Acknowledgments

Defense Manpower Data Center (DMDC) is indebted to numerous people for their assistance with the *2009 Survey of Reserve Component Spouses*, which was conducted on behalf of the Office of the Under Secretary of Defense for Personnel and Readiness (OUSD[P&R]). The survey program is conducted under the leadership of Timothy Elig, Director, *Human Resources Strategic Assessment Program* (HRSAP).

Policy officials contributing to the development of this survey included: James Scott, Col Cory Lyman (USAFR) and Col Cory Lyman (USCGR), from the Office of the Assistant Secretary of Defense for Reserve Affairs.

DMDC's Program Evaluation Branch, under the guidance of Kristin Williams, Branch Chief, is responsible for the development of questionnaires used in the survey program. Laverne Wright, Chief of Survey Operations, is responsible for the survey database construction and archiving. The lead survey design analyst was Rachel Lipari. She and Elizabeth Van Winkle designed the unique presentation of complex items used in this tabulation volume. She was supported in these efforts by Andrew Hale, Consortium Research Fellow.

DMDC's Personnel Survey Branch, under the guidance of Branch Chief David McGrath, is responsible for developing the sampling and weighting methods used in the survey program, and survey database construction and archiving. The lead operations analyst on this survey was Lisa Davis, supported by John Freimuth, Consortium Research Fellow. Michael Paraloglou, SRA International, Inc., used a customized sampling tool designed for this survey to plan the sample. He also created the sample weights for the survey data. Susan Reinhold, Carole Massey, and Deborah West, Northrup Grumman Corporation, provided programming support for the sampling and weighting tasks. Data Recognition Corporation (DRC) performed data collection and editing.

DMDC's Survey Technology Branch, under the guidance of Frederick Licari, Branch Chief, is responsible for the distribution of datasets outside of DMDC and maintaining records on compliance with the Privacy Act and 32 CFR 219.

Jacqueline Malone, SRA International, Inc., formatted and assembled this tabulation volume using DMDC's Survey Reporting Tool. A team consisting of Rachel Lipari, Lisa Davis, Elizabeth Van Winkle, and Andrew Hale completed quality control for this tabulation volume.

2009 SURVEY OF RESERVE COMPONENT SPOUSES: TABULATIONS OF RESPONSES

Introduction to the Survey

The *Human Resources Strategic Assessment Program* (HRSAP), Defense Manpower Data Center (DMDC), conducts both Web-based and paper-and-pencil surveys to support the personnel information needs of the Under Secretary of Defense for Personnel and Readiness (USD[P&R]). These surveys assess the attitudes and opinions of the entire Department of Defense (DoD) community on a wide range of personnel issues. *Human Relations Surveys* are in-depth studies of topics and populations, often requiring both paper-and-pen surveys and Web-based surveys, that take longer to develop, administer, and analyze.

This report contains tabulations of responses from the *2009 Survey of Reserve Component Spouses* (2009 RCSS) conducted March 27, 2009 to August 13, 2009. This introduction (1) summarizes the survey content, (2) defines the total population surveyed and the subgroups used in tabulations of responses, (3) summarizes the survey methodology,¹ and (4) provides details on how to use the tabulations. The tabulations and a copy of the survey items follow this introduction.²

Survey Content

The 2009 RCSS continues a line of research on Reserve spouses that began with the 1986 *Reserve Components Survey of Guard/Reserve Spouses*. In 1992, 2000, 2006, and 2008 DMDC conducted subsequent surveys of Reserve spouses. Many key topics covered by the 2009 RCSS were also included in its predecessors; however, questions have been updated, expanded, or streamlined in the 2009 RCSS. The survey was administered by both Web and paper-and-pen questionnaires. The Web version of the survey contained additional survey items, which are identified in the tabulations. The Web questionnaire appears in Appendix A, and the paper-and-pen questionnaire appears in Appendix B. The survey was subdivided into the following eight topic areas:

1. *Background Information*—Marital status, education, race/ethnicity, age, dependents, and eldest child's behavior compared to other children his/her age.
2. *Your Spouse's Activations/Deployments*—Member's time away from home, member's military technician status, activations and deployments since January 2004 and in the last 24 months,³ spouse's coping with and preparedness for deployments, spouse's stress during activation/deployment, spouse's use of military-provided programs or services, impact of activation/deployment on

¹ Details on survey methodology are reported by DMDC (2009).

² The survey was administered via the Web and paper-and-pen questionnaires. Question numbering differed between the Web and paper-and-pen questionnaires. The tabulations follow the order of items used on the Web administration. Appendix A provides the order of items used on the Web and Appendix B provides the order of items used on the paper-and-pen administration.

³ Due to an error in survey skip logic, respondents whose spouse had been activated since January 2004 but not deployed were not provided an opportunity to give their spouse's activation history in the past 24 months (Q17). To minimize confusion, Q17 is not included in this tabulation volume.

expenses/employment, spouse's expectations for deployment, location of most recent deployment, problems during more recent deployment, impact of most recent deployment, unit-provided communication with member, military-provided support for families, use of and satisfaction with unit or Service point of contact, use of and satisfaction with reunion and reintegration support services, and spouse's readjustment to member's return.

3. *Effect of Deployments on Children*—Child care during deployment, emotional/behavioral impact of deployment on most impacted child, ways child(ren) cope with deployments, and impact of deployment on other children in household.
4. *Activation/Deployment Expectations*—Reduced and extended lengths of activation/deployment, having to leave sooner than expected, having less time between activations/deployments than expected, overall preparation for future deployments, and financial steps taken to prepare for deployments.
5. *Feelings About the National Guard/Reserve*—Overall satisfaction with the National Guard/Reserve way of life, support for member's participation, factors affecting spouse support, spouse's expectations for time away from home in the past year and impact of expectation on support, problems in personal relationship in the past year, and spouse's identification with National Guard/Reserve way of life.
6. *Well-Being*—Perceptions of stress and mental health problems in the past 30 days.
7. *Medical/Dental Coverage*—Current types of medical and dental coverage, use of TRICARE medical and dental programs in the past 24 months, and comparisons between TRICARE and civilian medical and dental plans.
8. *Internet Communications*—Participation in online communities, interest in military blogging, and use of TroopTube.

Population and Reporting Categories

The target population for the 2009 RCSS consists of spouses of Reserve component members from the Selected Reserve in Reserve Unit, Active Guard/Reserve (AGR/FTS/AR;⁴ Title 10 and Title 32), or Individual Mobilization Augmentee (IMA) programs from the Army National Guard (ARNG), U.S. Army Reserve (USAR), U.S. Navy Reserve (USNR), U.S. Marine Corps Reserve (USMCR), Air National Guard (ANG), U.S. Air Force Reserve (USAFR), and U.S. Coast Guard Reserve (USCGR) who (1) have at least six months of service at the time the questionnaire is first fielded and (2) are below flag rank. In addition, for the spouse to remain eligible they must indicate that at the time of the survey they were currently married to a Reserve component member.⁵ Survey results are

⁴ Names for this program vary among Reserve components: AGR/FTS/AR is a combination of Active Guard/Reserve (AGR), Full-Time Support (FTS), and Active Reserve (AR).

⁵ A Reserve component member married to another Reserve component member would be eligible for the survey depending on their spouse's status, not their own.

presented for the total DoD population⁶ and by a variety of reporting categories. To form the reporting categories for the tabulations, respondents are classified by administrative record data for member categories of Reserve component, paygrade, Selected Reserve program (except *Military Technician*), and the spouse category of gender. The remaining reporting categories are based on survey self-report. Definitions for reporting categories follow:

- *Member Component*—The categories include Army National Guard (ARNG), U.S. Army Reserve (USAR), U.S. Navy Reserve (USNR), U.S. Marine Corps Reserve (USMCR), Air National Guard (ANG), and U.S. Air Force Reserve (USAFR).
- *Member Paygrade*—The *Enlisted* subgroup includes all enlisted paygrades (E1-E9). The *Enlisted* subgroup is broken into the following groups: *E1 – E4s* and *E5 – E9s*. The *Officers* subgroup includes warrant officers and commissioned officers (*O1 – O3* and *O4 – O6*).
- *Member Component by Paygrade*—The categories include each of the components by enlisted and officer paygrade groups.
- *Member Selected Reserve Program/Activation Status*—The category *Reserve Unit* is comprised of members from each Reserve component who attend weekend drills with Reserve units. Reserve unit members from the ARNG, USAR, ANG, and USAFR can also be categorized as *Military Technicians*. Military Technicians are tabulated in the *Military Technician* category and in the Reserve Unit category. *AGR/FTS/AR* is comprised of members in full-time service. *IMA* includes Individual Mobilization Augmentees from the USAR, USNR, USMCR, and the USAFR. With the exception of self-report data for Military Technicians, respondents are categorized using administrative record data only.
- *Activated/Deployed*—This category includes members whose spouses reported that they were not called to active duty since January 2004. *Activated* includes members who have been involuntarily or voluntarily called to active duty for more than 30 consecutive days in support of a contingency since January 2004 under the provision of 10 USC 12301(a) (Full Mobilization), 10 USC 12301(d) (Voluntary Active Duty), 10 USC 12302 (Partial Mobilization), or 10 USC 12304 (Presidential Reserve Callup). *Deployed* includes members whose spouses reported that they were deployed since January 2004. *Not Deployed* includes members whose spouses reported that they have not been called to active duty for more than 30 consecutive days since January 2004.
- *Spouse Gender*—This category is self-explanatory.

⁶ Total DoD reflects the responses from spouses of Army National Guard, U.S. Army Reserve, U.S. Navy Reserve, U.S. Marine Corps Reserve, Air National Guard, and U.S. Air Force Reserve. Responses from spouses of U.S. Coast Guard Reserve members are tabulated separately.

- *Spouse Education*—Respondents are classified based on self-reported educational attainment. *No College* includes those without any college credit. *Some College* includes those with some college credit, including a two-year degree, but does not include those with a four-year degree. *4-Year Degree* includes those with a four-year degree and those with some graduate school, but no graduate or professional degree. *Graduate/Professional Degree* includes those with masters, doctorates, and other professional degrees.
- *Spouse Race/Ethnicity*—Respondents are classified based on self-reported categories consistent with requirements of the *Standards for Maintaining, Collecting, and Presenting Federal Data on Race and Ethnicity* (1997). *Total Minority* includes all persons marking one or more of the races other than White and/or marking that they are Spanish/Hispanic/Latino. *Non-Hispanic Black* includes persons marking only Black or African American and not reporting being Spanish/Hispanic/Latino. *Hispanic* includes anyone marking that they are Spanish/Hispanic/Latino, regardless of how they answered the question on race.
- *Spouse Age*—Categories include *25 Years Old or Younger*, *26 to 30 Years Old*, *31 to 35 Years Old*, *36 to 40 Years Old*, and *More Than 40 Years Old*.
- *Family Status*—Categories include *With Child(ren)*, indicating the spouse has at least one child or other legal dependent under the age of 19, and *Without Child(ren)*, indicating spouses who either have no children or other legal dependents or only have children or other legal dependents that are 19 years old or older.
- *Coast Guard*—Includes all spouses of Coast Guard members, and is further broken down into the following subcategories: member paygrade and activation status since January 2004; spouse gender and education status; and family status.

Survey Methodology

The Web survey administration process began on March 27, 2009, with the mailout of notification letters to members of the sample. The notification letter explained why the survey was being conducted, how the survey information would be used, and why participation was important. Throughout the administration period, additional e-mail and postal reminders were sent to encourage survey participation. Data were collected between April 13, 2009 and August 13, 2009. Paper surveys were mailed on April 20, 2009, to those who did not respond via the Web.

Single-stage, nonproportional stratified random sampling⁷ procedures were used. The sample consisted of the spouses of 66,412 members drawn from the sample frame constructed from DMDC's August 2008 *Reserve Components Common Personnel Data System*. Spouses of the sample became ineligible if they indicated in the survey or by other contact (e.g., telephone calls to the data collection contractor) that they were divorced, widowed, or their husband or wife was no longer in a National Guard/Reserve component as of the first day of the Web survey, April 13, 2009 (7.25% of sample).

Completed surveys (defined as 50% or more of the survey questions asked of all participants being answered, including the two critical questions, Q1 and Q2) were received from 15,244 eligible respondents (14,534 DoD and 709 USCGR).⁸ The overall weighted response rate for eligibles, corrected for nonproportional sampling, was 29% (28% for DoD, and 31% for USCGR).

Data were weighted using the industry standard three-stage process. This form of weighting produces survey estimates of population totals, proportions, and means (as well as other statistics) that are representative of their respective populations. Unweighted survey data, in contrast, are likely to produce biased estimates of population statistics. The three-stage process of weighting consists of the following steps:

- *Adjustment for selection probability*—Probability samples such as the sample for this survey are selected from lists and each member of the list has a known nonzero probability of selection. For example, if a list contained 10,000 members in a demographic subgroup and the desired sample size for the subgroup was 1,000, one in every tenth member of the list would be selected. During weighting, this selection probability (1/10) is taken into account. The base, or first weight, used to adjust the sample is the reciprocal of the selection probability. In this example, the adjustment for selection probability (base weight) is 10 for members of this subgroup.
- *Adjustments for nonresponse*—Some sampled spouses do not respond to the survey. Continuing the previous example, suppose only half of the spouses sampled, 500, completed and returned a survey. Because the unweighted sample size would only be 500, weights are needed to project the sample up to the subgroup population total (10,000). In this case, the base-weighted respondents would sum to only 5,000 weighted respondents. To adjust for nonresponse, the base weights are multiplied by the reciprocal of the nonresponse rate. In this example, the base weight (10) is multiplied by the reciprocal of the nonresponse rate (2) to create a new weight of 20. The weighted sample sums to the subgroup population total of 10,000.

⁷ In stratified random sampling, all members of a population are categorized into homogeneous groups. For example, spouses might be grouped by the gender and Reserve component of their husband or wife (e.g., spouses of all male USAR personnel in one group, spouses of all female USNR personnel in another). Within each group, spouses of Reserve members are chosen at random. Small groups are oversampled in comparison to their proportion of the population so there will be enough responses from small groups to analyze. Weights are used so that groups are correctly represented in the analyses.

⁸ Reserve component information was not available for one respondent.

- *Adjustment to known population values*—The first of the two previous weighting adjustments are applied according to the demographic groupings used in designing the subgroups for the sample. The third is based on population characteristics that are known to be related to whether a sample person responds to the survey. Because the sample design and adjustments for nonresponse cannot take into account all demographic differences related to who responds to a survey and how they respond, auxiliary information is used to increase the precision of survey estimates. For this reason, a final weighting adjustment is computed that reproduces population totals for important demographic groupings related to who responds to a survey and how they might answer the survey. Suppose in our example the population for the subgroup was 8,500 men and 1,500 women but the nonresponse-adjusted weighted estimates from the respondents were 7,000 men and 3,000 women. To dampen this possible bias and reproduce known population totals, the weights would be adjusted by 1.21 for men and 0.5 for women so that the final weights for men and women would be 24.3 and 10 which would give unbiased estimates of the total and of women and men in the subgroup.

Table 1 (pages 8-9) shows the number of respondents and the portion of total respondents in each reporting group. Also shown are the *estimated* number of respondents and the *estimated* portion of total respondents in each reporting group. Differences in the percentages of respondents and population for the reporting categories reflect differences in the number sampled, as well as differences in response rates.⁹

Tabulation Procedures

Tabulations¹⁰ for each question from the survey are shown on a set of facing pages. The text of questions and response options are shown at the top of the even-numbered pages with only the question number repeated on the odd-numbered pages. The central feature of the tabulations is the percentage of spouses choosing the response options indicated by the column heading. Within a set of response options, percentages may not add to 100% due to rounding error.

Where an item lends itself to presentation as an average, that average is also shown as a number estimate and in a bar chart. The averages lend themselves to a quick scan for reporting groups differing from other similarly defined groups. Where a true response continuum is available (e.g., number of children), the mean of that continuum is presented; in other cases, the responses are averages of the numeric scales presented with the response options. Where there is a simple binomial response (e.g., yes/no), only one percentage is presented. In this case, the bar chart represents that percentage.

On each page of tabulations, the first column lists the reporting group shown in that row. The second column, *Percent Responding*, lists the portion of the reporting group represented in the estimates in that row. In most cases, if this percentage is not 100, it

⁹ There is also a slight difference in the treatment of missing data. Cases with missing data are included in counts of respondents, but are excluded from population estimates.

¹⁰ Details of data editing and preparation are provided by DMDC (2009).

reflects item nonresponse, and the table note indicates that “Percent responding are Reserve component spouses who answered the question.”

Not all questions will apply to every respondent. Respondents to the paper-and-pen version of the survey are instructed to skip questions that do not apply to them (based on their answers to previous questions). Where possible, the Web survey is programmed to skip respondents over questions that do not apply to them. For example, Q76 (How do the following aspects of your or your family’s TRICARE dental coverage compare to what is available in the civilian world?) does not apply to those who marked in Q75 that they have not used TRICARE Dental Program or civilian dental plan in the past 24 months or who marked in Q72 that they were not TRICARE eligible. The table note for this question indicates that the “Percent responding are Reserve component spouses who answered the question and who used both TRICARE Dental Program and a civilian dental plan in the past 24 months (Q72/Q75).”

The survey does not always skip questions that do not apply to the respondents. In the tabulations, *Does not apply* responses are typically included in the percentages in the *Percent Responding* column. For example, Q51 asked spouses if their child continued to participate in regularly scheduled activities while the Reserve component member was deployed. Respondents can indicate the question does not apply. In other cases, the *Does not apply* response is tabulated separately. For example, Q37 asked spouses how satisfied they were with the assistance they received from the unit or Service point of contact. Responses of *Does not apply; I did not interact with the unit or Service point of contact* were tabulated separately, as responses to the constructed question *Did you interact with the unit or Service point of contact?*

Because the survey contains open-ended questions, not all responses are tabulated. For example, Q38 asked spouses about how the military could have provided better support to them and/or their family during deployments. Since it is not feasible to tabulate the wide range of responses, the open-ended responses for Q38 are not tabulated.

Paper and Web Survey Comparability

On occasion, the paper and Web versions of the survey differ. These differences result from the technological advantages and requirements available in a Web-based survey. Question stems differ slightly between the paper and Web versions of the survey. On the paper version of the survey, question stems will refer to specific survey items, whereas questions on the Web version are not numbered. The Web version of the survey contains additional survey items, as well as more open-ended questions.

In addition to variations in the question text between the paper and Web versions of the survey, the survey response options also differ at times. A common difference between the surveys is the use of *Does not apply* response options on the paper version that are unnecessary in the Web version due to “smart skip” technology. For example, Q54 of the paper version (If you have more than one child, were all of your children impacted to the same extent by your spouse’s deployment?) has a response option of *Does not apply; I only have one child* for respondents who had previously indicated in Q45 they had only one child living with them during their spouse’s most recent deployment. For the Web version, respondents who had indicated that they had only one child living with them during their spouse’s most recent deployment are automatically skipped over the question.

In other cases, the response option of *Does not apply* on the paper version is not necessary because the question is asked as separate items on the Web survey. For example, in Q15 of the paper version, respondents are asked how many times their spouses were away from home for more than 30 consecutive days because of a deployment since January 2004. Spouses could either enter the number of times or mark *None*. On the Web version, respondents were asked in a preceding question whether any of their spouse’s activations resulted in deployment since January 2004. If respondents answered “No” to this question (Q15) on the Web survey, they were automatically skipped over the question asking how many times their spouse were away from home for more than 30 consecutive days because of a deployment since January 2004.

In constructing the dataset that combines responses from paper and Web surveys, the Web version of questions was typically used. The responses to the paper-and-pen version of the questions were recoded to comply with the Web version. Exceptions may occur when the tabulation of a survey item would benefit from presenting responses in a manner representative of the total population, as opposed to only the applicable population, by coding respondents who were skipped over the question to force their inclusion.

Combining Information From Multiple Items or Response Options

Tabulations in this volume generally present data for individual survey questions.¹¹ There are three exceptions. The first type of exception is where the results for multiple items are presented on a single set of pages.

- In 27a-e, spouses were asked whether they experienced a change in independence, confidence, self-sufficiency, faith/spirituality, and/or other personal characteristics as a result of deployment. In addition to a tabulation showing the percentage of those who indicated “Increased,” “No change,” or “Decreased” for each item, a composite tabulation shows the total percentage of those who indicated “Increased” to any of the subitems a-e.

¹¹ Demographic information based on member administrative data is also presented. For example, member Reserve component, paygrade, and spouse gender were constructed from administrative data.

The second exception is where spouses can provide multiple answers to a single question.

- In Q7, spouses were asked to mark one or more races. The tabulations show the percentage who responded that they were *White*, *Black* or *African American*, *American Indian* or *Alaska Native*, *Asian*, or *Native Hawaiian* or *Other Pacific Islander*. Respondents who indicated more than one race are also shown in the percentage of *More than one race*. For example, if a respondent indicated they were *Asian* and *White*, they were counted in the percentage as *Asian*, *White*, and *More than one race*.

The third exception pertains to a constructed composite measure (e.g., scales, incident rates, summary variables) described below. For example, a scale for spouse perceived stress was constructed from multiple items. Individual items in each measure are presented first followed by tabulation pages showing composite measure results.

- *Military Career Support*—A two-item composite measure indicating whether spouse support for the member's military career decreased as a result of the member being away more than expected. This was constructed from Q62 and Q63. The tabulation shows the percentage of spouses who indicated in Q62 that the member spent more time away from home than expected, and who also indicated in Q63 that their support had decreased.
- *Identification Scale*—A four-item (Q66a-d) composite measure indicating how much a spouse identifies with the military. The items are scored 1-5. Scores were reported as a single figure, which is the average of the individual scores (range 1-5). Higher scores indicate stronger identification.
- *Perceived Stress Scale*—To evaluate stress levels, spouses were asked about their emotional experiences/reactions in the month prior to taking the survey. The scale measure consists of four items (Q67a-d) from the *Perceived Stress Scale*® (Cohen & Williamson, 1988). For the purposes of this report, Q67b-c were reverse-coded. The items are scored 0 to 4. Scores are reported as a single figure, which is the sum of the individual scores (range 0 to 16). Higher scores indicate greater perceived stress.
- *Depression Scale*—Question 69a-h contains the first eight questions from the Patient Healthcare Questionnaire (PHQ-9). The PHQ-9 is a well-validated clinical tool which is consistent with the DSM-IV criteria for depressive disorders. The full nine-item scale includes the item "Thoughts that you would be better off dead or hurting yourself in some way." This

item was not included to comply with a decision by the survey's Institutional Review Board.¹²

Margins of Error

The complex sample design required weighting to produce population estimates (e.g., percent female).¹³ Because of weighting, conventional formulas for calculating the margin of error will overstate the reliability of the estimate. For this report, variance estimates were calculated for the report using SUDAAN[®] PROC DESCRIPT (Research Triangle Institute, Inc., 2004).

By definition, sample surveys are subject to sampling error. Standard errors are estimates of the variance around population parameters (such as percentages or means) and are used to construct margins of error (i.e., confidence interval half-widths). Percentages and means in these tabulations are reported with margins of error based on 95% confidence intervals. In order to compress the data display, only the maximum margin of error (Max ME) for each reporting category is shown. That is, the tab volume shows only the largest margin of error for the percentages or means in each row. For each average shown in these tabulations, its margin of error is also printed.

The following reporting conventions are used:

- "0" indicates that no one in any reporting group selected the response option,
- NR indicates the estimate is *Not Reportable* and is suppressed because of low reliability. Estimates of low reliability are suppressed based on criteria defined in terms of nominal sample size (less than 5), effective sample size (less than 15), or relative standard error (greater than 0.3),
- NA indicates the question was *Not Applicable* because the question did not apply to respondents in the reporting category based on answers to previous questions,
- no Max ME is printed when all percentages in the row are shown as NR,
- no margin of error is printed for an average when it is shown as NR.

¹² We recognize that dropping this subitem means that the depression scale will no longer be an intact measure and subsequently a total score for the remaining items would not be generalizable with regard to normative samples. However, we believe there is still value in retaining the eight questions because these items correspond to the most commonly reported symptoms associated with depression.

¹³ As a result of differential weighting, only certain statistical software procedures, such as SUDAAN[®], correctly calculate standard errors, variances, or tests of statistical significance.

Note. Percent responding are Reserve component spouses who answered the question. Perceived stress scale scores are calculated by reverse coding responses B and C and then summing across the items. The scale ranges from 0 to 16. A higher scale score indicates a higher level of stress. For details, see Cohen & Williamson (1988). Cronbach's coefficient alpha = 0.76.

Note. Percent responding are Reserve component spouses who answered the question. The scale ranges from 1 to 4. Higher scores indicate higher levels of depression. Cronbach's coefficient alpha = 0.91. One item, "Thoughts that you would be better off dead, or of hurting yourself in some way," on the Patient Health Questionnaire (PHQ-9) Depression scale was excluded from this survey.

PRIVACY ACT STATEMENT & INFORMED CONSENT INFORMATION

In accordance with the Privacy Act, this notice informs you of the purpose of the survey and how the findings of these surveys will be used. It also provides information about the Privacy Act and about informed consent. Please read it carefully.

AUTHORITY: 10 United States Code, Sections 136, 1782, 2358. 14 United States Code, Section 1.

PRINCIPAL PURPOSE: Information collected in this survey will be used to research attitudes and perceptions of military spouses. This information will assist in the formulation of policies which may be needed to improve the programs that benefit military families. Reports will be provided to the Office of the Secretary of Defense, the United States Coast Guard, each Military Department, and the Joint Chiefs of Staff. Findings will be used in reports and testimony provided to Congress. Some findings may be published by the Defense Manpower Data Center (DMDC) or in professional journals, or presented at conferences, symposia, and scientific meetings. Data could be used in future research. Datasets without any identifying information may be analyzed by researchers outside of DMDC. Briefings and reports on results from these surveys will be posted on the Web: <http://www.dmdc.osd.mil/surveys/>

ROUTINE USES: None.

DISCLOSURE: Providing information on this survey is voluntary. Most people can complete the survey in 16-30 minutes. There is no penalty or loss of benefits to which you are entitled if you choose not to respond. However, maximum participation is encouraged so that the data will be complete and representative. Your survey responses will be treated as confidential. Identifying information will be used only by government and contractor staff engaged in, and for purposes of, the survey research. For example, the research oversight office of the Office of the Under Secretary of Defense (Personnel and Readiness), and representatives of the U.S. Army Medical Research and Materiel Command are eligible to review research records as a part of their responsibility to protect human subjects in research. This survey is being conducted for research purposes. In no case will individual identifiable survey responses be reported. If you answer any items and indicate distress or being upset, etc., you will not be contacted for follow-up purposes. However, if you indicate a direct threat to harm yourself or others within responses or communications about the survey, because of concern for your welfare, DMDC will notify an office in your area for appropriate action.

SURVEY ELIGIBILITY AND POTENTIAL BENEFITS: DMDC uses well-established, scientific procedures to randomly select a sample that represents the Defense community based on combinations of demographic characteristics (e.g., location, Service). This is your chance to be heard on issues that directly affect you, including child care programs, employment programs, and morale and retention programs. While there is no direct benefit for your individual participation, your responses on this survey make a difference.

STATEMENT OF RISK: The data collection procedures are not expected to involve any risk or discomfort to you. The only risk to you is accidental or unintentional disclosure of the data you provide. However, the government and its contractors have a number of policies and procedures to ensure that survey data are safe and protected. For example, no identifying information (name, address, Social Security Number) is stored in the same file as survey responses. Survey data may be shared with organizations doing research on DoD personnel but only after minimizing detailed demographic data (for example, paygrade and detailed location information) that could possibly be used to identify an individual. A confidentiality analysis is performed to reduce the risk of there being a combination of demographic variables that can single out an individual. Government and contractor staff members have been trained to protect client identity and are subject to civil penalties for violating your confidentiality.

A respondent may experience discomfort or desire help with problems while completing the survey. Contact information is provided here:

- E-mail: RCSSurvey@osd.pentagon.mil
- Fax: 1-763-268-3002

FREQUENTLY ASKED QUESTIONS

What is Defense Manpower Data Center (DMDC)?

- DMDC maintains the largest archive of personnel, manpower, training, and financial data in DoD. DMDC also conducts Joint-Service surveys including Status of Forces, QuickCompass, and Human Relations for the Department of Defense. To learn more, visit the DMDC Web site:

<http://www.dmdc.osd.mil/>

What is the Human Relations (HR) Survey Program?

- HR is a DoD personnel program that features Web-based surveys sponsored by the Under Secretary of Defense for Personnel and Readiness (USD[P&R]).
- These surveys enable the DoD to regularly assess the attitudes and opinions of the DoD community—active duty and Reserve component members and their spouses—on the full range of personnel issues.

How do I know this is an official, approved DoD survey?

- In accordance with [DoD Instruction 8910.01](#), all data collection in the Department must be licensed and show that license as a Report Control Symbol (RCS) with an expiration date. The RCS for this survey is RCS# DD-P&R(AR) 2145, expiring 02/28/2011.

How did you pick me?

- DMDC uses well-established, scientific procedures to randomly select a sample that represents the Defense community based on combinations of demographic characteristics (e.g., location, Service).

Why should I participate?

- This is your chance to be heard on issues that directly affect you, including the impact of deployments on you and your spouse and children, your employment opportunities and overall satisfaction with military life.
- Your responses on this survey **make a difference**.

How do I participate?

- The survey will be available at this Web site around April 13, 2009. Currently you may (1) read the Privacy Act Statement, (2) verify contact information, and (3) provide e-mail address(es) so we can notify you when the survey opens.

What is RCSSurvey@osd.pentagon.mil?

- The official e-mail address for communicating with the DoD about the Survey of Military Spouses. "RCSSurvey" is short for Reserve Component Spouses Survey.

Why am I being asked to use the Web?

- Web administration enables us to get survey results to senior Defense leaders faster.

Why are you using a .net instead of a .mil domain to field your survey?

- The survey is administered by our contractor, Data Recognition Corporation, an experienced survey operations company. The survey collection tool starts on a .mil site within DMDC. Once you enter your ticket number you are redirected to a contractor site which uses a .net domain. This allows everyone to access the survey, even from a non-government computer.

Do I have to take the survey in one sitting?

- No, it is not necessary to complete the survey in one sitting. From any survey item, just click the *Save and Return Later* button. All of your responses are saved. When you return to the Web site, enter your Ticket Number and PIN. You will re-start the survey at the point you stopped.

Why does the survey ask personal questions?

- DMDC reports overall results, as well as by other characteristics, such as education level, employment status. To complete these analyses, we must ask respondents for demographic information.
- Analyzing results in this way provides Defense leaders information about the attitudes and concerns of all subgroups of personnel so that no groups are overlooked.
- Sometimes sensitive questions are asked in order to improve personnel policies, programs, and practices. As with all questions on the surveys, your responses will be held in confidence.

Will my answers be kept private?

- Your privacy will be safeguarded in accordance with the Privacy Act of 1974 (Public Law 93-579). [Privacy Act Statement](#)
- All data will be reported in the aggregate and no individual data will be reported.

Can I withdraw my answers once I have started the survey on the Web?

- If you wish to withdraw your answers, please notify the Survey Processing Center prior to July 14, 2009 by sending an e-mail to RCSSurvey@osd.pentagon.mil or calling, toll-free 1-800-881-5307. Include your name, Ticket Number and PIN.

Will I ever see the results of the survey?

- DMDC posts survey results on the following Web site:

PRIVACY ACT & INFORMED CONSENT

In accordance with the Privacy Act, this notice informs you of the purpose of the Human Resources Strategic Assessment Program (HRSAP). Surveys and how the findings of these surveys will be used. It also provides information about the Privacy Act and about informed consent. Please read it carefully.

Returning this survey indicates your agreement to participate in this research.

AUTHORITY: 10 United States Code, Sections 136, 1782, and 2358. 14 United States Code, Section 1.

PRINCIPAL PURPOSE: Information collected in this survey will be used to research attitudes and perceptions of military spouses. This information will assist in the formulation of policies for programs that benefit military families. Reports will be provided to the Office of the Secretary of Defense, the United States Coast Guard, each Military Department, and the Joint Chiefs of Staff. Findings will be used in reports and testimony provided to Congress. Some findings may be published by the Defense Manpower Data Center (DMDC) or in professional journals, or presented at conferences, symposia, and scientific meetings. Data could be used in future research. Datasets without any identifying information may be analyzed by researchers outside of DMDC. Briefings and reports on results from these surveys will be posted on the following Web site: <http://www.dmdc.osd.mil/surveys/>.

ROUTINE USES: None.

DISCLOSURE: Providing information on this survey is voluntary. Most people take 16-30 minutes to complete the survey. There is no penalty or loss of benefits to which you are entitled if you choose not to respond. However, maximum participation is encouraged so that the data will be complete and representative. Your survey responses will be treated as confidential. Identifying information will be used only by government and contractor staff engaged in, and for purposes of, the survey research. For example, the research oversight office of the Office of the Under Secretary of Defense (Personnel and Readiness) and representatives of the U.S. Army Medical Research and Materiel Command are eligible to review research records as a part of their responsibility to protect human subjects in research. This survey is being conducted for research purposes. In no case will individual identifiable survey responses be reported. If you answer any items and indicate distress or being upset, etc., you will not be contacted for follow-up purposes. However, if you indicate a direct threat to harm yourself or others within responses or communications about the survey, because of concern for your welfare, DMDC will notify an office in your area for appropriate action.

SURVEY ELIGIBILITY AND POTENTIAL BENEFITS: DMDC uses well-established, scientific procedures to randomly select a sample that represents the Defense community based on combinations of demographic characteristics (e.g., location, Service). This is your chance to be heard on issues that directly affect you, including child care programs, employment programs, and morale and retention programs. While there is no direct benefit for you for your individual participation, your answers on a survey **make a difference**.

STATEMENT OF RISK: The data collection procedures are not expected to involve any risk or discomfort to you. The only risk to you is accidental or unintentional disclosure of the data you provide. However, the government and its contractors have a number of policies and procedures to ensure that survey data are safe and protected. For example, no identifying information (name, address, Social Security Number) is stored in the same file as survey responses. Survey responses may be shared with organizations doing research on military spouses but only after minimizing detailed demographic data (for example, paygrade and detailed location information) that could possibly be used to identify an individual. A confidentiality analysis is performed to reduce the risk of there being a combination of demographic variables that can single out an individual. To further minimize this risk, some variables are randomly set to missing. Government and contractor staff members have been trained to protect client identity and are subject to civil penalties for violating your confidentiality.

A respondent may experience discomfort or desire help with problems while completing the survey. To reach Military OneSource 24/7 call a hotline number:

14. ABSTRACT The 2009 RCSS continues a line of research on Reserve spouses that began with the 1986 Reserve Components Survey of Guard/Reserve Spouses. In 1992, 2000, 2006, and 2008 DMDC conducted subsequent surveys of Reserve spouses. Many key topics covered by the 2009 RCSS were also included in its predecessors; however, questions have been updated, expanded, or streamlined in the 2009 RCSS. The survey was administered by both Web and paper-and-pen questionnaires. Topic areas in this survey include: spouse deployment, effect of deployments on children, activation/deployment expectations, feelings about the National Guard and Reserve, well-being, medical/dental coverage, and internet communications.
