## FOREWORD

This pamphlet contains a distribution of military prime contract awards of \$10,000 or more each by Service Category and Federal Supply Classification for fiscal years 1966, 1967, 1968 and 1969.

The report consists of three sections:

(1) Section A covers awards for research, development, test and evaluation work (RDT&E). The RDT&E categories used are the standard Department of Defense Claimant Programs. These procurement program definitions are identical with those prescribed by the Office of Emergency Planning for use in the Defense Materials System. Each category of RDT&E work has been divided into four kinds of RDT&E work, as described in the Armed Services Procurement Regulation 4-101.

(2) Section B covers Other Services and Construction. The 15 major divisions and 158 individual classes were developed specifically for prime contract reporting and are considered to be self-explanatory.

(3) Section C covers the Federal Supply Classification structure composed of 74 groups and 583 individual classes. This system was developed primarily for supply management of items known to be in the supply system of the Federal Government. Definitions of the Classes appear in the Cataloging Handbook, Federal Supply Classification, Part 1, Groups and Classes, H2-1, which may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, D. C. 20402.

While there is comparability between the Federal Supply Classes used in this publication and the Standard Industrial Product Codes used by the Census Bureau of the Department of Commerce, the exact points of agreement and disagreement have not been ascertained. Moreover, it should be observed that in many of the Census reports, the SIC data are based on the principal product of an establishment, rather than on the individual products produced by that establishment. In addition to differences in code content, data from this pamphlet and certain Bureau of the Census reports do not coincide as to period covered or as to point in time when reported. The former are fiscal year figures measuring contract awards before delivery has taken place, while the latter are calendar year figures measuring shipments or production which may take place as much as several years after the contract award.

The following characteristics of the material presented in this pamphlet should be noted:

Data cover only prime contracts (those placed directly by the Department of Defense) and do not reflect the large amounts of subcontracts for basic and intermediate materials and components. Thus, for example, most of the steel plate for ships is purchased by Defense prime contractors, and only a small portion is obtained by direct DOD purchase (see Code 9515).

Similarly, a large dollar amount of electronics is purchased by Defense contractors who have received prime contracts for missiles or other weapons systems.

Contracts and purchases below \$10,000 each for which product and service information is not collected are excluded. In each of the fiscal years 1966 through 1969, these small transactions totaled from \$3 to \$4 billion. This exclusion tends to understate procurement of commercial type items and services more than military hard goods items which usually are bought in large dollar amounts. It is known, for example, that Subsistence (FS Group 89) is severely understated for this reason. However, information concerning the composition of the small purchases is not sufficient to identify all the categories of commodities and services which are affected to an important degree.

For security reasons, various contracts have been reported without a Federal Supply Classification or with a classification other than the one describing the item purchased. Therefore, data for a number of the Federal Supply Classes shown are incomplete.

The report covers procurement from all sources; that is, from educational and non-profit institutions, other Federal Government agencies and foreign contractors, as well as from U.S. business concerns. In this respect figures differ from other commodity data published by this office which have been limited to contracts placed with U.S. business concerns. The amounts, in billions of dollars, procured from the four major sources in transactions of more than \$10,000 each were as follows:

<u>Source</u>	<u>FY 1966</u>	<u>FY 1967</u>	<u>FY 1968</u>	<u>FY 1969</u>
U.S. Business Concerns	\$30.5	\$36.0	\$36.1	\$34.0
U.S. Educational and Non-Profit Institutions	.7	.7	.7	.7
Federal Government Agencies Outside Defense	.7	.9	.7	.9
Contractors in Foreign Countries	<u>2.3</u>	<u>2.5</u>	<u>2.3</u>	<u>2.5</u>
Total	\$34.2	\$40.1	\$39.8	\$38.1

Construction and services other than RDT&E had a net decrease of \$74 million or less than 1% from FY 1968 to FY 1969. They are shown in Part B. The category with the largest increase (\$142 million) was Y9 "Construction". Major decreases were for V8 "Transportation Services" (\$161 million) and K5 "Modification, Alteration and/or Rebuild of Equipment" (\$108 million).

Supplies and Equipment (shown in Part C) decreased by \$1.2 billion (5%) in fiscal year 1969. The federal supply groups with changes of \$100 million or more, plus or minus, are shown in the table below.

(In Millions of Dollars)

FS Group		FY 1968	FY 1969	Increase or Decrease	
				Amount	Percent
15	Aircraft and Airframe Structural Components	\$4,696	\$3,908	-\$788	-16.8%
14	Guided Missiles	1,182	1,877	+695	+58.8
13	Ammunition and Explosives	2,876	3,301	+425	+14.8
19	Ships, Small Craft, Pontoons and Floating Docks	863	497	-366	-42.4
23	Motor Vehicles, Trailers, and Cycles	823	532	-291	-35.4
28	Engines, Turbines and Components	2,095	1,824	-271	-12.9
56	Construction and Building Materials	213	69	-144	-67.6
91	Fuels, Lubricants, Oils and Waxes	1,676	1,788	+112	+ 6.7
58	Communication Equipment	2,039	1,929	-110	- 5.4

The dollar volume of contract awards for "Aircraft and Airframe Structural Components" (Federal Supply Group 15) declined from \$4,696 million in fiscal year 1968 to \$3,908 million in FY 1969, a decrease of 17%. This was the largest year to year change. The second largest change was for "Guided Missiles" (Federal Supply Group 14) which increased by \$695 million (+59%). Of the remaining federal supply groups with significant dollar variances, the largest percentage change (-68%) was for "Construction and Building Materials" (Federal Supply Group 56). Contract awards for this group totaled \$69 million in FY 1969 compared with \$213 million in FY 1968. Other large changes are as shown in the preceding table.
