Report Documentation Page				Form Approved OMB No. 0704-0188	
Public reporting burden for the collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to a penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.					
1. REPORT DATE OCT 2005		2. REPORT TYPE		3. DATES COVERED 00-00-2005 to 00-00-2005	
4. TITLE AND SUBTITLE Surveying Systems Engineering Effectiveness				5a. CONTRACT NUMBER	
				5b. GRANT NUMBER	
				5c. PROGRAM ELEMENT NUMBER	
6. AUTHOR(S)				5d. PROJECT NUMBER	
				5e. TASK NUMBER	
				5f. WORK UNIT NUMBER	
7. PERFORMING ORGANIZATION NAME(S) AND ADDRESS(ES) Carnegie Mellon University,Software Engineering Institute,Pittsburgh,PA,15213				8. PERFORMING ORGANIZATION REPORT NUMBER	
9. SPONSORING/MONITORING AGENCY NAME(S) AND ADDRESS(ES)				10. SPONSOR/MONITOR'S ACRONYM(S)	
				11. SPONSOR/MONITOR'S REPORT NUMBER(S)	
12. DISTRIBUTION/AVAILABILITY STATEMENT Approved for public release; distribution unlimited					
13. SUPPLEMENTARY NOTES NDIA 8th Annual Systems Engineering Conference, October 2005.					
14. ABSTRACT					
15. SUBJECT TERMS					
16. SECURITY CLASSIFICATION OF:			17. LIMITATION OF ABSTRACT Same as Report (SAR)	18. NUMBER OF PAGES 18	19a. NAME OF RESPONSIBLE PERSON
a. REPORT unclassified	b. ABSTRACT unclassified	c. THIS PAGE unclassified			

Background

Case studies have shown that properly implemented systems engineering can result in commensurate benefits

Broadly applicable quantification of these costs and benefits remains elusive

- Complicated by the lack of a broadly accepted definition of Systems Engineering
- Insufficient identification and tracking of Systems Engineering costs and efforts
- Exacerbated by increasing complexity and size of systems and Systems of Systems

The Task

The Office of the Under Secretary of Defense (AT&L) has tasked the NDIA Systems Engineering Division to research and report on the costs and benefits associated with Systems Engineering practices in the acquisition and / or development of military systems.

The Systems Engineering Effectiveness Committee (SEEC) is addressing this task via a survey of program and project managers across the defense industry.

Survey Objective

Identify the degree of correlation between the use of specific systems engineering practices and activities on projects, and quantitative measures of project / program performance.

Survey Method

Use the resources of NDIA SE Division to reach a broad constituency

The initial survey will focus on industry members of NDIA that are prime contractors and subcontractors

Collect feedback from project / program managers

Survey Development Plan

- Define the goal
- Choose the population
- Define the means to assess usage of SE practices
- Define the measured benefits to be studied
- Develop the survey instrument
- Execute the survey
- Analyze the results
- Report
- Plan future studies

Carnegie Mellon
Software Engineering Institute

Step 1:

Define the Goal

Identify correlations between SE practices and program performance

Step 2:

Choose the population

Chosen population consists of contractors and subcontractors providing products to the DoD

Step 3:

Define assessment of SE practices

Carnegie Mellon
Software Engineering Institute

Step 4:

Define performance measures

Utilize measures common to many organizations

- Earned Value
- Award Fees
- Technical Requirements Satisfaction
- Milestone Satisfaction
- Problem Reports

Step 5:

Develop the survey instrument

Self-administration

- formatted for web-based deployment

Confidentiality

- No elicitation of identifying data
- Anonymous response collection
- Responses accessible only to authorized SEI staff

Integrity

- Data used only for stated purpose
- No attempt to extract identification data

Self-checking

Section 1

Project Characterization

Section 2

Systems Engineering Evidence

Section 3

Project / Program Performance Metrics

Section 1 - Characterization

Characterization of the project / program under consideration

- **Project / program**
 - Size
 - Stability
 - Lifecycle phase
 - Subcontracting
 - Application domain
 - Customer / User
 - etc.
- **Organization**
 - Size
 - Organizational capability
 - Related experience
 - etc.

Section 1: Characterization	
The objective of this section is to gather information to characterize the project under consideration. This information will assist the survey analysts in categorizing the project, and the executing organization to better understand your responses.	
1.1	Project – information to characterize the specific project under discussion. Size, stability, lifecycle phase, subcontracting, and application domain are among the parameters used for program characterization.
1.1.1	What phases of the integrated product lifecycle comprise this project (check all that apply), and what phase are you presently executing (check 1)? SAMPLE Included in project (check all that apply) Current phase (check 1) ☐ Concept Refinement ☐ Technology Development and Demonstration ☐ Development ☐ Manufacturing ☐ Verification ☐ Training ☐ Deployment ☐ Operation ☐ Support ☐ Disposal
1.1.2	What is the current total contract value (US\$) of your project? \$ _____
1.1.3	What was the initial contract value (US\$) of your project? \$ _____
1.1.4	How many contract change orders have been received? _____

Section 2: SE Evidence

Process definition
 Project /program planning
 Risk management
 Requirements development
 Requirements management
 Trade studies
 Interfaces
 Product structure
 Product integration
 Test and verification
 Project / program reviews
 Validation
 Configuration management

Section 2: Systems Engineering Evidence					
Rate your agreement with the following statements				Strongly Disagree	Disagree
				Agree	Strongly Agree
2.1	Process Definition				
2.1.1	This project utilizes a documented set of systems engineering processes for the planning and execution of the project			r	r
2.2	Project Planning				
2.2.1	This project has an accurate and up-to-date Work Breakdown Structure (WBS) that ...	a. ... includes task descriptions and work package descriptions		r	r
		b. ... is based upon the product structure		r	r
		c. ... is developed with the active participation of those who perform the systems engineering activities		r	r

Section 3: Performance Metrics

Earned Value

Award fees

Technical requirements
satisfaction

Milestone satisfaction

Problem reports

Section 3: Project Performance Metrics					
3.1		Earned Value Management System (EVMS)			
Rate your agreement with the following statements		Strongly Disagree	Disagree	Agree	Strongly Agree
3.1.1	Your customer requires that you supply EVMS data?	r	r	r	r
3.1.2	EVMS data is available to decision makers in a timely manner (i.e. current within 2 weeks)?	r	r	r	r
3.1.3	The requirement to track and report EVMS data is levied upon the project's suppliers.	r	r	r	r
3.1.4	Variance thresholds for CPI and SPI variance are defined, documented, and used to determine when	r	r	r	r

Step 6:

Execute the survey

* Report to include suggested recommendations and actions

Step 7:

Analyze the results

Partition responses based on project characterizations

Analyze survey responses to look for correlations between the SE practices and the chosen metrics.

Step 8:

Report

Summarize survey results and analysis in a report.

Step 9:

Plan future studies

Based upon the findings from the survey, the need for additional studies may be defined.

Status

Survey instrument development complete

Web deployment complete

Respondent identification in progress

Response collection through Nov.

Analysis through Dec. and Jan.

Report in Feb.

SE Effectiveness Committee
