19. ABSTRACT (Continue on reverse if necessary and identify by block number)

This report presents a CHAMPUS cost and utilization analysis of adolescent substance abuse treatment within 37 Health Services Command billable medical treatment facility catchment areas during Fiscal Years (FYs) 1990 through 1991. Data are summarized by inpatient/outpatient category and with all patients combined, by quarter and fiscal year; figures are presented for each catchment area and for all catchment areas combined. Totals are given for the number of inpatient users, admissions, hospital days and government costs; for the number of outpatient users, visits, services, and government costs; and the total government cost for all users. The total number of individuals treated without regard to patient category and the government cost per individual treated are also provided.

Executive Summary

This report presents detailed CHAMPUS cost and utilization data for adolescent substance abuse treatment performed within Health Services Command billable medical treatment facility catchment areas during Fiscal Years (FYs) 1990 - 1991. Data summarized include the number of users treated, measures of the treatment provided (such as number of inpatient admissions and number of outpatient visits), and the amount of government costs for payments to providers. Quarterly (Appendices A and C) and yearly (Appendices B and D) totals are presented for each catchment area and for all catchment areas combined.

In Appendices A and B, data are summarized by inpatient and outpatient categories. Inpatient totals include the number of users, number of admissions, number of hospital days, and inpatient government costs. For the outpatient category, the data summarized include the number of users, number of visits, number of services provided, and outpatient government costs. The total government costs after summing the inpatient and outpatient costs is also presented. In Appendix A, the number of users (inpatient/ outpatient) is the number of unique patients counted within the given category and catchment area during the given quarter, while in Appendix B, it is the number of unique patients within the given category and catchment area during the given FY. Since treatment of a particular patient can occur during more than one quarter, the number of unique users in the FY totals (Appendix B) may not equal the FY total from summing the unique users in the quarterly tables (Appendix A).

In Appendices C and D, data are summarized for all patients combined, without regard to inpatient/outpatient category. Totals are given for the number of individual patients, number of inpatient admissions, number of inpatient hospital days, number of outpatient visits, number of outpatient services, and total government costs. Also, the government cost per individual patient is presented. As in Appendices A and B, the FY totals for number of patients may not agree between Appendices C and D, due to the same individuals being counted in more than one quarter. In addition, since a specific individual could be both an inpatient and an outpatient within the same quarter or FY, the number of individual patients will often differ from the sums obtained from adding the inpatient and outpatient users in Appendices A and B.

The professional service records analyzed in this study were extracted from the Tri-Service CHAMPUS Statistical Database Project (TCSDP) main database by payment date (FY 1990 - FY 1991), by patient age (13-18 years old), and by ICD-9-CM diagnosis codes for substance abuse (291-alcoholic psychoses, 292-drug psychoses, 303-alcohol dependence

syndrome, 304-drug dependence, and 305-nondependent drug abuse). Only records having an Army assigned billable medical treatment facility catchment area were included. Records for the Fort Bragg catchment area were not included since all pre-18 year old mental health care is non-CHAMPUS (managed by a contracted demonstration project) in that catchment area. Prior to summation, records having no government cost, no patient cost and no total amount allowed, as well as those where the fiscal intermediary denied the claim, were deleted. Some records included in the summation represented adjustments to claims handled in previous quarters or FYs and occasionally resulted in negative entries in the quarterly appendix tables. These obvious unstable conditions (negative sums) were replaced by a double asterisk (**) and the effect of their amounts removed from the column totals. In addition, if the unstable condition was in an inpatient or outpatient government cost, its effect was removed from the total government cost amount. (Note: only the effect of negative results in the tables were removed, not negative amounts on individual records. Hence, totals in Appendices A and B may not always agree with totals in Appendices C and D.)

Table 1 presents summary data from Appendices A through D and shows the trends taking place from FY 1990 to FY 1991 when summing across all catchment areas. There has been an overall decrease of 12.1% or about \$0.9 million in total government cost on claims having substance abuse diagnosis of an adolescent. This decline resulted from a 22.7% or about \$1.5 million decrease in government cost for inpatients vs. a 72.7% or about \$0.6 million increase in government cost for outpatients. The number of admissions and hospital days both decreased about 21%. From FY 1990 to FY 1991, the number of inpatients decreased (22% in total patients unique from four quarterly counts and 18.5% in count of patients unique in the FY). Even though outpatient government costs increased dramatically, the number of unique outpatients treated increased only slightly (0.4% in sum of quarter counts; 1.1% in FY count). However, the number of outpatient visits increased 29% and the number of services increased 24.5%. Overall, the total number of individuals receiving treatment decreased (12.8% in total patients unique from the quarterly counts and 9.5% in the count of patients unique in the FY). The government cost per individual patient increased when comparing the sum of the quarterly totals (up \$51.64 or 1.1%), but it decreased when comparing the unique individuals treated in a FY (down \$164.03 or 2.5%).

Technical Note: The following TCSDP data were utilized for the report:

MEMORANDUM FOR Defense Technical Information Center, ATTN: DTIC-
OCC, Catalog Branch, Building 5, Cameron Station,
Alexandria, VA 22304-6145

SUBJECT: Release of Limited Reports in DTIC

1. Enclosed is a list of reports submitted by Health Care Studies and Clinical Investigation. At the time of submission we requested these documents be limited to DOD agencies only. This limitation no longer applies. Please remove the limitation on all the listed reports (enclosed). These reports should now be "Unlimited, Available for Public Use."

2. By lifting the limitation on this reports, will they now be provided to National Technical Information Service? This agency would like these documents placed with NTIS for a wider audience.

3. Point of contact is Beverly Rakowitz DSN 471-0047/9610 or commercial 210-221-0047/9610. Mailing address is Directorate of Health Care Studies and Analyses, Cdr, AMEDDC&S, ATTN: HSN-R, 1608 Stanley Road, Fort Sam Houston, TX 78234-6125.
