Bortner, USN

Captain Bortner [REDACTED] He has had formal education and Navy experience, both as an enlisted man and as a commissioned officer, in physics, mathematics, electronics, naval engineering, and management. He served four years of active enlisted duty with the Naval Reserve, including assignment to the Radio Material School at NRL during World War II.

He remained active with the Naval Reserve while a student at York Junior College and later at Bucknell University in Lewisburg, Pennsylvania. In 1949, he received a B.S. in physics and an M.S. in mathematics from Bucknell and was appointed to its mathematics faculty. He returned to active duty during the Korean conflict and was commissioned as an Engineering Duty Officer (LT/JG) upon graduation from the Officer Candidate School at Newport, Rhode Island, where he stood first in his class. Later he completed a postgraduate course in Naval Construction and Engineering at the Massachusetts Institute of Technology and two postgraduate courses in Management — one at the Naval Postgraduate School and one at the Defense Weapons Systems Management Center, Wright-Patterson AFB, Dayton, Ohio.

As an officer, he has served in key assignments with the Atlantic Reserve Fleet, the Boston Naval Shipyard, the Ship Repair Facility on Guam, M.I., the Pacific Fleet, and the U.S. Naval Academy. In the latter assignment he was Chairman of the Department of Electrical Engineering. Since 1968 he has been with the Naval Ship Systems Command serving in succession as Head of the Ship Communications Branch; Director of the Warfare Systems Division; and Deputy Project Manager, Tactical Electromagnetic Programs.

Captain Bortner is a member of Pi Mu Epsilon, Sigma Pi Sigma, the Society of Naval Architects and Marine Engineers, the American Society of Naval Engineers, and the Armed Forces Communications and Electronics Association.

OFFICE OF PATENT COUNSEL

Basic Responsibilities

The Office of Patent Counsel provides services concerning inventions, patents, trademarks, copyrights, and other related matters. Patent applications are prepared, filed, and prosecuted on NRL inventions of significance to the Government. The Patent Counsel serves as consultant and adviser on patent and data clauses in R&D and procurement contracts. Assistance is provided the Research Department through state-of-the-art searches in the patent literature pertinent to particular research problems.

Supply Division

CDR J. R. Webb, USN

- STAFF SERVICES
- PROCUREMENT
- RECEIPT CONTROL
- MATERIAL
- TECHNICAL

Basic Responsibilities

The Supply Division provides service functions to the Laboratory and its field activities, including the operation of Supply issue stores, procurement of equipment, material, and contractual services; receipt, inspection and delivery of material and equipment; storage of inactive laboratory equipment; packing, shipping, and traffic management; and survey and disposal of excess and unusable property.

In addition, Supply offers technical and counseling services to the Research Departments in the development of specifications for a complete procurement package; consultation as needed in the handling of claims against the Laboratory, guidance in the performance stages of contractual services, also transportation and storage problems.

During FY 1973, the Supply Division occupied 190,321 sq. ft. of building space; its stores (six retail and one bulk warehouse) inventory averaged \$723,989.00; stores issues totalled \$2,113,781.00; disposals totalled \$4,125,068.00; and the Procurement Branch processed 40,375 procurement documents totaling \$35,431,756.00 on the open-market with an additional 10,148 documents totaling \$57,097,738.00 to other Government organizations for a grand total of 40,523 documents totaling \$92,529,494.00.

Chesapeake Bay Division

CDR J. M. Fitts, USN

Basic Responsibilities

The Chesapeake Bay Division provides and maintains facilities and services for test, development and evaluation of radar, radio, and fire control equipment. It also services and supports all research projects conducted at the Chesapeake Beach and Tilghman Island complexes of NRL.

The Physical Plant

Located in a relatively clear area away from any congestion or industrial interference, the main site, at Chesapeake Beach, covers 174.9 acres containing 200 structures of various size and construction, 6 of which are major laboratory buildings. There is over 200 ft of usable dock space with a water depth of 4 to 7 ft, located 2 miles north of the main site. Off-site facilities include the Tilghman Island Facility, located directly across the Bay from CBD at a distance of about 10 miles; the Theodolite House, at North Beach; and the Off-Shore Platform, approximately 2 miles southeast of CBD in the Bay.

Research watercraft available at CBD include one 60-ft catamaran, one 45-ft modified aviation rescue boat, and one 36-ft motor boat. These are used in support of research projects and for transportation between off-site facilities. Housing includes 24 public quarters.

Award in the Physical Sciences of the Washington Academy of Sciences	4
Award of Merit of the American Society for Testing and Materials	1
Brazilian Legion of Naval Merit	1
Burgess Memorial Award of the American Society for Metals	2
Burgess Memorial Lecture of the American Society for Metals (Washington Section)	1
Burgess Prize Award of the American Society for Metals	2
Charles B. Dudley Medal of the American Society for Testing Materials	4
District Meritorious Certificate Award of the American Welding Society	1
Dryden Research Award of the American Institute of Aeronautics and Astronautics	1
E. Edward Pendray Award of the American Rocket Society	1
Eddington Medal of the Royal Astronomical Society (Great Britain)	2
Engineering Science Award of the Washington Academy of Sciences	2
Frank Booth Award — International Power Sources Symposium	1
Frederic Ives Award of the Optical Society of America	2
George Kimball Burgess Memorial Award	1
Gold Medal Award of the American Society of Naval Engineers	1
Harry Diamond Award of the Institute of Radio Engineers	4
Henry Draper Medal of the National Academy of Sciences	1
Hillebrand Prize of the American Chemical Society	3
James H. Wyld Memorial Award of the American Rocket Society	1
John Adam Fleming Award by the American Geophysical Union of the National Academy of Sciences — National Research Council	1
John A. Penton Gold Medal of the American Foundrymen's Society	1
Joseph S. Seaman Gold Medal Award of the American Foundrymen's Society	1
Kendall Company Award of the American Chemical Society	1

<u>Non-Government Awards (Continued)</u>	<u>Number</u>
Kratel Award of the Eurocontamination Foundation	1
Janssen Medal of the French Photographic Society	1
John Scott Medal of the City of Philadelphia	1
M. Barry Carlton Award Institute of Electrical & Electronics Engineers	1
Marcus A. Grossman Award — American Society of Metals	2
Mayo D. Hersey Award of the American Society of Mechanical Engineers	1
Medal of Honor Award of the Institute of Radio Engineers	2
Morris Liebman Memorial Prize of the Institute of Radio Engineers	1
National Capital Award of the D.C. Council of Engineering and Architectural Societies	3
National Civil Service League Career Service Award	1
National Award of the American Society of Lubrication Engineers	1
Notre Dame Centennial Award	2
Outstanding Americans Foundation Award	1
Patrons Award of the Institute of Radio Engineers	2
Pittsburgh Spectroscopy Award of the Spectroscopy Society of Pittsburgh	1
Professional Achievement Award of the D.C. Council of Engineering and Architectural Societies	1
Progress Award of the Photographic Society of America	1
Pure Science Award of the Scientific Research Society of America	22
Reliability and Quality Control Award of the Radio Engineers Professional Group	2
Rockefeller Public Service Award	1
Sam Tour Award	2
Service Award of the Chemical Society of Washington	1
Service to Mankind Award of the Washington Sertoma Award	1
Society of Technical Writers & Publishers — Washington, D.C. Chapter	1
Society of Women Engineers Achievement Award	1
Space Science Award of the American Institute of Aeronautics & Astronautics	1
Stuart Ballantine Medal of the Franklin Institute of Pennsylvania	2
Trent — Credo Award — Acoustical Society of America	1
Victor K. LaMer Award for Outstanding Graduate Research in Colloid & Surface Chemistry	1
William Blum Award of the Washington-Baltimore Electrochemical Society	3
William Hunt Eisenman Medal	1

Location of NRL

[illegible]

Listing of NRL Sites and Facilities

January 1, 1974

<u>Station and Location</u>	<u>Acreage</u>			<u>Class I & II Plant Account</u>	
	<u>Fee Title</u>	<u>Easement or Purchase</u>	<u>Permit or Lease</u>	<u>Value</u>	<u>No. of Buildings and Structures</u>
Naval Research Laboratory, Washington, D.C.	129.23		1.29	59,892,776	141
Cyclotron Building Site					
Bolling Air Force Base, D.C.			5.24	3,611,297	1
Radio Research Site					
Coast Guard Radio Station, Alexandria, Va.			55.40		
Radio Test Area, Hybla Valley, Va.	1,262.46			60,000	
A&A Test Site, Shenandoah National Park, Luray, Va.			NA		
Coast Guard Station, Va. Beach			NA		
NRL Flight Support Detachment, Naval Air Station, Patuxent River, Md.			NA		
Chesapeake Bay Division, Chesapeake Beach, Md.	174.90			10,386,782	178
Multiple Research Site, Tilghman Island, Md.	2.00			110,662	9
Dock Facility, Chesapeake Bay, Md.			0.60	18,533	5
Theodolite Station, North Beach, Md.			0.29	800	1
Tunnel under Maryland State Road 261			NA		
Optics Research Platform in the Chesapeake Bay, Md.			0.23	1,500	2
Research Platform, Chesapeake Bay Bridge, Md.				21,400	1
2 Foghorn Platforms, Chesapeake Bay Bridge, Md.			NA		
Research Gondola, Chesapeake Bay Bridge, Md.			NA		
NRL Waldorf Annex, Md.	23.94	35.16		1,291,301	35
Radio Astronomy Observatory, Maryland Point, Md.	24.30		197.88	247,002	12
Radio Antenna Range, USAF Receiver Site, Brandywine, Md.			22.98		
Radio Research Site, Stump Neck Annex, Naval Ordnance Station, Indian Head, Md.			5.90		
Free Space Antenna Range, Pomonkey, Md.	14.12	28.40		736,508	12
Navy Radio Research Station, Sugar Grove, West Va.				74,091	2
Satellite Tracking Facility, Blossom Point, Md.			23.00		
Edgewood Arsenal, Md.			NA		
*Satellite Tracking Station, Raymondville, Texas	171.55	2.85		1,206,770	16
Underwater Sound Reference Division, Orlando, Fla.	10.46			1,242,389	32
USRD, Leesburg Facility, Bugg Spring, Fla.			6.92	167,067	7
Marine Corrosion Laboratory, Key West, Fla.			NA		
*Underwater Track Facility					
Argus Island (near Bermuda)			NA		
Research Site, Wayne County, West Va.			NA		
Berthing for USNS HAYES and MIZAR, GSA Pier, Alexandria, Va.			NA		
Totals:	1,812.96	66.41	319.73	77,550,969	

*Now being screened for disposal

Location of Principal Field Stations

Another station is located at Sugar Grove, W. Va. The Underwater Sound Reference Division is located at Orlando, Fla.

Research Platforms

Aircraft

1. The S2D (BUNO 149240) contains specially installed equipment and wing mounted pods for cloud physics research. It is also used in chaff research and for short-term experiments compatible with space limitations of the aircraft.
2. The EC-121K (BUNO 128324) is used for wave propagation studies in the four-frequency radar system.
3. The EC-121K (BUNO 135753) is used for research in cloud physics, ECM, low-frequency radar, and various projects requiring minimal aircraft conversion.
4. The EC-121K (BUNO 141297) is used mainly by the Tactical Electronic Warfare Division to experiment, evaluate, and improve Fleet electronic warfare capabilities.
5. The P3A (BUNO 149670) is primarily used for airborne radiometric studies and to a lesser degree for cloud physics and acoustic research.

Available Ships

1. USNS MIZAR (T-AGOR-11) Under operational control of
MSCLANT. Scheduled by NRL.
2. USNS HAYES (T-AGOR-16)
(Will use the inherent catamaran design to accomplish oceanographic and acoustics research at sea)
3. Fleet units are regularly scheduled for NRL in support of CNO assigned projects by OPTEVFOR.

DIRECTORY OF KEY OFFICES AND PERSONNEL

<u>Code</u>	<u>Office and Incumbent</u>	<u>Ext.</u>
OFFICE OF DIRECTOR		
1000	Director	CAPT J T Geary 73403
1001	Executive Assistant	Mr S L Cohen 73231
1003	EEO Coordinator	Mr W H Webster 72486
1005	Public Affairs Officer	Mr J E Sullivan* 72541
1200	Chief Staff Officer	CAPT J M Brozena 73621
1226	Security Section	CDR L R Marshall* 73711
1300	Comptroller	Mr R Showman* 73405
1800	Director of Civ. Pers.	Mr F D Wallace 73421
1810	Employment	Mr D J Blome 73030

SUPPORT SERVICES DEPARTMENT

2000	Director of Support Services	CAPT J A Bortner 72879
2300	Engineering Services Officer	CDR H D Swanson, Jr 72300
2400	Supply Officer	CDR J R Webb 73446
2500	Public Works Officer	CDR A E Church, Jr 73371
2600	Head Tech. Info. Div.	Mr W H Ramey 73388
2700	Chesapeake Bay Div. Officer	CDR J M Fitts
(CBD Interdepartmental Dial System Tel. No. is 1220-201, Outside Tel. No. is Area Code 301-257-2111)		

RESEARCH DEPARTMENT

4000	Director of Research	Dr A Berman 73301
4010	Research Program Office	Mr A Hollings 73081
5000	Assoc. Director of Research	
	for Electronics	Dr J L Allen 73324
5200	Electronics Div. Supt.	Mr A Brodzinsky 73525
5300	Radar Div. Supt.	Mr J H Dunn* 72936
5400	Commun. Science Div. Supt.	Dr B Wald 72903
5500	Optical Sciences Div. Supt.	Dr W R Sooy 73171
5700	Tactical Elect. Warfare Div. Supt.	Mr L A Cosby 72191
6000	Assoc. Director of Research for	
	Materials and General Sciences	Dr J H Schulman 73566
6030	Lab for Structure of Matter	Dr J Karle 72665
6050	Lab for Chemical Physics	Dr W A Zisman 73546
6100	Chemistry Div. Supt.	Dr R E Kagarise 73026
6300	Metallurgy Div. Supt.	Mr W S Pellini 72926
6400	Solid State Div. Supt.	Dr C C Klick 73351
6600	Nuclear Sciences Div. Supt.	Dr J McElhinney 72931
7000	Assoc. Director of Research for	
	Space Science and Technology	Dr H Rabin 72964
7020	Lab for Cosmic Ray Physics	Dr M M Shapiro 72965
7030	Advanced Projects Office Mgr.	Mr R D Mayo 72043
7040	Spacecraft Technology Center	Mr P G Wilhelm 72073
7100	Space Science Div. Supt.	Dr H Friedman 73363
7700	Plasma Physics Div. Supt.	Dr R Shanny 72723
7800	Math. and Info. Sciences	
	Div. Supt.	Dr P B Richards 72044
7900	Space Systems Div. Supt.	Mr N W Guinard* 73468
8000	Assoc. Director of Research	
	for Oceanology	Dr R R Goodman 73294
8100	Acoustics Div. Supt.	Dr J C Munson 73482
8200	Underwater Sound Ref. Div. Supt.	Mr R J Bobber
(Area Code 305-859-5120 or via AUTOVON NTC 791-4111)		
8300	Ocean Sciences Div. Supt.	Dr J O Elliot 72974
8400	Ocean Technology Div. Supt.	Dr J P Walsh 73314
