| Public reporting burden for the collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to a penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number. |                                    |                                     |                                                           |                                                     |                                 |

# Definition

“Directing and controlling an organization to establish and sustain a culture of security in the organization's conduct (beliefs, behaviors, capabilities, and actions)”

Builds upon and expands commonly described forms of governance including corporate governance, enterprise governance, and information technology (IT) governance

# Questions to Ask

What is at risk?

How much security is enough?

How does an enterprise

- evolve its approach to security?
- achieve and sustain adequate security?

# Questions to Ask

What is at risk?

How much security is enough?

How does an enterprise

- evolve its approach to security?
- achieve and sustain adequate security?

# What Is At Risk?

- Trust
- Reputation; brand
- Shareholder/stakeholder value
- Market confidence, share, capitalization
- Regulatory compliance; fines, jail time
- Customer retention, growth
- Customer and partner identity, privacy
- Ability to offer, fulfill business transactions
- Staff morale

# Trust

“The central truth is that information security is a means, not an end. Information security serves the end of trust. Trust is efficient, both in business and in life; and misplaced trust is ruinous, both in business and in life.

Trust makes it possible to proceed where proof is lacking. As an end, trust is worth the price. Without trust, information is largely useless.”

[Dan Geer; “Why Information Security Matters”]

# Responsibility to Protect Digital Assets

## Duty of Care: D&O Governance of Corporate Digital Security

- Govern business operations; protect critical assets
- Protect market share, stock price
- Govern employee conduct
- Protect reputation
- Ensure compliance requirements are met

Business Judgment Rule: That which a reasonably prudent director of a similar corporation would have used

[Jody Westby, PricewaterhouseCoopers, Congressional Testimony; case law]

# Barriers to Tackling Security

- Abstract, concerned with hypothetical events
- A holistic, enterprise-wide problem; not just technical
- No widely accepted measures/indicators
- Disaster-preventing rather than payoff-producing (like insurance)
- Installing security safeguards can have negative aspects (added cost, diminished performance, inconvenience)

# Questions to Ask

What is at risk?

How much security is enough?

How does an enterprise

- evolve its approach to security?
- achieve and sustain adequate security?

# Shift the Security Perspective

| <b>continuity/resilience</b> |

## Security *to* Resiliency

Managing to threat and  
vulnerability

No articulation of desired state

Possible security technology  
overkill

Managing to impact and  
consequence

Adequate security defined as  
desired state

Security in sufficient balance to  
cost, risk

## A Resilient Enterprise Is Able To . . .

- withstand systemic discontinuities and adapt to new risk environments [Starr 03]
- be sensing, agile, networked, prepared [Starr 03]
- dynamically reinvent business models and strategies as circumstances change [Hamel 04]
- have the capacity to change before the case for change becomes desperately obvious [Hamel 04]

# Security Strategy Questions

- What needs to be protected? Why does it need to be protected? What happens if it is not protected?
- What potential adverse consequences need to be prevented? At what cost? How much disruption can we stand before we take action?
- How do we effectively manage the residual risk when protection and prevention actions are not taken?

# Defining Adequate Security

The condition where the *protection strategies* for an organization's critical *assets* and business *processes* are commensurate with the organization's *risk appetite* and *risk tolerances*

Risk appetite and risk tolerance as defined by COSO's Enterprise Risk Management Integrated Framework, September, 2004.

<http://www.cert.org/governance/adequate.html>

# Determining Adequate Security Depends On . . .

- Enterprise factors: size, complexity, asset criticality, dependence on IT, impact of downtime
- Market sector factors: provider of critical infrastructure, openness of network, customer privacy, regulatory pressure, public disclosure
- Principle-based decisions: Accountability, Awareness, Compliance, Effectiveness, Ethics, Perspective/Scope, Risk Management, etc.

<http://www.cert.org/governance/ges-aware.html>

<http://www.cert.org/governance/stakeholder.html>

# Adequate Security and Operational Risk

“Appropriate business security is that which protects the business from undue operational risks in a cost-effective manner.” [Sherwood 03]

“With the advent of regulatory agencies assessing a business’s aggregate operational risk, there needs to be a way of looking at the organization as a whole rather than its many parts.” [Milus 04]

[According to Basel II, operational risks are risks of loss resulting from inadequate or failed internal processes, people, and systems or from external events.  
<http://www.bis.org/publ/bcbs107.htm>]

# Questions to Ask

What is at risk?

How much security is enough?

How does an enterprise

- **evolve its approach to security?**
- achieve and sustain adequate security?

# Evolving the Security Approach

# Questions to Ask

What is at risk?

How much security is enough?

How does an enterprise

- evolve its approach to security?
- **achieve and sustain adequate security?**

# Shift the Security Approach

Ad-hoc and  
tactical

*to*

Managed and  
strategic

- irregular
- reactive
- immeasurable
- absolute

- systematic
- adaptive
- measured
- adequate

Security activities and measures of security performance  
are visibly aligned with strategic drivers and critical  
success factors.

# Deriving a Framework

# Notional Set of Capabilities

Asset Management

Audit

Crisis Management

Enterprise Security Governance

IT Operations

Partner Management

Physical/Facilities Management

Process Management

Project Management

Risk Management

Security Operations

Systems Development

User Management

## Mobilizing Capabilities to Achieve/Sustain Adequate Security

## Mobilizing to Achieve/Sustain Adequate Security

# What Does Effective Security Look Like at the Enterprise Level?

- No longer solely under IT's control
- Achievable, measurable objectives are defined and included in strategic and operational plans
- Functions across the organization view security as part of their job (e.g., Audit) and are so measured
- Adequate and sustained funding is a given
- Senior executives visibly sponsor and measure this work against defined performance parameters
- Considered a requirement of being in business

# What Is Internal Audit's Role?

- Leverage Audit's professionalism and enterprise-wide scope
- Supplement compliance activities with risk assessment and process improvement
- Create an enterprise-wide risk-based audit program(\*)
- Broaden audit scope to address third-party and vendor risk
- Collaborate with IT to mitigate information systems risk proactively

(\*) including enterprise security

[PriceWaterhouseCoopers Internal Audit Global Best Practices;

<http://www.pwc.com/extweb/service.nsf/docid/D52A08081C25BC3885256F0B00522DF9>]

# Why Should Internal Audit Care?

Responsible for evaluating the adequacy and effectiveness of controls

- Reliability and integrity of financial, operational information
- Effectiveness, efficiency of operations
- Safeguarding assets
- Compliance with laws, regulations, contracts

Brings a systematic, disciplined approach to evaluate and improve the effectiveness of risk management, control, and governance processes

[IIA, Tone at the Top, Issue 23, October 2004.]
