# **2012 WORKPLACE AND GENDER RELATIONS SURVEY OF RESERVE COMPONENT MEMBERS: TABULATIONS OF RESPONSES**

## ***Introduction to the Survey***

The *Human Resources Strategic Assessment Program* (HRSAP), Defense Manpower Data Center (DMDC), conducts both Web-based and paper-and-pen surveys to support the personnel information needs of the Under Secretary of Defense for Personnel and Readiness (USD[P&R]). These surveys assess the attitudes and opinions of the entire Department of Defense (DoD) community on a wide range of personnel issues. Human Relations Surveys are in-depth studies of topics and populations, often requiring both paper-and-pen surveys and Web-based surveys.

This report contains tabulations of responses from the *2012 Workplace and Gender Relations Survey of Reserve Component Members* (2012 WGRR) conducted April 23 to June 28, 2012. This introduction (1) summarizes the survey content, (2) defines the total population surveyed and the subgroups used in tabulations of responses, (3) summarizes the survey methodology,<sup>1</sup> and (4) provides details on how to use the tabulations. The tabulations and a copy of the survey items follow this introduction.<sup>2</sup>

## ***Survey Content***

The 2012 WGRR continues a line of military sexual harassment research begun in 1988. DMDC conducted Joint Service surveys of active duty members on gender issues in 1988, 1995, 2002, 2006, and 2010. DMDC expanded this line of research to the Reserve/National Guard in 2004 and 2008 and to the Service Academies in 2005. Since 1995, the questionnaire was designed to estimate both the level of sexual harassment in the Services and provide new information on a variety of consequences of harassment (Bastian, Lancaster, & Reist, 1996). In 2006, the questionnaire was significantly revised to collect parallel information on sexual assault in the Services. The 2012 WGRR is the third DMDC Reserve component survey of gender relations issues and was modeled on previous DMDC surveys of Reserve component and active duty members, specifically the *2008 Workplace and Gender Relations Survey of Reserve Component Members* and the *2010 Workplace and Gender Relations Survey of Active Duty Members*. The current survey was subdivided into the following 17 topic areas:

1. *Background Information*—Reserve component member status, gender, paygrade, race/ethnicity, education, marital status, children or other legal dependents, and prior active duty service.
2. *Satisfaction and Retention Intention*—Spouse/significant other/family support for participation, years of service, retention intention, satisfaction with aspects of the National Guard/Reserve, overall satisfaction with military life, and willingness to recommend military service.

---

<sup>1</sup> Details on survey methodology are reported in DMDC (2012b).

<sup>2</sup> Refer to DMDC (2012a) to view a screen-shot version of the survey as it appeared on the Web.

3. *Tempo*—Number of days a member spent in compensated National Guard/Reserve status, time away from permanent duty station, time away compared to expectations, and impact of time away on military intentions.
4. *Activation/Deployment Status*—Voluntary status, duration, and location within the past 12 months as well as current status and deployments to a combat zone.<sup>3</sup>

10. *Unwanted Sexual Contact*—Experiences of sexual contact against members' will or without consent in the 12 months prior to the survey and frequency of experiences.
11. *One Situation of Unwanted Sexual Contact*—Specific behaviors experienced during one situation with the greatest effect, where and when the situation occurred, characteristics of offenders, involvement of alcohol/drugs, experiences of sexual harassment or stalking by offender, to whom the situation was reported, type of report made (if applicable), members' satisfaction with the reporting process (if applicable), reasons for reporting (if applicable), when situation was reported (if applicable), actions taken and consequences of reporting (if applicable), reasons for not reporting (if applicable), and whether the respondent would make the same reporting decision.

<sup>3</sup> Information on deployments is not included in the tabulation volume because of an error in coding.

12. *Personnel Policy and Practices*—Leadership’s efforts to stop sexual harassment and views on current gender-related policies and leadership practices.
13. *Sexual Harassment Training*—Military training received in past 12 months and perceived effectiveness of training in sexual harassment prevention and reduction.

17. *How Are We Doing?*—Perceptions of gender relations within the military and in the nation and how they have changed over the past four years.

### ***Population and Reporting Categories***

The target population for the 2012 WGRR consisted of members from the Selected Reserve in Reserve Unit, Active Guard/Reserve (AGR/FTS/AR;<sup>4</sup> Title 10 and Title 32), or Individual Mobilization Augmentee (IMA), programs from the Army National Guard (ARNG), U.S. Army Reserve (USAR), U.S. Navy Reserve (USNR), U.S. Marine Corps Reserve (USMCR), Air National Guard (ANG), U.S. Air Force Reserve (USAFR), and U.S. Coast Guard Reserve (USCGR), who had at least 6 months of service at the time the questionnaire was first fielded, and were below flag rank.

Survey results are presented for the total DoD population<sup>5</sup> and by a variety of reporting categories. To form the reporting categories for the tabulations, respondents are classified primarily by their responses to survey items. If the self-reported data are missing, then DMDC’s *Reserve Component Common Personnel Data System (RCCPDS)* is used to impute the subgroup classification at the time of sampling. Survey results are tabulated by component, paygrade, gender, Reserve program, activated/deployed, and race/ethnicity. Definitions for reporting categories follow:

- *Total DoD*—This category includes results at the overall level for all DoD Reserve components.
- *Reserve Component*—The categories include Army National Guard (ARNG), U.S. Army Reserve (USAR), U.S. Navy Reserve (USNR), U.S.

---

<sup>4</sup> Names for this program vary among Reserve components: AGR/FTS/AR is a combination of Active Guard/Reserve (AGR), Full-Time Support (FTS), and Active Reserve (AR).

<sup>5</sup> Total DoD reflects the responses from Army National Guard, U.S. Army Reserve, U.S. Navy Reserve, U.S. Marine Corps Reserve, Air National Guard, and U.S. Air Force Reserve members. Responses from U.S. Coast Guard Reserve members are tabulated separately, but are included in this report.

Marine Corps Reserve (*USMCR*), Air National Guard (*ANG*), and U.S. Air Force Reserve (*USAFR*).

- *Paygrade*—The *Enlisted* subgroup includes all enlisted paygrades (E1-E9). The *Enlisted* subgroup is broken into: junior enlisted members (*E1 – E4*) and senior enlisted members (*E5 – E9*). The *Officers* subgroup includes Warrant Officers (*W1 – W5*) and commissioned officers (*O1 – O3* and *O4 – O6*).
- *Gender*—The categories include *Females* and *Males* overall and gender broken into the following categories: paygrade, Reserve program, race/ethnicity, and component by paygrade.
- *Reserve Program*—*AGR/FTS/AR* is comprised of members in full-time service from all DoD Reserve components. *Reserve Unit* is comprised of members from each DoD Reserve component who attend weekend drills with National Guard or Reserve units. Reserve unit members from the ARNG, USAR, ANG, and USAFR can also be categorized as *Military Technician*. Military Technicians are tabulated in the *Military Technician* category and in the *Reserve Unit* category. *IMA* is comprised of Individual Mobilization Augmentees from the USAR, USNR, USMCR, and the USAFR. With the exception of self-report data for Military Technicians, respondents are categorized using personnel record data only.
- *Activated/Deployed*—The categories *Not Activated Past 12 Months* and *Activated Past 12 Months* indicate whether Reserve component members reported having been activated during the 12 months prior to survey response. Record data are used to create the categories *Not Deployed Past 12 Months* and *Deployed Past 12 Months*. The category *Not Deployed Past 12 Months* indicates that the respondent was not deployed in the 12 months preceding the survey in support of the Global War on Terrorism (GWOT), which would include Operation Iraqi Freedom, Operation Enduring Freedom, and Operation New Dawn. *Deployed Past 12 Months* indicates the member had been deployed in the 12 months preceding the survey in support of the GWOT.
- *Race/Ethnicity*—Respondents are classified based on self-reported categories consistent with requirements of the *Standards for Maintaining, Collecting, and Presenting Federal Data on Race and Ethnicity* (1997). *Total Minority* includes all persons marking one or more of the races other than White and/or marking that they are Spanish/Hispanic/Latino. *Non-Hispanic Black* includes persons marking only Black or African American and not reporting being Spanish/Hispanic/Latino. *Hispanic* includes anyone marking that they are Spanish/Hispanic/Latino, regardless of how they answered the question on race.
- *USCGR*—This category includes all USCGR members and is further broken down into: paygrade and gender by paygrade.

### ***Survey Methodology***

The survey administration process began on April 6, 2012, with the mailout of notification letters to sample members. The notification letter explained why the survey was being conducted, how the survey information would be used, and why participation was important. Throughout the administration period, additional e-mail and postal reminders were sent to encourage survey participation. The survey was administered via the Web. Data were collected between April 23 and June 28, 2012.

Single-stage, nonproportional stratified random sampling<sup>6</sup> procedures were used. The sample consisted of 75,436 individuals (including 3,666 USCGR members) drawn from the sample frame constructed from DMDC's *RCCPDS*. Members of the sample became ineligible if they indicated in the survey or by other contact (e.g., e-mails or telephone calls to the data collection contractor) that they were not in a Reserve component as of the first day of the survey, April 23, 2012 (0.63% of sample).

Completed surveys (defined as 50% or more of the survey questions asked of all participants are answered, including at least one valid response on the critical question, Q56) were received from 15,249 eligible respondents (13,868 DoD and 1,381 USCGR). The overall weighted response rate for eligibles, corrected for nonproportional sampling, was 23% (23% for DoD and 37% for USCGR).

Data were weighted using the industry standard three-stage process. This form of weighting produces survey estimates of population totals, proportions, and means (as well as other statistics) that are representative of their respective populations. Unweighted survey data, in contrast, are likely to produce biased estimates of population statistics. The three-stage process of weighting consists of the following steps:

- *Adjustment for selection probability*—Probability samples such as the sample for this survey are selected from lists and each member of the list has a known nonzero probability of selection. For example, if a list contained 10,000 members in a demographic subgroup and the desired sample size for the subgroup was 1,000, one in every tenth member of the list would be selected. During weighting, this selection probability (1/10) is taken into account. The base, or first weight, used to adjust the sample is the reciprocal of the selection probability. In this example, the adjustment for selection probability (base weight) is 10 for members of this subgroup.
- *Adjustments for nonresponse*—Some sampled members do not respond to the survey. Continuing the previous example, suppose only half of sample members, 500, completed and returned a survey. Because the unweighted sample size would only be 500, weights are needed to project the sample up to the subgroup population total (10,000). In this case, the base-weighted respondents would sum to only 5,000 weighted respondents. To adjust for

---

<sup>6</sup> In stratified random sampling, all members of a population are categorized into homogeneous groups. For example, members might be grouped by gender and component (e.g., all male ARNG personnel in one group, all female ARNG personnel in another). Members are chosen at random within each group. Small groups are oversampled in comparison to their proportion of the population so there will be enough responses from small groups to analyze. Weights are used so that groups are correctly represented in the analyses.

nonresponse, the base weights are multiplied by the reciprocal of the nonresponse rate. In this example, the base weight (10) is multiplied by the reciprocal of the nonresponse rate (2) to create a new weight of 20. The weighted sample sums to the subgroup population total of 10,000.

- *Adjustment to known population values*—The first of the two previous weighting adjustments are applied according to the demographic groupings used in designing the subgroups for the sample. The second is based on population characteristics that are known to be related to whether a sample person responds to the survey. Because the sample design and adjustments for nonresponse cannot take into account all demographic differences related to who responds to a survey and how they respond, auxiliary information is used to increase the precision of survey estimates. For this reason a final weighting adjustment is computed that reproduces population totals for important demographic groupings related to who responds to a survey and how they might answer the survey. Suppose in our example the population for the subgroup was 8,500 men and 1,500 women but the nonresponse-adjusted weighted estimates from the respondents was 7,000 men and 3,000 women. To dampen this possible bias and reproduce known population totals, the weights would be adjusted by 1.21 for men and 0.5 for women so that the final weights for men and women would be 24.3 and 10 which would give unbiased estimates of the total and of women and men in the subgroup.

Table 1 (pages 8-9) shows the number of respondents and the portion of respondents in each reporting category. Also shown are the estimated number of members and the portion of total members in each reporting category. Differences in the percentages of respondents and population for the reporting categories reflect differences in the number sampled, as well as differences in response rates.

### ***Tabulation Procedures***

Tabulations<sup>7</sup> for each question from the survey are shown on a set of facing pages. The text of the questions and response options are shown at the top of the even-numbered pages with only the question repeated on the odd-numbered pages. To compress the width of columns in the tables, the response options are shown with a number or letter. The number or letter is then used as the column heading for the responses. The central feature of the tabulations is the percentage of members choosing the response options indicated by the column heading. Within a set of response options, percentages may not add to 100% due to rounding error.

Where an item can be presented as an average, that average is shown as a number estimate and in a bar chart. The averages can be quickly scanned for reporting groups differing from other similarly defined groups. Where a true response continuum is available (e.g., number of times trained), the mean of that continuum is presented; in other cases, the responses are averages of the numeric scales presented with the response options. Where there is a simple binomial response (e.g., yes/no), only one percentage is presented. In this case, the bar chart represents that percentage. When multi-level response scales (e.g., “yes,” “no,” “don’t know”) can be

---

<sup>7</sup> Details of data editing and preparation are provided by DMDC (2012a).

dichotomized, the bar chart represents either the sum of the percentages in multiple columns (e.g., “no” and “don’t know” summed) or the percentage in one column (e.g., “yes”).

On each page of tabulations, the first column lists the reporting group shown in that row. The second column, *Percent Responding*, lists the portion of the reporting group represented in the estimates in that row. In most cases, if this percentage is not 100, it reflects item nonresponse, and the table note indicates that “Percent responding are Reserve component members who answered the question.”

Not all questions will apply to every respondent. Where possible, the survey is programmed to skip respondents over questions that do not apply to them. For example, Q11 (In your opinion, how does your spouse/significant other view your participation in the National Guard/Reserve?) does not apply to those who indicated they were not married or separated in Q7 or they did not have a significant other in Q8. The footnote for this question indicates, “Percent responding are Reserve members who answered the question and who were married or separated, or had a significant other (Q7/Q8).”

Because the survey contains open-ended questions, not all responses are tabulated. For example, Q56s asked members to specify other unwanted gender-related behaviors they experienced during the 12 months prior to taking the survey. Since it is not feasible to tabulate the wide range of responses, the open-ended responses are not tabulated.

### ***Combining Information From Multiple Items***

Tabulations in this volume generally present data for individual survey questions. There are four types of exceptions. The first type of exception is where the results for multiple items are presented on a single set of pages.

- In Q111a-d, members were asked whether they were aware of the “My Strength is for Defending” campaign, the Sexual Assault Prevention Web site ([www.myduty.mil](http://www.myduty.mil)), their installation’s Sexual Assault Awareness Month programs, and the Safe Helpline. The tabulations for this question show percentages who answered Yes to Q111a, Q111b, Q111c, and Q111d, respectively, on one set of pages, to allow comparison among the percentages.

The second exception pertains to combining response options from a single item to present an aggregate number.

- In Q111, the bar chart shows the total percentage of those who indicated they were aware of any of the sexual assault prevention awareness resources (e.g., the campaign, the Web site, their installation’s programs, and the Safe Helpline).

The third exception is where members can provide multiple answers to a single question (e.g., race).

- In Q5, members were asked to mark one or more races. The tabulations show the percentage who responded that they are *White*, *Black*, *American Indian/Alaska Native*, *Asian*, and/or *Native Hawaiian/Other Pacific Islander*. Respondents who indicated more than one race are also shown in the percentage of *More than one race*. For example, if a respondent indicated they were *Asian* and *White*, they were counted in the percentage as *Asian*, *White*, and *More than one race*.

The fourth exception pertains to constructed composite measures (e.g., scales, indices and summary variables) described below. The composite measures included on the 2012 WGRR have been used on the:

- *2005 Workplace and Equal Opportunity Survey of Active Duty Members (2005 WEOA)*
- *2006 Workplace and Gender Relations Survey of Active Duty Members (2006 WGRA)*
- *2007 Workplace and Equal Opportunity Survey of Reserve Component Members (2007 WEOR)*
- *2008 Workplace and Gender Relations Survey of Reserve Component Members (2008 WGRR)*
- *2009 Workplace and Equal Opportunity Survey of Active Duty Members (2009 WEOA)*
- *2010 Workplace and Gender Relations Survey of Active Duty Members (2010 WGRA)*
- *2011 Workplace and Equal Opportunity Survey of Reserve Component Members (2011 WEOR)*

For details of the psychometric analyses used to confirm the properties of the measures and a more detailed discussion of the creation of composite measures, please see Ormerod et al. (2010).

Individual items in each measure are presented first and followed by tabulation pages showing composite measure results. Where applicable, Cronbach's coefficient alpha, a measure of scale reliability, is provided for the scale overall and by gender in the table notes.

- *Supervisor Satisfaction*: The composite measure includes survey items on members' agreement that their supervisor can be trusted, treat all assigned

people fairly, have very little conflict with people who report to them, evaluate performance fairly, make work assignments fairly, and give satisfactory direction (Q37). Scale ranges from 1-5. Higher scores on this measure indicate members more strongly agreed with positive statements about their supervisors (i.e., were more satisfied).<sup>8</sup>

- *Coworker Satisfaction*: The composite measure includes survey items on members' agreement with statements about the amount of conflict among coworkers, coworker work efforts, work group compatibility, helpfulness of coworkers, and relationships with coworkers (Q40). Scale ranges from 1-5. Higher scores on this measure indicate members more strongly agreed with positive statements about their coworkers (i.e., were more satisfied).<sup>9</sup>
- *Work Satisfaction*: The composite measure includes survey items on sense of pride, use of skills, work enjoyment, and the opportunity to acquire valuable skills (Q41a-d). Scale ranges from 1-5. Higher scores on this measure indicate members strongly agreed with positive statements about their work.<sup>10</sup>
- *Unit Cohesion*: The composite measure includes survey items pertaining to affective ties within a small group that sustain commitment to their peers, their unit, and their mission (Q45). Cohesiveness is a group property and can be viewed as a continuous rather than discrete variable, as degree of cohesiveness varies between groups. Scale ranges from 1-5. Higher scores on this measure indicate greater perceived unit cohesion.<sup>11</sup>
- *Workplace Hostility*: The composite measure includes survey items on the degree to which coworkers or supervisors act in an angry or hostile manner toward them (Q46). Examples include intentionally interfering with other's work performance, taking credit for other's work or ideas, and using insults, sarcasm, or gestures to humiliate others. Response options range from 1 (never) to 5 (very often). Higher scores on this measure indicate members more frequently perceived hostile behaviors in their workplace.<sup>12</sup>
- *General Health*: The General Health scale is designed to provide a self-assessment of overall physical well-being. The four scale items (Q47a-d) were taken from the general health perceptions subscale on the Short-Form Health Survey (SF-36) of the Medical Outcomes Study questionnaire (Ware & Sherborne, 1992). For the purposes of this report, Q47b and c were

reverse-coded. Higher scores on this measure indicate members have more positive perceptions of their health.<sup>13</sup>

- *Perceived Stress*: To evaluate personal stress levels, members were asked about their emotional experiences/reactions in the month prior to taking the survey (Q49). The measure of perceived stress is a 10-item version of the *Perceived Stress Scale*® (Cohen, Kamarck, & Mermelstein, 1983; Cohen & Williamson, 1988). Items were scored 0 to 4. For the purposes of this report, Q49d, e, g, and h were reverse-coded. Scores are reported as a single figure, which is the sum of the individual scores (range 0 to 40). Higher scores on this measure indicate greater perceived stress.<sup>14</sup>
- *Post-Traumatic Stress Disorder (PTSD)*: PTSD is a type of anxiety disorder that can be triggered by experiencing or witnessing a traumatic event that causes fear, helplessness, or horror and is characterized by persistent frightening thoughts and memories, emotional detachment or numbness, sleep problems, and a tendency to be easily startled. The PTSD Check List (PCL), a 17-item screening tool, was used to provide information regarding the relative severity of PTSD symptoms that individuals experienced (Q50a-q) over the past month. Response options were coded from 1 (not at all) to 5 (extremely). Scores on all items were summed to create a total score that ranged between 17 and 85. Traditionally, a score of 50 on the PCL is considered to be a reliable cutoff suggesting that further evaluation for PTSD would be beneficial (Weathers et al., 1991). Higher scores on this measure indicate greater experiences of PTSD symptoms.<sup>15</sup>
- *Depression Scale*: Depression is a common mental disorder characterized by depressed mood, loss of interest or pleasure, feelings of guilt or low self-worth, disturbed sleep or appetite, low energy, and poor concentration. The first eight questions from the Patient Health Questionnaire (PHQ-9) Depression Scale (Spitzer, Kroenke, & Williams, 1999) were used to measure the presence of depression-related thoughts and behaviors (Q51). The PHQ-9 is a unidimensional measure used for diagnosing depression and assessing its severity. Scores range from 1 to 4. Higher scores on this measure indicate higher levels of depression.<sup>16</sup>

members indicated they experienced gender-related insensitivity, coercion, harassment, or discrimination. The 2012 WGRR incident rates comprise the percentage of members who indicated experiencing at least one of the behaviors during the 12 months prior to the survey.

- *Sex Discrimination*: To assess perceptions of discrimination in the workplace, members were asked to indicate if they had recently experienced any of the 12 behaviors or situations where they thought gender was a motivating factor (Q54). The items form three incident rates: *Evaluation* (Q54a-d), *Assignment* (Q54e-g, l-m), and *Career* (Q54h-k). In order to be counted as having experienced *Evaluation*, *Assignment*, or *Career discrimination*, respondents must have indicated that gender was a factor in their experience of at least one of the behaviors in the scale (Q54). In addition to the tabulation of incident rates of the three types of discrimination, a summary variable *Sex Discrimination*, is also tabulated. In order to be counted as having experienced *Sex Discrimination*, respondents must have indicated experiencing one of the 12 behaviors where gender was a factor AND they must have indicated that they considered at least some of the behaviors experienced to have been sex discrimination (Q55).<sup>17</sup>
- *Unwanted Gender-Related Behavior*: Incident rates of unwanted gender-related behaviors were derived from 19 behaviors items (Q56) and represent a continuum of behaviors.<sup>18</sup> The categories of behaviors and corresponding items are as follows: *Crude/Offensive Behavior* (Q56a, c, e-f), *Unwanted Sexual Attention* (Q56h, j, m-n), *Sexual Coercion* (Q56k-l, o-p), and *Sexist Behavior* (Q56b, d, g, i). *Sexist Behavior* includes verbal/nonverbal behaviors that convey insulting, offensive, and condescending attitudes based on the respondent's sex. *Crude/Offensive Behavior* includes verbal/nonverbal behaviors of a sexual nature that are offensive or embarrassing. *Unwanted Sexual Attention* includes attempts to establish a sexual relationship or engage in sexually suggestive behavior. *Sexual Coercion* reflects classic quid pro quo instances of job benefits or losses conditioned on sexual cooperation. Respondents were asked to indicate how often they had been in situations involving these behaviors, ranging from *Never* to *Very often* where a higher score denotes more frequent experiences of unwanted gender-related behavior. Items are derived from the *Sexual Experiences Questionnaire* (SEQ) (Fitzgerald, et al., 1988; Fitzgerald, Gelfand, & Drasgow, 1995). Incident rates indicate whether the individual reported experiencing at least one of the behaviors in a category (e.g., *Sexual Coercion*) at least once in the 12 months before responding to the survey.<sup>19</sup>

- **Sexual Harassment:** The prevalence of sexual harassment is determined using a two-step process. In order to be counted as having experienced *Sexual Harassment*, respondents must have indicated they experienced one of the following types of unwanted gender-related behaviors: *Crude/Offensive Behavior*, *Unwanted Sexual Attention*, or *Sexual Coercion* during the 12 months prior to completion of the survey (Q56) AND they must have indicated that they considered at least one of the behaviors experienced to have been sexual harassment (Q57). In Q57, survey participants were asked whether they considered any of the behaviors they endorsed in Q56 to have been sexual harassment. Response options included 1 (none were sexual harassment), 2 (some were sexual harassment; some were not sexual harassment), and 3 (all were sexual harassment).<sup>20</sup>
- **Unwanted Sexual Contact:** Respondents were counted as having experienced unwanted sexual contact if they indicated Yes to Q73.
- **Most Serious Unwanted Sexual Contact Behavior Experienced:** This combination of unwanted sexual contact behavior experienced during the one event were determined by responses to Q75. Respondents were counted in the *Experienced unwanted sexual touching* if they indicated experiencing sexual touching (without experiencing attempted or completed sexual intercourse, oral sex, anal sex, or penetration by a finger or object). Respondents were counted in the *Experienced attempted sexual intercourse, anal, or oral sex* if they indicated experiencing attempted sexual intercourse, oral sex, anal sex, or penetration by a finger or object (without experiencing completed sexual intercourse, oral sex, anal sex, or penetration by a finger or object). Respondents were counted in the *Experienced completed sexual intercourse, anal, or oral sex* if they indicated experiencing completed sexual intercourse, oral sex, anal sex, or penetration by a finger or object.

### **Margins of Error**

The complex sample design required weighting to produce population estimates (e.g., percent female).<sup>21</sup> Because of the weighting, conventional formulas for calculating the margin of error will overstate the reliability of the estimate. For this report, variance estimates were calculated using SUDAAN<sup>®</sup> PROC DESCRIPT (Research Triangle Institute, Inc., 2004).

<sup>20</sup> This measure was used on 2006 WGRA, 2008 WGRR, and 2010 WGRA.

<sup>21</sup> As a result of differential weighting, only certain statistical software procedures, such as SUDAAN<sup>®</sup>, correctly calculate standard errors, variances, or tests of statistical significance for stratified samples.

By definition, sample surveys are subject to sampling error. Standard errors are estimates of the variance around population parameters (such as percentages or means) and are used to construct margins of error (i.e., confidence interval half-widths). Percentages and means in these tabulations are reported with margins of error based on 95% confidence intervals. In order to compress the data display, only the maximum margin of error (Max ME) for each reporting category is shown. That is, the tabulation volume shows only the largest margin of error for the percentages or means in each row. For each average shown in these tabulations, its margin of error is also printed.

The following reporting conventions are used:

- “0” indicates that no one in any reporting group selected the response option,
- NR indicates the estimate is *Not Reportable* and is suppressed because of low reliability. Estimates of low reliability are suppressed based on criteria defined in terms of nominal sample size (less than 5), effective sample size (less than 15), or relative standard error (greater than 0.3),
- NA indicates the question was *Not Applicable* because the question did not apply to respondents in the reporting category based on answers to previous questions,
- no Max ME is printed when all percentages in the row are shown as NR,
- no margin of error is printed for an average when it is shown as NR.
