

UNMANNED SYSTEMS IOP CONFERENCE

Cassandra Smith, Division Chief, Technical Management

20 October 2010

Distribution Statement A: Approved for public release; distribution is unlimited

Report Documentation Page				Form Approved OMB No. 0704-0188	
Public reporting burden for the collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to a penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.					
1. REPORT DATE 13 OCT 2010		2. REPORT TYPE Briefing Charts		3. DATES COVERED 18-01-2010 to 06-09-2010	
4. TITLE AND SUBTITLE Unmanned Systems Interoperability				5a. CONTRACT NUMBER	
				5b. GRANT NUMBER	
				5c. PROGRAM ELEMENT NUMBER	
6. AUTHOR(S) Cassandra Smith				5d. PROJECT NUMBER	
				5e. TASK NUMBER	
				5f. WORK UNIT NUMBER	
7. PERFORMING ORGANIZATION NAME(S) AND ADDRESS(ES) U.S. Army TARDEC, 6501 East Eleven Mile Rd, Warren, Mi, 48397-5000				8. PERFORMING ORGANIZATION REPORT NUMBER #21278	
9. SPONSORING/MONITORING AGENCY NAME(S) AND ADDRESS(ES) U.S. Army TARDEC, 6501 East Eleven Mile Rd, Warren, Mi, 48397-5000				10. SPONSOR/MONITOR'S ACRONYM(S) TARDEC	
				11. SPONSOR/MONITOR'S REPORT NUMBER(S) #21278	
12. DISTRIBUTION/AVAILABILITY STATEMENT Approved for public release; distribution unlimited					
13. SUPPLEMENTARY NOTES Unmanned Systems Interoperability Conference					
14. ABSTRACT Lead the development, systems engineering, integration, acquisition, testing, fielding, sustainment and improvement of unmanned systems for the Joint Warfighterto ensure safe, effective and supportable capabilities are provided while meeting cost, schedule and performance					
15. SUBJECT TERMS					
16. SECURITY CLASSIFICATION OF:			17. LIMITATION OF ABSTRACT Public Release	18. NUMBER OF PAGES 9	19a. NAME OF RESPONSIBLE PERSON
a. REPORT unclassified	b. ABSTRACT unclassified	c. THIS PAGE unclassified			

RS JPO Organization & Relationships

- Army – USMC MOA
- Over 20 Robotic Systems
- Chartered by Army Acquisition Executive

Mission

Lead the development, systems engineering, integration, acquisition, testing, fielding, sustainment and improvement of unmanned systems for the Joint Warfighter to ensure safe, effective and supportable capabilities are provided while meeting cost, schedule and performance.

Vision

Continuous improvement of unmanned system capabilities to meet current and future Joint Warfighter objectives.

Evolution of Ground Robotics in Combat

- Sustainment, Modernization, Interoperability and Modularity

Leadership • Service • Innovation

Interoperability Objectives

- Progressive, building approach
- Define interoperability standards for integration across UGVs leveraging existing profiles to the greatest extent possible
 - Open Architecture
 - Common Control
 - Control Messages (JAUS)
 - Communications (“Common” Data Link)
 - Payload Modularity
 - Establish Performance Criteria to test compliance
- Establish, adopt and apply interoperability standards/
Levels of Interoperability (LOI) for UGVs

Interoperability Effort...

- is in support of modularity
- is in support of commonality
- is based on open and widely available standards
- is continually evolving
- is not a limit on innovation
- is not proprietary

Why Interoperability

- Increased Modular payloads across multiple platforms
- Enables agile, responsive mission realignment
- Enables Air/Ground coordination/collaboration
- Broadens payload/mission equipment package vendor base
- Specifies logical architecture, standards, requirements, and conformance approach
- Offers increased capabilities at lower life cycle costs
- Facilitates common control of multiple robotic systems

Emerging Requirements

Name	Status	Purpose
Overarching Unmanned Systems	ICD approved 23 Aug 10	Interoperable family of unmanned systems across domains
Multi Mission UGV	World-wide Staffing Complete	Large scale UGV platform for multiple missions
Small UGV	World-wide Staffing Complete	Recon and surveillance
Squad Multipurpose Equipment Transfer	World-wide Staffing Complete	Logistics/resupply vehicle
Family of Robotic Clearance and Interrogation Systems	Draft CPD	Prevent, detect and neutralize explosive hazards
Autonomous Mine Detection System	Draft CDD	Mine detection and marking
Explosive Detection Device	At DA G-3 for review	Handheld/Robot Mounted Explosive Detector
Small, Throwable Robot	Draft CPD	Recon and surveillance
III Corps Operational Need Statements	G3/5/7 validated but not resourced	Increased soldier safety and situational awareness thru intelligence and autonomy

Supporting immediate Warfighter needs while establishing a path forward for future requirements

Interoperability Top Level Schedule

Leadership • Service • Innovation
