ABSTRACT:

No further developments or tests are considered for the GB-5 glide bomb. This project developed out of the general glide bomb program which was initiated 1 March 1941. Similar devices are the GB-12 and GB-13, which are also light seeking glide bombs. The GB-5 was placed in experimental classification 8 December 1943.

ABSTRACT:

The progress of Army Air Forces Guided Missiles projects is reported. Guided missiles are reported on as to the classifications of surface to surface, surface to air, air to air, and air to surface. The progress on guidance systems is classified under stability information, position information, command transmission, and command execution systems. Work on propulsion systems and launching systems, both ground and ship, is covered.
