14. ABSTRACT The United States executive branch has grown substantially since its establishment. That growth translated into an enormous institution with capabilities, capacities, and authorities to handle the expanding needs of its citizens. Along with that expansion, the world in which the U.S. government functions is increasingly complex, challenging the vertical organizations of the federal, state, and local governments with horizontal problems. This thesis argues that to develop and sustain interagency success for the future, the U.S. must undertake initiatives along three lines of effort. First, an executive agent at the highest levels of the federal government must be tasked with monitoring, coordinating, and if necessary arbitrating interagency affairs. Second, institutionalized processes for interagency education need to become a requirement for career progression. Finally, a standardized approach to interagency education and training needs to be universally followed by executive departments and agencies. With declining budgets and increasingly complex problems, the U.S. must take seriously the need for increased interagency efficiency.
