100 COMPANIES AND THEIR SUBSIDIARY CORPORATIONS

LISTED ACCORDING TO NET VALUE OF MILITARY

PRIME CONTRACT AWARDS

Fiscal Year 1966
(July 1965 - June 1966)

The 100 companies which together with their subsidiaries received the largest dollar volume of military prime contracts of \$10,000 or more in fiscal year 1966 accounted for 63.8% of the United States total. This was 5.1% percentage points below the 68.9% obtained by the top 100 companies in fiscal year 1965, and was the lowest percentage for the 100 top companies since reporting was initiated in fiscal year 1957. The table below shows that the first 25 companies received 5.2% less than in fiscal year 1965 with a decrease of 4.4% occurring in the first 5 companies.

1 - 100	<u>73.4%</u>	<u>74.2%</u>	<u>72.3%</u>	<u>73.9%</u>	<u>73.4%</u>	<u>68.9%</u>	<u>63.8%</u>

In fiscal year 1966, awards to U.S. companies for work at home and overseas increased 38.7% to \$33,532.6 million and the 100 company total increased 28.4% to \$21,400.8 million. The value of \$40.2 million for the company in 100th position on the list for the current fiscal year is \$16 million higher than the 100th company figure in fiscal year 1965.

As indicated above, the rate of increase in fiscal year 1966 for awards to the 100 companies lagged 10% behind that for total awards. At the same time small business firms increased their share of the total from 19.6% in fiscal year 1965 to 21.4% in fiscal year 1966.

The list for fiscal year 1966 contains 23 companies which did not appear on the fiscal year 1965 list. Of the new names, ten appear between 51st and 75th positions and twelve between 76th and 100th positions. One of the new names, Raymond-Morrison-Brown-Jones, a joint venture with contract awards totaling \$547.9 million is in 9th position.

There were two major corporate changes affecting the list during fiscal year 1966. Continental Motors Corp., which appeared on both the fiscal year 1964 and 1965 lists, was acquired by Ryan Aeronautical Co. as a subsidiary. Republic Aviation Corp., also on the list for the previous two fiscal years, was acquired and merged into the operations of Fairchild Hiller Corp. In addition, there were two corporate name changes during fiscal year 1966 as follows: Hercules Powder Co. to Hercules, Inc., and Socony Mobil Oil Co. to Mobil Oil Corp.

The contract work of many of the companies in fiscal year 1966 involved more than one major procurement category. However, each company is assigned to the procurement category in which it has the largest dollar volume of awards. As the result of large increases in certain types of procurement in fiscal year 1966, the table below shows companies in four new categories as follows: textiles and clothing, construction equipment, weapons and building supplies. The largest increase in number of companies occurred in ammunition, which had 13 more companies in fiscal year 1966 than in fiscal year 1965. The largest decreases were in missiles and petroleum, each having 5 fewer companies than in the previous fiscal year.

<u>Procurement Category</u>	<u>Number of Companies</u>		
	<u>FY 1965</u>	<u>FY 1966</u>	<u>Change</u>

Petroleum	11	6	- 5
Textiles & Clothing	0	2	+ 2
Construction Equipment	0	2	+ 2
Building Supplies	0	1	+ 1

The four non-profit contractors (see Index) listed for fiscal year 1966 represent a decrease of two from the number on the list for the preceding fiscal year. For the most part, these non-profit contractors provide research, development, and training services in the missile-space and electronics programs.

Four companies received prime contract awards of more than \$1 billion each in fiscal year 1966, compared to two companies in fiscal year 1965. These companies and a brief description of their more important work are as follows:

Lockheed Aircraft Corp. leads the list for the fifth consecutive year with \$1,531.0 million, or 4.6% of the total. This is a decrease of \$184.0 million in value and 2.5 percentage points from fiscal year 1965. The aircraft contracts of this company include the C-5A heavy logistics jet carrier, C-141A Starlifter Jet Cargo Transport, C-130E Hercules Turboprop Jet Transport, and the P3B Orion Patrol Bomber. It is the principal prime contractor for the Polaris and Poseidon Missiles, is an important contractor for military space vehicles, and performs research in conjunction with the satellite control network. The company and its subsidiaries also receive contracts for shipbuilding and electronics.

General Electric Co., having \$1,187.0 million in awards and 3.5% of the total, advanced to 2nd place in fiscal year 1966 from 4th place in fiscal year 1965. It received substantial contracts for the production of aircraft engines. Ordnance contracts were for the production of 7.62-mm machine guns, 20-mm cannon, and guidance and control systems for missiles. This company also received large contracts for electronics and communications equipment and nuclear propulsion systems for ships.

The following two companies in 3rd and 4th positions have a difference of less than \$3 million in their total awards.

United Aircraft Corp., whose contracts totaled \$1,138.7 million (3.4%), ranks 3rd. This compares with a contract value of \$632.1 million and 6th position in fiscal year 1965. The prime contract work of the company is principally for the production of aircraft engines. Contracts for aircraft were for the production of helicopters. In addition to these awards, the company received smaller contracts for ordnance items and for propellers.

General Dynamics Corp. received awards amounting to \$1,136.0 million which represented 3.4% of the total and is in 4th place. The value compares to \$1,178.6 million in fiscal year 1965. This company received contracts for aircraft, missiles and ships. The aircraft contracts are largely for the production of F-111 fighters; those for ships include repair and alteration of various types of vessels and new construction of landing craft and submarine tenders; and the missile-space contracts involve the development or production of Atlas, Redeye, Tartar and Terrier Missiles, and boosters for the space program.

INDEX OF 100 PARENT COMPANIES WHICH WITH THEIR SUBSIDIARIES RECEIVED THE
LARGEST DOLLAR VOLUME OF MILITARY PRIME CONTRACT AWARDS IN FISCAL YEAR 1966

FOOTNOTES:

- a/ Net value of new procurement actions minus cancellations, terminations and other credit transactions. The data include debit and credit procurement actions of \$10,000 or more, under military supply, service and construction contracts for work in the U. S. plus awards to listed companies and other U. S. companies for work overseas.

Procurement actions include definitive contracts, the obligated portions of letter contracts, purchase orders, job orders, task orders, delivery orders, and any other orders against existing contracts. The data do not include that part of indefinite quantity contracts that have not been translated into specific orders on business firms, nor do they include purchase commitments or pending cancellations that have not yet become mutually binding agreements between the government and the company.

- b/ The assignment of subsidiaries to parent companies is based on stock ownership of 50% or more by the parent company, as indicated by data published in standard industrial reference sources. The company totals do not include contracts made by other U. S. Government agencies and financed with Department of Defense funds, or contracts awarded in foreign nations through their respective governments. The company names and corporate structures are those in effect as of 30 June 1966. Only those subsidiaries are shown for which procurement actions have been reported.
- c/ Less than \$50,000.
- d/ Stock ownership is equally divided between Standard Oil Co. of California and Texaco, Inc.; half of the total of military awards is shown under each of the parent companies.
