FOREWORD

The United States Air Force Statistical Digest has been published each year since 1948. It is the longest running continuing publication in the Air Force having first appeared one year after the Air Force was formed as a separate service. Individuals requiring a historical description of Air Force resources, organizations, and activities have found each issue an invaluable addition to their reference sources.

We welcome your comments and suggestions for improvement of future issues. Suggested new topics and/or different data arrays will be seriously considered. This is your publication - we want to make it as useful as possible. Mail your suggestions to SAF/FMC, 1130 Air Force Pentagon, Washington, D.C. 20330-1130. The FY 1999 Statistical Digest should be available for distribution in the Spring of 2000. Please note that some of the comparable data for identical time periods in this year's edition may differ from those in previous editions. This is because of updates to prior years' actuals and a thorough revisit to all cited original sources.

For more information about the office and activities of the Assistant Secretary of the Air Force (Financial Management and Comptroller) and subordinate offices, log on to the SAF/FM web site on the Internet at http://www.saffm.hq.af.mil/. This web site is also an excellent source of information for the entire spectrum of financial management.

NOTES:

The format of this table has been changed. It shows 5 years worth of Aircraft & Missile Procurement quantities instead of one that shows "Pre-FY19XX", as well as the current year.

Several factors dictated this change:-

a) Using ABIDES, previous numbers cannot be verified.
Current data usage will result in totals inconsistent with the last Digest.

b) There is no rationale for when to stop listing a weapon system in the table.
The Maverick missile was listed last year, but has not been procured since 1991.
There are many such examples.

FOOTNOTES:

(1) The Consumer Price Index (CPI) is a measure of the average change in the prices paid by urban consumers for a fixed market basket of goods and services. The CPI is calculated monthly for two population groups, one consisting only of urban households whose primary source of income is derived from the employment of wage earners and clerical workers (CPI-W), and the other consisting of all urban households (CPI-U). The all-urban consumer index (CPI-U), introduced in 1978, is representative of the 1982-84 buying habits of about 80 percent of the noninstitutional population of the United States at that time.

(2) Major groups include energy, food, shelter, apparel and upkeep, transportation, medical care, fuel oil, electricity, utility (piped) gas, telephone services, and all commodities.

NOTE: "Special" appropriations refer to programs classified as secret.

TABLE USE: Weighted indices are used to convert constant dollars to then-year dollars, and vice versa. Use raw indices to convert constant dollars in one year to constant dollars in another year. Weighted indices for each appropriation are based on outlay rates for TOA excluding PAY and POL and should be used accordingly. For PAY and POL, use raw indices.

NOTES: The average rate for generals decreased from FY97 to FY98.
One of the factors causing this was the decreased percentage in retired pay accrual.
In addition, the population of "generals" is quite small. If one or two generals receive less in entitlements than their predecessors, the average rate would decrease.

FOOTNOTE: (1) Includes 36.4% of Basic Pay in Retirement Accrual in FY 93, 36.0% in FY 94, 35.5% in FY 95, 32.9% in FY 96, 32.6% in FY 97, and 30.5% in FY98.
