FINAL

**PHASE I ENVIRONMENTAL BASELINE SURVEY
FOR THE LEASING OF NELLIS AIR FORCE BASE LAND
FOR CONSTRUCTION AND OPERATION
OF A SOLAR PHOTOVOLTAIC SYSTEM,
CLARK COUNTY, NEVADA**

SEPTEMBER 2006

EXECUTIVE SUMMARY

This Phase I Environmental Baseline Survey report was prepared to support the proposed lease of approximately 212 acres of property (hereafter referred to as subject property) owned by Nellis Air Force Base (AFB) to a contractor (not yet determined) for the construction and operation of a Solar Photovoltaic System (SPS). The SPS will be used as a main power source for Nellis AFB. The property in consideration is a portion of Area III, and is located near the northern boundary of Nellis AFB, Clark County, Nevada (see Figures B1 and B2; Appendix B).

This report was prepared and the site reconnaissance was conducted according to Air Force Instruction 32-7066: Environmental Baseline Surveys in Real Estate Transactions and the American Society for Testing and Materials guidelines ASTM E1527-05 which define good commercial and customary practices in the United States for conducting an environmental site assessment of a parcel of commercial real estate with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation, and Liability Act (42 USC 9601).

According to information gathered from document searches, interviews, and the site reconnaissance, Gulf South Research Corporation (GSRC) found evidence of contamination in connection with the subject property and found evidence of contamination on adjacent properties to the south and southeast of the subject property. One Environmental Restoration Program (ERP) site, Landfill (LF) -02 exists within the subject property and two ERP sites, ST-27 and SS-46, exist within the 1 mile search radius. Based on interviews and document searches, the groundwater beneath and surrounding LF-02 is contaminated with low concentrations (<5 parts per billion [ppb; see Appendix A]) of tetrachloroethene (PCE), trichloroethene (TCE) and volatile organic compounds (VOCS) in monitoring wells down-gradient of LF-02. However, the contamination levels are below U.S. Environmental Protection Agency maximum contaminant levels.

According to document searches and interviews, the Kinder Morgan pipeline terminal complex located southeast of the subject property has reported product releases containing methyl tertiary-butyl ether, which is encroaching into monitoring wells located on Nellis AFB. In addition, Nellis AFB contains five contaminated sites with product containing a combination of benzene,

toluene, ethylbenzene, and xylenes, and light non-aqueous phase liquid, which are not located within the subject property.

GSRC recommends that the landfill contamination information be included in the lease agreement with the contractor. Coordination with Nellis AFB environmental personnel should be conducted prior to construction in the landfill area and in the area adjacent to the Kinder Morgan pipeline terminal to determine if recent groundwater samples have been collected. The remaining solid waste scattered throughout the subject property should be disposed of in accordance with local, state, and Federal regulations by the responsible party. GSRC recommends that no further environmental studies be conducted for those areas not in close proximity to LF-02 and the pipeline terminal.

SECTION 1.0
PURPOSE OF THE ENVIRONMENTAL BASELINE SURVEY

1.0 PURPOSE FOR THE ENVIRONMENTAL BASELINE SURVEY

The purpose of this Phase I Environmental Baseline Survey (EBS; see Appendix A) is to (1) document the nature, magnitude, and extent of any environmental contamination of the subject property considered for the out-grant lease; (2) identify potential environmental contamination liabilities associated with the proposed transaction and establish environmental due diligence; (3) develop information to assess health and safety risks; (4) protect human health and the environment; (5) determine possible effects of contamination on property valuation; (6) provide notice of environmental condition when required under Section 120 [h] [1] of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980 as amended (42 USC 9620 [h] [1]) or any applicable state or real property disclosure requirements.

1.1 BOUNDARIES OF THE PROPERTY AND SURVEY AREA

The legal description of Area III, which includes the subject property, is Township 20 South, Range 62 East (see Appendix B):

Section 2: N1/2; W1/2 SW1/4; W1/2 E1/2 SW1/4
Section 3: All
Section 4: E1/2; S1/2 SW1/4; N1/2 N1/2 NW1/4; S1/2 NE1/4 SW1/4; NE1/4 NE1/4 SW1/4
Section 9: All
Section 10: N1/2; NW1/4 SW1/4; W1/2 NE1/4 SW1/4; SW1/4 SW1/4 SW1/4; W1/2 NW1/4 SW1/4 SW1/4
Section 16: E1/2; SE1/4 SW1/4

2.0 SURVEY METHODOLOGY

2.1 APPROACH AND RATIONALE

This report was produced in accordance with the following:

AFI 32-7066

"This instruction implements Air Force Policy Directive (AFPD) 32-70, Environmental Quality, by spelling out responsibilities and procedures for an Environmental Baseline Survey (EBS) in a real property transaction. This instruction also covers additional procedures for transactions involving unremediated real property and for the termination or expiration of temporary interests in real property."

ASTM E1527-05

"The ASTM guideline defines good commercial and customary practices in the U.S. for conducting an environmental site assessment of a parcel of commercial real estate with respect to the range of contaminants within the scope of the CERCLA (42 USC 9601). This practice is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability."

Gulf South Research Corporation's (GSRC) scope of services for this project include four major components: (1) Federal, state, and local environmental records review, including a review of historical and physical setting records; (2) a site reconnaissance to search for visible indications of contamination or potential contamination to the environmental or human health and safety; (3) interviews with key site personnel and local government officials; and (4) the preparation of this report.

This EBS report categorizes the presence of hazardous substances or petroleum products or their derivatives for the subject property into the following:

Category 1 – No storage, release or disposal has occurred. Property where no hazardous substances or petroleum products or their derivatives were stored, released into the environment or structures, or disposed on the subject property and where no migration from adjacent areas has occurred.

Category 2 – Only storage has occurred. Property where hazardous or petroleum products or their derivatives were stored, but no release, disposal or migration from adjacent areas occurred.

Category 3 – Contamination below a level that requires any action. Property where contamination is present but falls below established action levels characterized pursuant to the Environmental Restoration Program (ERP) that is managed by the Restoration Program Manager (RPM) of the 99 CES/CEVR.

Category 4 – Remedial action required and taken. Property where contamination above action levels existed but all remedial actions necessary to protect human health and the environment have been taken to meet the provisions of CERCLA Section 120 (h) (3).

Category 5 – Remedial or other action underway. Property is undergoing remedial action for known contamination.

Category 6 – Required response action not implemented. Property contains known contamination and required remedial systems or other actions have not been selected or implemented.

Category 7 – Further evaluation required. Property has indications of existing contamination or the potential for a release of hazardous substances into the environment or structures, but not well characterized pursuant to the ERP.

2.1.1 Description of Documents Reviewed

GSRC contracted Environmental Data Resources, Inc. (EDR; see Appendix A) to search Federal and state environmental databases that track activities associated with hazardous waste and incidents that have resulted in major environmental impairment. These databases are prepared and maintained by various Federal and state environmental agencies such as the U.S. Environmental Protection Agency (EPA; see Appendix A) and the Nevada Division of Environmental Protection (NDEP; see Appendix A). The minimum appropriate search distance was 1 mile from the subject property's boundary (Table 1). The EDR report showing all information pertaining to the database searches is presented in Appendix D.

GSRC also conducted searches on NDEP and EPA databases via the internet for information such as Enforcement and Compliance History Online (ECHO; see Appendix A) and Envirofacts Warehouse. No information regarding additional environmental concerns within or in the vicinity

of the subject property was found in the Federal or state databases (NDEP 2006a and EPA 2006).

Table 1. Summary of Database Information Received During Preparation of the EBS

Primary Federal Databases	Date of Database	Search Distance*
National Priorities List (NPL)	May 2006	1.0 mile
Delisted NPL	May 2006	0.5 mile
Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS)	March 2006	0.5 mile
CERCLIS No Further Remedial Action Planned (CERC-NFRAP)	March 2006	0.5 mile
Resource Conservation and Recovery Act (RCRA) Information-Transportation, Storage, and Disposal Facilities (RCRA-TSD); Large Quantity Generators (LQG) and Small Quantity Generators (SQG)	April 2006	Subject Property and Adjoining Properties
Emergency Response Notification System (ERNS)	January 2006	0.25 mile
Department of Defense Sites (DOD)	February 2005	Subject Property
Toxic Release Inventory (TRIS)	July 2005	0.25 mile
FIFRA/TSCA Tracking System (FTTS)	April 2006	1.0 mile
Integrated Compliance Information System (ICIS)	April 2006	1.0 mile
PCB Activity Database (PADS)	February 2006	1.0 mile
Facility Index System (FINDS)	May 2006	1.0 mile
Primary State Databases	Date of Database	Search Distance*
Corrective Action Case List (SHWS)	February 2006	1.0 mile
Solid Waste Facilities/Landfill Sites (SWF/LF)	December 2005	0.5 mile
Recycling Information Listing (SWRCY)	March 2006	1.0 mile
Leaking Underground Storage Tank Incident Reports (LUST)	March 2006	0.5 mile
Registered Underground Storage Tanks (UST)	April 2006	Subject Property and Adjoining Properties
Hazardous Materials Repository Information Data (TIER 2)	March 2006	1.0 mile

Source: EDR, Inc. 2006.

*In accordance with ASTM 1527-05.

Primary Federal and State Databases

Primary Federal databases reviewed by EDR, Inc. included:

- The National Priorities List (NPL; see Appendix A) – This database includes EPA NPL sites that fall under the EPA's Superfund program, established to fund the cleanup of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action.

- Delisted NPL – This database includes EPA final NPL sites where remedies have proven to be satisfactory or sites where the original analyses were inaccurate, and the site is no longer appropriate for inclusion on the NPL.
- Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS; see Appendix A) – This database contains an extract of sites that have been or are in the process of being investigated for potential environmental risk.
- CERCLIS No Further Remedial Action Planned (CERCLIS-NFRAP; see Appendix A) – This database includes sites, which have been determined by the EPA, following preliminary assessment, that no longer pose a significant risk or require further activity under CERCLA.
- Resource Conservation and Recovery Act Information (RCRA; see Appendix A) – This database includes handlers, generators, transporters, violations, corrective actions, and treatment, storage and disposal facilities of hazardous wastes.
- Department of Defense (DOD; see Appendix A) Sites – This database contains a list of DOD sites located within the subject property.
- Emergency Response Notification System (ERNS; see Appendix A) – This database contains data on reported releases of oil and hazardous substances.
- FIFRA/TSCA Tracking System (FTTS; see Appendix A) – Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA; see Appendix A)/Toxic Substances Control Act (TSCA; see Appendix A) and Emergency Planning and Community Right-to-Know Act (EPCRA; see Appendix A) tracking system regarding pesticide enforcement actions, compliance activities related to FIFRA, and activities related to EPCRA over the previous five years.
- Integrated Compliance Information System (ICIS; see Appendix A) – This database supports the needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES; see Appendix A) program.
- PCB Activity Database (PADS; see Appendix A) – This database identifies generators, transporters, commercial storers and/or brokers and disposers of polychlorinated biphenyls (PCBs; see Appendix A) who are required to notify the EPA of such activities.
- Facility Index System (FINDS; see Appendix A) – This database contains both facility information and ‘pointers’ to other sources that contain more detail.

Primary state databases reviewed by EDR include:

- Corrective Action Case List (SHWS; see Appendix A) – This is a listing of corrective action sites.
- Landfill List (SWF/LF; see Appendix A) – This is a list of solid waste facilities/landfill sites.
- Recycling Information Listing (SWRCY; see Appendix A) – This is a listing of registered waste tire collection sites.

- Leaking Underground Storage Tank Incident Reports (LUST; see Appendix A) – This is an inventory of reported leaking underground storage tank incidents.
- Underground Storage Tank List (UST; see Appendix A) – This is a list of registered USTs in the State of Nevada.
- Hazardous Materials Repository Information Data (TIER 2) – This is a list of EPCRA required facilities which store or manufacture hazardous materials.

A total of 13 databases was recognized during the search conducted by EDR. Note that many of the facilities/sites listed in the EDR report were listed in multiple databases. The EDR report indicates that there are 33 sites/facilities recorded from the database search within the search radii that may have or have generated, stored, treated, and/or disposed of solid or hazardous waste within or near the subject property (Table 2).

All information listed in Table 2 was derived directly from the EDR report. Facilities/sites listed in the EDR report that were greater in distance to the subject property than the distance of the search radii promulgated in the ASTM guidelines were not included in Table 2 and were not considered to be a threat to the subject property.

Table 2. List of Facilities from EDR Report

Facility Name/ Address	Distance/Direction From Subject Property	Database	Comments	Potential Threat to Subject Property?
Nellis AFB Nellis AFB, NV	Subject Property	DOD		No.
Nevada Recycling 5850 N. Nellis Blvd. Las Vegas, NV 89115	0.13 mile/NW	FTTs	This facility was inspected for PCBs on 1/23/1989 and had one violation. No other information was given in the EDR report.	No. Due to the distance from the subject property and because the violation occurred over 17 years ago, this facility does not pose a threat to the subject property.
Rebel Oil Company, Inc. 5095 E. El Campo Grande Las Vegas, NV 89115	0.13 mile/NW	TIER2	This facility, at one time, stored or manufactured 1.9 million pounds of alcohol.	No. No violations exist for this facility.
Baker Commodities, Inc. 5725 Range Road Las Vegas, NV 89115	0.13 mile/N	FINDS	This facility is listed as having an NPDES permit.	No. No violations exist and no threat of contamination is evident from this facility
Summit View Youth Center 5730 Range Road Las Vegas, NV 89115	0.13 mile/N	FINDS	This facility is listed in the FINDS database because it is a school located near the subject property.	No. No violations exist and no threat of contamination is evident from this facility
Southwest Auto Wrecking 5380 North Novak Street Las Vegas, NV 89115	0.42 mile/W	SHWS	This facility had correction action taken against it on 7/11/1991 for the release of petroleum hydrocarbons to the soil.	No. The case was closed on 12/7/1992.
K & L Auto Wrecking 4540 E. Hammer Lane Las Vegas, NV 89115	0.42 mile/W	SWRCY	This facility is listed as a generator of waste tires.	No. No violations exist for this facility.
USAF Nellis AFRC OMS 5550 Range Road Las Vegas, NV 89115	Subject Property	RCRA-SQG	This facility is listed as being a conditionally exempt SQG.	No. No violations exist for this facility.

Table 2, continued

Facility Name/ Address	Distance/Direction From Subject Property	Database	Comments	Potential Threat to Subject Property?
Casino Ready Mix Mobile Source 5355 Beesley Drive Las Vegas, NV 89115	0.5 mile/E	SHWS	This facility reported a release of diesel to the soil on 9/10/2004.	No. The diesel spill was cleaned up and remediated.
Chevron Texaco Products, Co. 5049 North Sloan Lane Las Vegas, NV 89115	Adjacent/E	FINDS	This facility is listed as having a NPDES permit.	No. No violations exist for this facility.
Kinder Morgan Bulk Terminal 5049 North Sloan Lane Las Vegas, NV 89115	Adjacent/E	ICIS	This facility is listed as having an enforcement action taken on 8/15/2005 regarding the NPDES permit. A penalty was assessed due to deficiencies with the Spill Prevention Control and Countermeasure Program.	Yes. This facility has a history of enforcement actions and the evidence of historical releases, as verified by interviews with Nellis AFB personnel.
Parts 4950 Copper Sage Las Vegas, NV 89115	0.88 mile/west	SWRCY	This facility is listed as being a generator of waste tires.	No. No violations exist for this facility.
Greenleaf 4995 Copper Sage Street Las Vegas, NV 89115	0.88 mile/west	SWRCY	This facility is listed as being a generator of waste tires.	No. No violations exist for this facility.
Ken's Auto Wrecking 5051 Copper Sage Road Las Vegas, NV 89115	0.88 mile/west	SWRCY	This facility is listed as being a generator of waste tires.	No. No violations exist for this facility.
Bert's Main Gate Wrecking 5070 Copper Sage Las Vegas, NV 89115	0.88 mile/west	SWRCY, SHWS	This facility is listed as being a generator of waste tires and reported a spill of gasoline into the soil on 2/5/2003.	No. No violations exist for this facility and the case was closed on 2/23/2005.
Walton's Salvage 4904 Copper Sage Las Vegas, NV 89115	0.88 mile/west	SHWS	This facility reported a spill of waste oil into the soil on 2/6/1995.	No. The spill was cleaned up and the case was closed on 3/8/1995.
American Sand & Gravel, LLC. 5260 Beesley Drive Las Vegas, NV 89115	0.50 mile/west	TIER 2	This facility stored 160,000 lbs of diesel.	No. The facility has no history of violations.

Table 2, continued

Facility Name/ Address	Distance/Direction From Subject Property	Database	Comments	Potential Threat to Subject Property?
CALNEV Pipe Line, LLC 5049 North Sloan Lane Las Vegas, NV 89115	Adjacent/E	TIER 2, ICIS, ERNS, UST, FINDS, HAZNET, RCRA- LOG, UST, SHWS, LUST	This facility is listed as having stored 15.9 million gallons (MG) of gasoline; 52 MG of STADIS 450; 55,000 MG of gasoline additive; 5.2 million pounds (lbs) of turbine; 707 MG of diesel dye; 10,626 barrels of anti-icing additive; 2.2 MG of JP-8; 346,580 gals of Transmix; 74,400 lbs of TFA-4908R; 255 gals of propane; 2.1 MG of ethanol; and 7.7 MG of diesel. This facility is also listed as having a non-penalty administrative compliance order given on 5/8/2002. This facility reported a gasoline leak from a valve that was left open on 3/28/1990. Approximately 60 barrels of gasoline were released into the soil. This facility reported a gasoline leak from an underground pipe on 4/17/1990. Approximately 150 barrels of gasoline were released into the soil. This facility had a 55-gallon and a 47-gallon gasoline additive spill into the soil on unspecified dates. Another gasoline additive spill (55 gallons) was reported on 7/2/1993 into the soil from an underground pipe. Another 47-gallon release of gasoline additive was reported on 9/4/1993 for this facility from piping on an injection system. This facility contains three 10,000-gallon gasoline tanks, a 1,000-gallon used oil tank, a 2000-gallon diesel tank, and a 10,000 gallon "other" tank, all of which are no longer in use. This facility is also listed as a LQG of oil-containing waste, organic solids, and aqueous solution. This facility also had two violations in 1998 stemming from a compliance inspection and from generator oversight, but became compliant on 8/14/1998. A 10,310-gallon tank, a 1,000-gallon tank, a 2,500-gallon tank, and a 1,000 gallon used oil tank are permanently out of use at this facility. This facility reported a release of an unspecified substance on an unknown date, but was closed on 11/6/1991. Another release of an unspecified substance on an unknown date was reported, but was closed on 3/14/1993. The release to soil and groundwater from a LUST was reported on 2/5/1997, but a closure date was not reported.	Yes. Since this facility has had historical releases near the subject property and is at the same location as the Kinder Morgan facility, it could pose a threat to the subject property.

Table 2, continued

Facility Name/ Address	Distance/Direction From Subject Property	Database	Comments	Potential Threat to Subject Property?
Las Vegas Fuel Terminal 5049 North Sloan Lane Las Vegas, NV 89115	Adjacent/SE	SHWS	This facility reported seven releases of 150 gallons of gasoline and water on different dates between 1992 and 2000. In all cases, the spills were cleaned up and the case closed.	Yes. This facility has a history of petroleum and fuel leaks and is located adjacent to the southeastern boundary of the subject property.
Rebel Oil Co. Inc. 5054 North Sloan Lane Las Vegas, NV 89115	0.25 mile/E	TRIS, SHWS, RCRA- SQG, FINDS, HAZNET, TIER 2	This facility reported a release of an unknown substance and amount to the soil and groundwater on 1/22/2004. Another release of an unknown substance and amount to the soil was reported on 5/17/2002. This facility is also listed as a SQG with no violations. Approximately 21 tons of unspecified organic liquid mixture has been recycled at this facility.	Yes. This facility had releases of unknown substances to the groundwater in the vicinity of the subject property.
River City Petroleum 4915 Sloan Road Las Vegas, NV 89115	0.25 mile/E	UST	This facility currently has a 12,000-gallon and 6,000-gallon diesel tank, and a 6,000-gallon gasoline tank.	No. No violations exist for this facility.
Fredericksen Tank Lines, Inc. 4915 North Sloan Lane Las Vegas, NV 89115	0.25 mile/E	SHWS, LUST	A gasoline release on concrete was reported on 9/17/1998, but was closed on 9/23/1998. A LUST was reported on 10/13/2003 at this facility that affected soils, but the case was closed on 11/10/2004.	No. All reportable releases have been remediated and the cases closed.
Chevron Las Vegas Terminal #1001744 4950 N. Sloan Lane Las Vegas, NV 89115	0.25 mile/E	UST	This facility contains two tanks that are permanently out of use – a 500-gallon used oil tank and a 5,000-gallon new oil tank. One 10,000-gallon diesel tank is currently in use. A spill from an underground pipeline of 27 gallons of gasoline additive (techrolene) to the soil was reported on 4/19/1994. The facility removed and cleaned the soil.	No. No existing violations were found for this facility.
River City Petroleum, Inc. 4915 North Sloan Ave. Las Vegas, NV 89115	0.25 mile/E	TIER 2	This facility was reported to store 12,000 gallons of gasoline and 36,000 gallons of diesel.	No. No violations exist for this facility.

Table 2, continued

Facility Name/ Address	Distance/Direction From Subject Property	Database	Comments	Potential Threat to Subject Property?
Nevada Recycling, Inc. 5000 Range Road Las Vegas, NV 89115	<0.10 mile/S	SHWS	Two releases of total petroleum hydrocarbons (TPH) occurred on 1/15/1997 and 6/3/1999, respectively. The first released was closed on 8/4/1997, but no date of closure was provided for the second spill.	No. Due to the south and southeasterly flow of groundwater in the area, this facility is not likely to pose a threat to the subject property.
Silver Dollar Recycling 5000 Range Road Las Vegas, NV 89115	<0.10 mile/S	UST	This facility contains two 4,000-gallon diesel tanks that are permanently out of use.	No. No violations exist for this facility.
Haycock Petroleum Spill 4825 North Sloan Lane Las Vegas, NV 89115	0.60 mile/SE	SHWS, TIER 2	Approximately 100 gallons of diesel was released from a mobile source on 8/7/2003 and another release was reported on 12/14/2004 in the same amount. This facility has been reported to store 40,000 lbs of cleaning solvent, 40,000 lbs of kerosene, 127,500 lbs of propane, and 60,000 lbs of antifreeze.	No. Both spills were cleaned up and the cases were closed. No violations exist for this facility.
7-Eleven #18198 4395 N. Las Vegas Blvd. Las Vegas, NV 89115	0.38 mile/S	SHWS, UST	A gasoline spill was reported on 10/25/2000 into the soil. This facility also contains three 10,000-gallon gasoline tanks currently in use.	No. The spill was cleaned up and the case was closed on 2/15/2002.
Nellis Air Force Base 4551 Devlin Drive Las Vegas, NV 89115	0.71 mile/SE	SHWS	A release was reported at this location on an unspecified date and of an unknown substance.	No. Due to the distance and because the groundwater flows south and southeast of the subject property, this facility does not pose a threat to the subject property.
Sprint Central Telephone 4243 N. Las Vegas Blvd. Las Vegas, NV 89115	0.58 mile/SW	SHWS	A release of an unknown material was reported on an unspecified date at this facility.	No. The release was cleaned up and the case was closed on 12/14/1995.

Source: EDR 2006

Historical Maps/Aerial Photographs

A search was made by EDR and GSRC for historical aerial photographs and historical quadrangle maps available for the subject property. Historical topographic quadrangle maps were only available for 1952, 1973 and 1974. Historic aerial photographs were obtained from Nellis AFB staff and were available for the years of 1943 through 2005. These maps typically show any development or habitat changes over the years. The historical topographic quadrangles and aerial photographs reviewed by GSRC are listed in Table 3 and can be found in Appendix C.

Table 3. Historical Topographic Quadrangles/Aerial Photographs Reviewed

DATE	QUADRANGLE/PHOTOGRAPH NAME	SCALE
1943	Nellis AFB	----
1952	Las Vegas/Gass Peak SW	1:62,500
1958	Nellis AFB	----
1973	Las Vegas NE	1:24,000
1973	Nellis AFB	----
1974	Valley	1:24,000
1984	Nellis AFB	----
1990	Nellis AFB	----

Environmental Baseline Surveys

A review of the *Environmental Baseline Survey for the Land Lease to the 63rd Regional Support Command* (Nellis AFB 1996) document which was prepared for a portion of Area III (within 100 feet of the subject property) was reviewed for information regarding potential threats to the subject property or any other information deemed appropriate for the use in this report. According to the EBS, "A review of the Installation Restoration Program, aerial photos, and a visual inspection indicated no evidence of contaminants exist on or near the subject property being leased to the RSC."

Landfill Report

The *Installation Restoration Program Records Search for Nellis Air Force Base, Nevada* (CH₂M Hill 1982) document was reviewed for information pertaining to LF-02 which is located within the

subject property. The Installation Restoration Program report briefly described the history of LF-02 and will be discussed in further detail in Section 3.4.

Monitoring Reports

A review of the *Third Quarter 2005 Monitoring Report for the Kinder Morgan Energy Partners, L.P., Las Vegas Terminal, Nevada* (TRC 2005) document was reviewed for information regarding historical releases of hazardous materials/waste or petroleum products from the Kinder Morgan pipeline terminal, which is immediately adjacent to the southeastern boundary of the subject property (Figure B3). According to the report, the groundwater within the vicinity of the pipeline terminal is contaminated from historical releases of methyl tertiary-butyl ether (MTBE) and has encroached into monitoring wells located on Nellis AFB.

Groundwater Monitoring Reports

The *Nellis Air Force Base Sites LF-01 and LF-02, Project No.RKMF20057001, Groundwater Monitoring Report* (Black & Veatch 2006) was reviewed for information regarding the condition and/or contamination of groundwater located in LF-02, which is located within the proposed subject property (Figure B3). A discussion of the findings of this report is presented in Section 3.4

Facility Response Plan

The *Final Draft, Nellis Air Force Base 19-1, Facility Response Plan* (Nellis AFB 2006a) and spill report file was reviewed to determine if spills of reportable quantities have occurred within Area III in the past 5 years. Nellis AFB is required to keep track of all reportable quantity spills for a period of 5 years and institute a facility response plan based on the occurrences of those spills. A reportable quantity, as per Nevada state regulations, is the release of 25 gallons or more of petroleum products such as gasoline, diesel, and hydraulic fluid or the impact of 3 cubic yards (yds³) or more of soil by a hazardous material (NDEP 2006b). According to information from the facility response plan, no reportable spills have occurred within the subject property.

Tract Register of Acquisition

The chain of title information was researched and reviewed at the Nellis AFB real estate office to determine historical ownership of the subject property since its inception as a military installation. Table 4 summarizes the transactions that occurred for the acquisition of the subject property after July 1, 1940 (Figure B4).

Table 4. Chain of Title for the Subject Property

Tract Number Acquired	Name of Seller
B132	City of Las Vegas
B140	Leonard R. Wilson, <i>et al.</i>
B147	Bertha Shafon
B148	City of Las Vegas
B149	City of Las Vegas

2.1.2 Property Inspections

A site reconnaissance was conducted on June 22 and June 23, 2006 by Mr. Brady Turk and Dr. Eric Webb. The focus of the effort was to investigate the subject property for visual evidence of any adverse impacts due to potential hazardous or toxic substances, or the presence of potential sources for impacts, such as drums, petroleum products and leaking USTs.

The approximately 212-acre subject property was accessible by vehicle and by foot from Range Road and from several unimproved roadways scattered throughout. Some areas of the subject property, such as the landfill area and areas along the Union Pacific Railroad, were heavily disturbed and supported only sparse vegetative cover (less than 20 percent). The remaining less disturbed areas consisted of open desert scrub land that supported a good diversity and density of vegetation (approximately 40 to 50 percent ground coverage). The topography of the majority of the subject property, except LF-02, was relatively flat. Ground elevation in this part of the subject property was approximately 6 to 10 feet higher than the remaining areas due to the filling and capping of LF-02. No buildings or standing structures were observed on the subject property. The presence of monitoring wells scattered throughout the subject property suggest that contamination may exist or could potentially occur. However, contamination from hazardous waste/materials or petroleum products could not be determined strictly by visual observation on the subject property during the reconnaissance survey.

2.1.3 Personal Interviews

The key personnel contacted are listed below and a summary of their interviews are presented in Appendix E.

Mr. D.J. Haarklau, Base Environmental Fuels Program Manager

Mr. Haarklau provided GSRC with information pertaining to reportable quantity spills that have occurred in Area III over the past 5 years. According to a records search, no reportable spills have occurred within or in the vicinity of the subject property.

Mr. Bernd Schmidt, Restoration Program Manager

According to Mr. Schmidt, contamination associated with LF-02 exists within the subject property and two ERP sites, ST-27 and SS-46, exist within the 1-mile search radius (Figure B5). Low levels of tetrachloroethene (PCE; see Appendix A) and trichloroethene (TCE; see Appendix A) and volatile organic compounds (VOCs; see Appendix A) are present in monitoring wells down-gradient of LF-02. However, contamination levels are below EPA maximum concentration levels (MCLs; see Appendix A). Mr. Schmidt told GSRC that there have been historical releases to groundwater south and southeast of the subject property containing benzene, toluene, ethylbenzene, and xylenes (BTEX; see Appendix A), halogenated volatile organic compounds (HVOCs; see Appendix A), and MTBE.

Mr. Patrick Quinn, Environmental Engineer

Mr. Quinn said that he knew of a landfill being located within the subject property and that a railroad and spur were located there also. He mentioned that the Defense Reutilization and Marketing Office (DRMO; see Appendix A) Area was used as an ammunition storage area during World War II but is now used to store scrap metal, aircraft parts, and office furniture. Mr. Quinn also advised GSRC that a portion of the subject property was used as part of a radar testing project in the late 1980s and early 1990s.

Chief James Boley, Nellis AFB Fire Department

Chief Foley, who has been with the department for over 7 years, told GSRC that there have been no incidents or spills within or near the subject property except for small structure fires within the recreational vehicle (RV; see Appendix A) storage area to the west of the subject property.

2.1.4 Sampling

No air, soil, or water samples were taken within the subject property as part of this Phase I EBS. Existing information and sampling data provided by Nellis AFB was reviewed.

SECTION 3.0
FINDINGS FOR SUBJECT PROPERTY

3.0 FINDINGS FOR SUBJECT PROPERTY

3.1 HISTORY AND CURRENT USE

The documents reviewed by GSRC to determine historical land uses and potential environmental conditions associated with those uses regarding the subject property and surrounding areas are described in the paragraphs below.

3.1.1 Historic Topographic Quadrangles

The 1952 historic quadrangle (Appendix C) showed the majority of the subject property to be undeveloped, with the exception of a restricted roadway and a Union Pacific Railroad spur crossing through the center of the subject property. The main railroad line can be seen northwest of the subject property and an improved roadway and structures/buildings are evident southwest of the subject property. The 1973 and 1974 historic quadrangles (Appendix C) show no major developments within the subject property, but do show a continuation of the railroad to the area southwest of the subject property and the construction of the pipeline terminal southeast of the subject property. The construction of Interstate 15 can be seen north of the subject property.

3.1.2 Historic Aerial Photographs

The historic aerial photographs from 1943 and 1958 (Appendix C) showed the subject property to be mostly undeveloped, with the exception of Range Road and the Union Pacific Railroad traversing through the property. Several unimproved roadways, including one that traverses northwest to southeast through the center of the property, are evident throughout the subject property. A disturbed area, which may be LF-02, is evident within the northeast portion of the subject property. A small developed area with buildings, presumably an ammunition storage area, can be seen approximately 700 feet southwest of the subject property. The 1973 historic aerial (Appendix C) shows the same conditions for the subject property, with the exception of the disturbed area (LF-02) in the northeastern portion of the subject property. The ammunition storage area has expanded in size and the Kinder Morgan pipeline terminal can be seen near the southeastern edge of the subject property. The major changes seen in the 1984 historic aerial (Appendix C) are the construction of a large water tank near the northern boundary of the subject property, the addition of buildings/structures within the ammunitions storage area, and the development of the mobile home park south of the subject property.

The only change to the 1990 historic aerial is the construction of a building near the center of the western boundary of the subject property. The 2005 historic aerial shows numerous developments within the vicinity of the subject property, including the construction of the Summit View Youth Correctional Facility, Baker Commodities, and the Weyerhaeuser Company adjacent to the northern boundary of the subject property. The Mike O'Callaghan Federal Hospital and the Marine Reserve Center were built between 1990 and 2005 and are located near the southwestern boundary of the subject property. The expansion of the Security Forces building and the construction of the Joint Air and Space Tactics Center building can be seen near the western central portion of the subject property. Expansion of the Kinder Morgan pipeline terminal near the southeastern boundary of the subject property is also evident.

Current uses of the subject property are (1) open areas of previously disturbed land (Photographs 1 through 5; see Appendix C) that has been utilized, in part, as a landfill within the northeastern portion of the subject property; (2) for the construction of a railroad and railroad spur near the center and southeastern portions of the subject property (Photographs 6 and 7); and (3) for the construction of Range Road through the center of the subject property. Numerous unimproved roadways were observed scattered throughout and a security fence bordered the majority of the subject property.

3.2 ENVIRONMENTAL SETTING

The subject property is located in the Las Vegas Valley which is one of the driest and warmest areas in the nation. The climate consists of hot summers, cool winters, and a wide fluctuation in annual rainfall. Temperatures through a year can range from average daily maximums in July of 104 degrees Fahrenheit (°F; see Appendix A) to average daily minimums in January of 33 °F.

Several washes and drainages traverse the subject property in a southerly direction. The drainages crossing the western portion of the subject property terminate in a retention basin, which prevents stormwater from flowing any further. Stormwater is lost through percolation and evaporation. The groundwater within the subject property is recharged by precipitation from the surrounding mountain ranges. On Nellis AFB, multiple shallow, semi-confined aquifers occur at depths from 75 to 90 feet below ground surface (bgs; see Appendix A) (Nellis AFB 2006b).

Soils within the subject property are made up of four complexes: (1) the Las Vegas-Skyhaven Complex, (2) the Weiser-Goodsprings Complex, (3) the McCarran-Grapevine Complex, and (4) an unnatural manmade cap located on LF-02 within the subject property (Nellis AFB 2006b). The topography within and in the vicinity of the subject area is relatively flat with small slopes near washes and drainages. However, overall topography within the area slopes downward to the south and southeast from the mountains toward the Las Vegas Valley. The average elevation of the subject property is approximately 1,925 feet above mean sea level.

Vegetation within the subject property is a combination of native vegetation and invasive species. Vegetation observed during the site reconnaissance included creosotebush (*Larrea tridentata*), white bursage (*Ambrosia dumosa*), desert globemallow (*Sphaeralcea ambigua*), desert marigold (*Baileya multiradiata*), cholla (*Cholla* spp.), Russian thistle (*Salsola paulsenii*) and cheatgrass (*Bromus tectorum*). Wildlife encountered during the site reconnaissance included Audubon's cottontail (*Sylvilagus audubonii*), whiptail (*Cnemidophorus* spp.), desert iguana (*Dipsosaurus dorsalis*), Gambel's quail (*Callipepla gambelii*), mourning dove (*Zeaida macroura*), pigeon (*Columba livia*), lesser nighthawk (*Chordeiles minor*), western flycatcher (*Empidonax difficilis*), and northern mockingbird (*Mimus polyglottus*).

3.3 HAZARDOUS SUBSTANCES

According to record searches, interviews, and a site reconnaissance, no evidence of petroleum products were observed within the subject property. However, the historic disposal of hazardous waste has occurred within and in the vicinity of LF-02.

3.3.1 Hazardous Materials and Petroleum Products

According to record searches, interviews, and a site reconnaissance, no evidence of hazardous materials or petroleum products were observed within the subject property.

3.3.2 Hazardous and Petroleum Waste

According to record searches, interviews, and a site reconnaissance, evidence of hazardous waste from historic disposal activities in connection with LF-02 (see Section 3.4), was observed within the subject property (see Section 3.4). Several monitor wells were observed around the perimeter of LF-02.

3.4 ENVIRONMENTAL RESTORATION PROGRAM SITES

According to Mr. Bernd Schmidt, RPM of the ERP at Nellis AFB, groundwater contamination has occurred under ERP site Nellis LF-02. LF-02 comprises 33 acres in the northeast boundary of the subject property. Active from 1958 to 1966, LF-02 reportedly received demolition debris, paint sludge from spray booths, and other miscellaneous wastes. Waste management operations included both trench and area-fill methods of disposal (Montgomery Watson, Inc. 1995). "Several wooden buildings were buried in the southern portion of the landfill in 1966," according to CH₂M Hill (1982). A graded and compacted soil cover was placed over LF-02 in 1996 with the approval of NDEP.

LF-02 currently has eight groundwater monitoring wells (Photographs 8 through 14; see Appendix C and Figure B3). Six wells (MW-7, MW-9, MW-53, MW-54, MW-88, and MW-89) are sampled annually, and all wells are sampled every five years. The most recent sampling event was conducted in September 2005 and was reported in February 2006 (Black & Veatch 2006). PCE and TCE concentrations were reported below EPA MCLs (<5 ppb) in all four sample wells during this event. No wells had reportable concentrations of other VOCs above MCLs during this event. These PCE and TCE concentrations are consistent with previous ERP site LF-02 trends. A full sampling event is scheduled for 2006. LF-02 is currently inactive and there are no plans for reactivation. By 2010, Nellis AFB will be submitting a No Further Action Decision Document to NDEP for concurrence that would eliminate the requirement for future long term groundwater monitoring.

3.5 STORAGE TANKS

3.5.1 Aboveground Storage Tanks

According to record searches, interviews, and a site reconnaissance, no aboveground storage tanks are within the subject property.

3.5.2 Underground Storage Tanks

According to interviews, document searches, and a site reconnaissance, no evidence of underground storage tanks were within the subject property.

3.5.3 Pipelines, Hydrant Fueling, and Transfer Systems

Petroleum pipelines were observed coming from the Kinder Morgan pipeline terminal located southeast of the subject property and crossing through the subject property. A 6-inch petroleum pipeline was observed within the southern portion of the subject property. Two other petroleum pipelines were observed paralleling the eastern side of the railroad tracks near the center of the subject property. Also, an abandoned petroleum pipeline was observed on the western side of the railroad tracks within the subject property (Photographs 15 and 16; see Appendix C and Figure B3).

3.6 OIL WATER SEPARATORS

According to record searches, interviews, and a site reconnaissance no evidence of oil water separators were observed within the subject property.

3.7 PESTICIDES

No visual evidence of the past use or storage of pesticides was observed within the subject property.

3.8 MEDICAL BIOHAZARDOUS WASTE

According to record searches, interviews, and a site reconnaissance, no visual evidence of medical biohazardous waste was observed within the subject property.

3.9 ORDNANCE

No visual evidence of ordnance was found within the subject property during the site reconnaissance. However, according to Mr. Patrick Quinn, ordnance were stored in bunkers in what is now the DRMO facility, adjacent to the subject property (see p. 23), from 1943 through the 1950s.

3.10 RADIOACTIVE WASTES

According to interviews, document searches, and visual observations, no evidence of current storage or disposal of radioactive waste was observed within the subject property.

3.11 SOLID WASTE

As mentioned earlier, LF-02 was once operated in the northeastern portion of the subject property. Additionally, numerous types of solid waste were observed during the site reconnaissance. Large amounts of household garbage and miscellaneous solid waste was observed within and near the banks of a wash located in the northwestern portion of the subject property. The solid waste included concrete and building debris, waste tires, household garbage, pieces of metal, old fuel filters and fuel tanks, empty metal cans and tops, and a concrete culvert. Several piles of fill dirt were observed scattered throughout the subject property (Photographs 17 through 28; see Appendix C). The fill dirt piles were located near the northern and western boundaries of the subject property and appeared to have been there for some time. Landing mat material on three raised earthen pads and survey markers were observed on the subject property west of the Security Forces building (Photographs 29 and 30; see Appendix C).

3.12 GROUND WATER

The depth to groundwater in the monitoring wells located adjacent to the subject property ranges from approximately 117 feet to 123 feet bgs (Black & Veatch 2006). As mentioned earlier, groundwater under LF-02 is contaminated with PCE, TCE, and VOCs, but below EPA MCLs. No other evidence of additional groundwater contamination was found during interviews and record searches of the subject property.

3.13 WASTEWATER TREATMENT, COLLECTION AND DISCHARGE

There was no historical or current evidence suggesting wastewater treatment, collection, or discharge occurred within the subject property.

3.14 DISCLOSURE ITEMS

3.14.1 Drinking Water Quality

Drinking water is not obtained from the subject property, nor has there been any evidence of public water wells found on the subject property. A large water tank was observed immediately north of the northern boundary of the subject property (Figure B2). No water wells or pumps

were observed near the water tank during the site reconnaissance. According to interviews, the water tank provides drinking water to Nellis AFB.

3.14.2 Asbestos

No buildings or structures that could contain asbestos were observed within the subject property.

3.14.3 Polychlorinated Biphenyls (PCBs)

A single transformer bearing a blue label was observed within the subject property (see Appendix C, Photograph 31). The blue label indicates that the transformer is free (<50 parts per million [ppm; see Appendix A]) of PCBs. This transformer was associated with a mobile guardhouse that had been located at the Nellis AFB Area III north gate. The guardhouse has since been removed.

A group of three transformers associated with the water reservoir pump house is located on the north boundary of the subject property (see Appendix C, Photograph 32). The transformers appear to be in good condition but are not labeled. According to Mr. Paul Kotanchik, 99 CES/CEVC, LBP/Asbestos Program Manager, all Nellis AFB transformers were tested in 1994 and any transformers containing PCBs were removed at that time and disposed of according to regulatory requirements. SSgt Kendrick Haywood, 99 CES/CEOIE, provided test results (GM920198; GM920199; GM920200) for the three transformers (148A, S/N 59362; 148B, S/N 59363; 148C, S/N 59361) showing that they are PCB-free (<50 ppm). The Exterior Electric Shop will affix labels to the three non-labeled transformers in the near future.

3.14.4 Radon

According to record searches, interviews, and a site reconnaissance, no radon sources were present within the subject property.

3.14.5 Lead-Based Paint

No buildings or structures that could contain lead-based paint were observed within the subject property.

SECTION 4.0
FINDINGS FOR ADJACENT PROPERTIES

4.0 FINDINGS FOR ADJACENT PROPERTIES

4.1 LAND USES

All of the property to the west of the subject property is owned by Nellis AFB and is undeveloped desert scrub. The DRMO area, which is southwest of the subject property, is used as a recycling facility of office furniture, aircraft parts, and other metal components generated by the base. A small piece of property contains the Security Forces building and the Joint Air and Space Tactics Center building and is adjacent to the western central portion of the subject property (Appendix B). A Weyerhaeuser lumber yard, property owned by an oil and grease recycling facility (Baker Commodities), and the Summit View Youth Correctional Facility border the subject property to the north. Undeveloped property owned by Peter Trust L.P. and MKB Co., and Flamingo Paradise Partners, LLC border the eastern portion of the subject property. The Kinder Morgan pipeline terminal borders the southeastern boundary of the subject property. The Marine Reserve Center's armory and the Mike O'Callaghan Federal Hospital are located near the southern portion of the subject property (Appendix B).

4.2 SURVEYED PROPERTIES

All of the properties adjacent to the subject property were visually inspected for hazardous materials/waste and petroleum products, but the inspection was limited to what could be seen from the boundaries of the subject property. No visual evidence of contamination or other environmental concerns were observed on the undeveloped rangeland to the west of the subject property (Photographs 33 and 34; see Appendix C). The properties where the Security Forces and Joint Air and Space Tactics Center buildings are located were inspected but no visual evidence of contamination or other environmental concerns were observed (Photograph 35; see Appendix C).

The DRMO area (Photograph 36; see Appendix C) was inspected from the boundary of the subject property. Aircraft parts and several 55-gallon drums filled with solid waste were observed (Photographs 37 and 38; see Appendix C). The limited inspection of the property owned by Baker Commodities (Photograph 39; see Appendix C) near the northern portion of the subject property revealed several buildings and large ASTs. A lumber yard and facility owned by Weyerhaeuser Company also bordered the subject property to the north (Photograph 40; see

Appendix C). A large water tank was observed near the northern boundary of the subject property located in between the Weyerhaeuser and Baker properties (Photograph 41; see Appendix C).

The Summit View Youth Correctional Facility was the last developed property partially inspected and is located to the north of the subject property (Photograph 42; see Appendix C). The undeveloped property to the east of the subject property (Photograph 43; see Appendix C) and the Kinder Morgan pipeline terminal that contained several large ASTs (tank farm) to the southeast of the subject property was partially inspected, but no visual evidence of contamination or environmental concerns were observed.

Information gathered from an interview with Mr. Schmidt indicated that groundwater contamination has occurred from the release of jet fuel and solvents in an area approximately 0.19 mile south and southeast of the subject property. According to a generalized contaminant plume map provided by Mr. Schmidt (Figure B4), five ERP sites have been designated for remediation by Nellis AFB. Site ST-27 contains a combination of BTEX and light non-aqueous phase liquid. Site SS-46 contains HVOCs and Site SS-28 is contaminated with BTEX, HVOCs, and light non-aqueous phase liquid. Site ST-44 contains HVOCs and BTEX and Site ST-45 is a small area contaminated with BTEX. Groundwater flow direction is towards the south/southeast, away from the subject property. In addition, Nellis AFB is actively remediating the contaminated groundwater using a pump-and-treat system. The treated groundwater is then used to irrigate the Nellis AFB golf course.

SECTION 5.0
APPLICABLE REGULATORY COMPLIANCE ISSUES

5.0 APPLICABLE REGULATORY COMPLIANCE ISSUES

5.1 LIST OF COMPLIANCE ISSUES

According to interviews and record searches, the groundwater in the vicinity of LF-02 is being monitored to maintain compliance. No information pertaining to non-compliance issues were found during interviews or document searches.

5.2 DESCRIPTION OF CORRECTIVE ACTIONS

No environmental compliance deficiencies exist on the subject property; therefore, no corrective actions will be required.

5.3 ESTIMATES OF VARIOUS ALTERNATIVES

No other alternative was considered under the Phase I EBS.

6.0 CONCLUSIONS

6.1 FACILITY MATRIX

No new facilities would be involved with the proposed lease of the subject property. The only existing easement occurring within the subject property is the petroleum pipelines from the Kinder Morgan pipeline terminal.

6.2 PROPERTY CATEGORIES MAP

A map categorizing the subject property (Figure B6) as it pertains to the presence of hazardous substances or petroleum products contamination is presented in Appendix B.

6.3 RESOURCES MAP

Since no critical resources are located on the subject property, no resource maps are attached.

6.4 DATA GAPS

The only data gap was the lack of appropriate historical documents back to 1940, particularly to the availability of appropriate 7.5-minute historic topographic quadrangles. Historical quadrangles were available for 1952, 1973, and 1974, but the topographic map from 1952 was at a greater scale than that recommended as a standard by ASTM. However, sufficient and credible information was obtained from historic aerials to make an accurate determination of the historical uses of the subject property and surrounding areas.

SECTION 7.0
RECOMMENDATIONS

7.0 RECOMMENDATIONS

Based on interviews, document searches, environmental database reviews, and a site reconnaissance, groundwater contamination exists at LF-02, located on the subject property, and at the Kinder Morgan pipeline terminal, southeast of the subject property. GSRC recommends that the landfill contamination information be included in the lease agreement with the contractor. Coordination with the Nellis AFB environmental personnel should be conducted prior to construction in the landfill area. The remaining solid waste scattered throughout the subject property should be disposed of in accordance with local, state, and Federal regulations by the responsible party. GSRC recommends that no further environmental studies be conducted for those areas not in close proximity to LF-02 and the pipeline terminal.

8.0 CERTIFICATIONS

ATTACHMENT 1

CERTIFICATION OF THE ENVIRONMENTAL BASELINE SURVEY

GSRC has conducted this Environmental Baseline Survey on behalf of the Air Force. GSRC has reviewed all appropriate records, and conducted visual site inspections of the selected facilities following an analysis of information during the record search. The information contained within the survey report, to the best of GSRC's knowledge, is correct and current as of 26 July 2006.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL RECORDS

RCRAInfo: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System(RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month Large quantity generators generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/09/2006 has revealed that there are 3 RCRA-LQG sites within the searched area.

EXECUTIVE SUMMARY

DOD: Consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

A review of the DOD list, as provided by EDR, and dated 12/31/2004 has revealed that there is 1 DOD site within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>	<u>Page</u>
NELLIS AIR FORCE BASE		0	3

TRIS: The Toxic Chemical Release Inventory System identifies facilities that release toxic chemicals to the air, water, and land in reportable quantities under SARA Title III, Section 313. The source of this database is the U.S. EPA.

A review of the TRIS list, as provided by EDR, and dated 12/31/2003 has revealed that there is 1 TRIS site within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>	<u>Page</u>
REBEL OIL CO INC	5054 NO SLOAN LN	13	30

FTTS: FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act) over the previous five years. To maintain currency, EDR contacts the Agency on a quarterly basis.

A review of the FTTS list, as provided by EDR, and dated 03/29/2006 has revealed that there is 1 FTTS site within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>	<u>Page</u>
NEVADA RECYCLING	5850 N NELLIS BLVD	2	6

ICIS: The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

A review of the ICIS list, as provided by EDR, and dated 02/13/2006 has revealed that there are 2 ICIS sites within the searched area.

EXECUTIVE SUMMARY

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 04/27/2006 has revealed that there are 18 FINDS sites within the searched area.

TIER 2: Emergency Planning and Community Right-to-Know Act (EPCRA) required facilities which store or manufacture hazardous materials to prepare and submit a chemical inventory report by March 1st of each year to the State Emergency Response Commission (SERC), LEPC and the local fire department. The inventory form must include information on all hazardous chemicals present at the facility during the previous calendar year in amounts that meet or exceed thresholds.

A review of the TIER 2 list, as provided by EDR, and dated 03/02/2006 has revealed that there are 6 TIER 2 sites within the searched area.

Other Pertinent Environmental Activity Identified at Site:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Other Pertinent Environmental Activity Identified at Site:

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/19/2006	Source: EPA
Date Data Arrived at EDR: 05/05/2006	Telephone: N/A
Date Made Active in Reports: 05/22/2006	Last EDR Contact: 05/05/2006
Number of Days to Update: 17	Next Scheduled EDR Contact: 07/31/2006
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

Date of Government Version: 04/19/2006	Source: EPA
Date Data Arrived at EDR: 05/05/2006	Telephone: N/A
Date Made Active in Reports: 05/22/2006	Last EDR Contact: 05/05/2006
Number of Days to Update: 17	Next Scheduled EDR Contact: 07/31/2006
	Data Release Frequency: Quarterly

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/19/2006	Source: EPA
Date Data Arrived at EDR: 05/05/2006	Telephone: N/A
Date Made Active in Reports: 05/22/2006	Last EDR Contact: 05/05/2006
Number of Days to Update: 17	Next Scheduled EDR Contact: 07/31/2006
	Data Release Frequency: Quarterly

NPL RECOVERY: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 05/23/2006

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/01/2006	Source: EPA
Date Data Arrived at EDR: 03/21/2006	Telephone: 703-413-0223
Date Made Active in Reports: 04/13/2006	Last EDR Contact: 06/22/2006
Number of Days to Update: 23	Next Scheduled EDR Contact: 09/18/2006
	Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 02/01/2006	Source: EPA
Date Data Arrived at EDR: 03/21/2006	Telephone: 703-413-0223

Number of Days to Update: 23	Next Scheduled EDR Contact: 09/18/2006
	Data Release Frequency: Quarterly

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 03/15/2006	Source: EPA
Date Data Arrived at EDR: 03/17/2006	Telephone: 800-424-9346
Date Made Active in Reports: 04/13/2006	Last EDR Contact: 05/21/2006
Number of Days to Update: 27	Next Scheduled EDR Contact: 09/04/2006
	Data Release Frequency: Quarterly

RCRA: Resource Conservation and Recovery Act Information

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator off-site to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

US BROWNFIELDS: A Listing of Brownfields Sites

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

EDR PROPRIETARY RECORDS

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oil waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2004
Date Data Arrived at EDR: 02/17/2006
Date Made Active in Reports: 04/07/2006
Number of Days to Update: 49

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Child Care Facility List

Source: Department of Human Resources
Telephone: 775-684-1100

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

INTERVIEWS WITH KEY SITE PERSONNEL NELLIS AIR FORCE BASE

Mr. D.J. Haarklau, Base Environmental Fuels Program Manager

On June 22, 2006, GSRC interviewed Mr. Haarklau regarding his knowledge of environmental incidents or spills that have occurred within or near the subject property. According to Mr. Haarklau, Nellis AFB is required to keep a record of all reportable quantity spills for a period of 5 years. He told GSRC that the base was in the process of preparing a facility response plan that lists all reportable quantity spills on base. Mr. Haarklau provided GSRC with a list of reportable spills that have occurred in the last 5 years, but none of the spills have occurred within the subject property. Mr. Haarklau also researched a spill report file for the subject property and said that there was nothing in the file pertaining to spills on the subject property. Mr. Haarklau advised GSRC that the DRMO area accepts recyclable material and batteries, but not fuel or petroleum, oil, and lubricants (POLs) are stored on-site. All containers are drained of their fluids before entering the DRMO area. Batteries are stored on containment pallets, and are banded, wrapped, and shipped for proper disposal.

Mr. Bernd Schmidt, Restoration Program Manager

On June 22, 2006, GSRC interviewed Mr. Schmidt to obtain information pertaining to historical or current releases or contamination within or in the vicinity of the subject property. According to Mr. Schmidt, he is the Restoration Program Manager at Nellis AFB and said that there have been historical releases of benzene, toluene, ethylbenzene, and xylenes (BTEX); halogenated volatile organic compounds (HVOCs); methyl tertiary butyl ether (MTBE) to groundwater; and light non-aqueous phase liquid south and southeast of the subject property. These releases have been identified and named under the Environmental Restoration Program (ERP). The sites include Sites ST-27, SS-46, SS-28, ST-44 and ST-45. Mr. Schmidt told GSRC that the base is currently remediating the contaminated groundwater through a pump and treat system, and the water is then used to irrigate the golf course on the base. Mr. Schmidt advised GSRC that a mixture of MTBE and BTEX product has been detected in the base's monitoring wells south of the Kinder Morgan pipeline terminal and said a monitoring report was conducted by TRC that determined the plume of contamination released from that facility.

Mr. Schmidt also told GSRC that a landfill under the ERP is located within the northeastern portion of the subject property, but is no longer in use. Mr. Schmidt told GSRC that numerous

types of waste were buried in the landfill including aircraft parts, concrete and building debris, and concrete bombs. According to Mr. Schmidt, URS Corporation was awarded with the 4-Base Performance Based Restoration Contract, which began in October 2005 and will run for five years. As part of this contract, URS has the responsibility to “close out” the landfill. Based on historical analytical groundwater data, which have shown no contaminants of concern above state maximum contamination levels (MCLs), URS Corporation will prepare a No Further Action Decision document to be signed by the 99th Air Base Wing Commander and the Chief, Bureau of Corrective Actions, NDEP. This would conclude the requirements to perform long term groundwater monitoring and the groundwater monitoring wells will be abandoned per state regulations; however, annual landfill cap integrity inspections will continue in perpetuity.

Mr. Patrick Quinn, Environmental Engineer

On June 22, 2006, GSRC questioned Mr. Patrick Quinn about his knowledge of any environmental incidents or concerns within or near the vicinity of the subject property. Mr. Quinn said that he knew of a landfill being located within the subject property and that a railroad and spur was located there also. He mentioned that the Defense Reutilization and Marketing Office (DRMO) Area was used as an ammunition storage area during World War II but is now used to store scrap metal, aircraft parts, and office furniture. When asked about the three pads and survey markers found within the subject property, he said that those were used in the late 1980s and early 1990s as part of a radar testing project. Mr. Quinn told GSRC that he remembers small mobile trailers on the pads with sewer hook-ups but nothing of concern.

Chief James Boley, Nellis AFB Fire Department

On June 29, 2006, GSRC contacted Chief Boley in regards to his knowledge of environmental incidents or fires that his department has responded to within or near the subject property. According to Chief Boley, who has been with the department for over 7 years, no environmental incidents or spills have occurred within the subject property. He mentioned that the department has responded to a couple of structure fires near the RV storage area off of Blytheville Drive, but nothing within or near the subject property.
