**Note**

Change Summary Explanation:

**A. Mission Description and Budget Item Justification**

This Program Element (PE) for Advanced Component Development and Prototypes manages the Soldier as a system in order to increase combat effectiveness, test and deliver tangible products that save Soldier's lives, and improve Soldier's quality of life. It evaluates, develops, and tests emerging technologies and critical Soldier support systems to reduce technology risk.

Project S49 funding (Ground Soldier System) The Nett Warrior (NW) program leverages commercial smart devices and secure Army tactical radios to provide the dismounted leader an integrated mission command and situational awareness system for use during combat operations.

Project S51 funding (Aircrew Integrated Systems) supports component development and prototyping of critical Soldier support systems and other combat service support equipment that will improve unit sustainability and combat effectiveness.

Project S52 funding (Soldier Support Equipment) supports design, manufacture and testing/evaluation of the Spark Gap (SG)-Shock Tube Initiator program as well as develop a technical data package. This funding will also support the preliminary testing of prototype hardware to begin any necessary modifications of design for the VBOT (Vehicle Borne Improvised Explosive Device (VBIED) Blast Overpressure Tool) program.

Project S53 funding (Clothing and Equipment) supports development of state-of-the-art technology to improve tactical and non-tactical clothing and individual equipment to enhance the lethality, survivability, and mobility of the individual Soldier.

Project S54 funding (Small Arms Improvement) provides funds to develop, demonstrate and evaluate emerging technology for integration of systems, subcomponents and prototypes designed to enhance lethality, target acquisition, fire control, training effectiveness and reliability for current and future small arms weapon systems and ammunition.

Mission Description and Budget Item Justification                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |             |         |         |              |                                                                                           |               |         |         |                                                          |                     |                  |            |
| This project supports the Advanced Component Development and Prototyping of select Air Soldier System (Air SS) technologies. The Air SS provides improved safety, survivability, and human performance that amplifies the Warfighter's effectiveness and facilitates full-spectrum dominance of Army aircraft. The Air SS addresses capability gaps identified during combat operations in Iraq and Afghanistan including the effects of weight and bulk, limited situational awareness, and lack of functionally integrated aircrew member life support equipment. The Air SS follows an evolutionary acquisition approach that integrates mature technologies to build to the full capability. Air SS reduces overall weight and bulk of aircrew equipment, increases situational awareness, and enhances aircrew mobility. This funding provides advanced development for the Air SS in technology areas supporting improved laser eye protection, integrated power, wireless personal area networks, lightweight protective clothing, and tactile situational awareness cueing. |             |         |         |              |                                                                                           |               |         |         |                                                          |                     |                  |            |

| The Air Soldier System (Air SS) employs an incremental acquisition approach to improve the mission effectiveness, survivability, Situational Awareness, and safety of Army aircrews. These funds resource various government agencies and labs in the transition of emerging technologies to the Air SS program, including enhanced battlefield laser eye protection and tactile cueing. |         |         |                 |                                                                                           |                  |         |         |                                                          |                     |                     |            |  |

Mission Description and Budget Item Justification                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |             |         |         |              |                                                                                           |               |         |         |                                                       |                     |                  |            |
| This funding supports efforts to evaluate and integrate technologies and representative or prototype systems that help expedite Soldier uniform and clothing technology transition from the laboratory to operational use. Efforts focus on proving out commonality across as broad a spectrum of users as possible to provide a modular, integrated uniform/clothing system from skin out and head-to-toe. It funds efforts to investigate new technologies and domestically available fabrics with Flame Resistance, moisture wicking, insect protection and camouflage technologies, including evaluation and integration of fabrics appropriate for uniforms and equipment used in jungle/tropical and Arctic environments. It funds efforts to improve personnel parachutes, to include analysis of canopy cloth fabrics and pack volume techniques. New technologies are investigated to monitor health and improve Soldier survivability, reduce weight, and improve affordability, mobility and comfort in combat and training/administrative environments. |             |         |         |              |                                                                                           |               |         |         |                                                       |                     |                  |            |

| Title: Soldier Uniforms and Clothing                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |             |         |         |              |                                                                                           |               |         |         | 3.119                                                 | 1.555               | 6.191            |            |
| Description: Develop and provide superior and sustainable integrated clothing for the Soldier in a rapidly changing global environment.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |             |         |         |              |                                                                                           |               |         |         |                                                       |                     |                  |            |
| FY 2014 Accomplishments:<br>Funded maturing of new technology to reduce Soldier load and weight. Continued testing improvements in Permethrin treatment and Flame Resistance (FR) capabilities for use in combat uniforms to adapt to improvements in textile technology. Initiated joint OSD/USMC/Army/ funded effort to develop and test spectral mitigation enhancements to combat uniforms.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |             |         |         |              |                                                                                           |               |         |         |                                                       |                     |                  |            |
| FY 2015 Plans:<br>Tactical/Personal Clothing. Continue to develop more durable FR fabrics for use in combat uniforms to improve service life of tactical uniforms.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |             |         |         |              |                                                                                           |               |         |         |                                                       |                     |                  |            |
| FY 2016 Plans:<br>Tactical Clothing. Obtain MDD and initiate technical testing on Environmental Protection Ensemble (EPE) component prototypes to provide Soldiers protection in all extreme environmental conditions. Conduct evaluation and integration of fabrics appropriate for uniforms and equipment used in jungle/tropical and arctic environments. Transition to S60 with MSB in 4QFY16. Obtain MDD on upgraded Combat Vehicle Crewman (CVC) uniform to provide CVC military personal optimal performance. Transition to S60 2QFY17.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |             |         |         |              |                                                                                           |               |         |         |                                                       |                     |                  |            |

| Will continue to develop alternate insect protection with lower toxicity for all combat uniform fabrics (i.e. Army Combat Shirt, Army Combat Pants, FR Army Combat Uniform). Continue to develop more durable FR fabrics for use in combat uniforms to improve service life of tactical uniforms.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |         |         |                                                                                           |                |                  |                                                       |                     |         |         |                     |            |
| Title: Individual Equipment                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |         |         |                                                                                           |                |                  |                                                       | 2.489               | -       | 2.994   |                     |            |
| Description: Develop and provide superior and sustainable integrated individual equipment for the Soldier in a rapidly changing global environment.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |         |         |                                                                                           |                |                  |                                                       |                     |         |         |                     |            |
| FY 2014 Accomplishments:<br>Obtained Material Development Decision (MDD) for Parachute Navigational System (PARANAVSYS), further developed Government owned software to be evaluated at Development Testing (DT) 1, DT 2 and Operational Testing (OT). Procured and tested prototype thermal/ruggedized protective systems to support PARANAVSYS MS-B in 4QFY14. Tested current oxygen systems to determine altitude levels required on the Military Free Fall (MFF) Advanced Ram Air Parachute System (ARAPS).                                                                                                                                                                                                                                                                           |         |         |                                                                                           |                |                  |                                                       |                     |         |         |                     |            |
| FY 2016 Plans:<br>Load Carriage. Obtain Material Development Decision (MDD) and initiate technical testing on the Integrated Load Carriage System (ILCS). The ILCS will provide an integrated load carriage that interfaces with the Soldier Protection System (SPS). Transition to S60 with MS B in 4QFY16.<br>Airdrop. Initiate characterization of canopy materials for the T-11 that could reduce pack thickness and include assessment of canopy signature. Also perform initial assessment of design/material changes to the T-11 that could reduce corner vent entanglements.<br>Hydration. Initiate technical testing to provide the Individual Water Treatment Device (IWTD) with the capability to eliminate Toxic Industrial Chemicals/Toxic Industrial Materials (TICs/TIMs). |         |         |                                                                                           |                |                  |                                                       |                     |         |         |                     |            |

| Programs pursue refinement and integration of new technology at the component and subsystem level, culminating in the transition of mature technologies (TRL 6-7) to EMD and production. This project continues to exercise competitively awarded contracts using best value source selection procedures. |                |                |                         |                                                                                           |                          |                |                |                                                       |                |                             |                   |

| Note<br>New starts in FY 2016 include Dynamic Tracking for Fire Controls, Sniper Rifle Fire Control (SRFC), Small Arms Deployable Sensor Networks, and Armaments for Robots.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |             |         |         |              |                                                                                           |               |         |         |                                                       |                     |                  |            |
| A. Mission Description and Budget Item Justification<br>The Small Arms Improvement Advanced Component Development and Prototypes (ACD&P) program provides funds to mature, demonstrate, test and evaluate emerging technology from Joint Service Small Arms Program (JSSAP), Project 627, Program Element 0603607A, (Budget Activity 3), Defense Advanced Research Projects Agency (DARPA), Department of Energy National Laboratories, Research Development & Engineering Centers (RDECs) and other domestic and foreign sources for small arms weapons systems and technology. Small arms systems include weapons ranging up to 40 millimeter in caliber. Current and future efforts focus on improvements designed to enhance lethality, target acquisition and tracking, fire control, training effectiveness and reliability of weapons to include ammunition when developing and/or evaluating standard and non-standard weapons. Focus areas include the maturing of technology through testing and evaluation of sub-system or system prototypes which demonstrates light weight materials, wear resistant/protective/anti-reflective coatings, observation/situational awareness improvements, robotic armament capability and equipment enhancements. Benefits include continuous improvements to small arms weapons, fire control equipment, optics, gun barrels, training devices, suppressors, component mounts, weapon mounts, and weapon/ammunition interface. |             |         |         |              |                                                                                           |               |         |         |                                                       |                     |                  |            |

| Title: New Weapons                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |             |         |         |              |                                                                                           |               |         |         | 1.016                                                 | 0.400               | 2.269            |            |
| Description: Development of new small arms weapons                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |             |         |         |              |                                                                                           |               |         |         |                                                       |                     |                  |            |
| FY 2014 Accomplishments:<br>Lightweight Machine Gun: Acquisition community continued to assist the United States Army Training and Doctrine Command (TRADOC) and Maneuver Center of Excellence (MCoE) in the development of Lightweight Machine Gun requirements to include a potential Common Lightweight Automatic Weapon System (CLAWS) now known as Next Generation Squad Weapon (NGSW).<br><br>Next Generation Squad Weapon (NGSW): Lead support to Maneuver Center of Excellence (MCoE) initiated the development of requirements for the Next Generation Squad Weapon to include development and clarification of Key Performance Parameters (KPPs), Key System Attributes (KSAs), and Additional Performance Attributes (APAs). Also reviewed first Draft of the NGSW Capability Development Document and provided updates.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |             |         |         |              |                                                                                           |               |         |         |                                                       |                     |                  |            |
| FY 2015 Plans:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |             |         |         |              |                                                                                           |               |         |         |                                                       |                     |                  |            |

| Non-Standard Weapons Assessments: Conduct baseline testing of commercial weapon systems and perform capability analysis of unique weapon characteristics. Continue to conduct market research of commercially available weapon systems.                                                                                                                                                                                                                                                                                                                                    |                                                                                                         |                                                                     |                |                |
| Weapon Upgrades and Accessories: Continue to test, evaluate and analyze ongoing and new activities to enhance small arms weapons.                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                         |                                                                     |                |                |
| <b>FY 2016 Plans:</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                         |                                                                     |                |                |
| Increased Barrel Life/Replace Chrome: Will perform barrel studies for alternate calibers (7.62mm, possibly 5.56mm) to improve/enhance barrel life. Will utilize lesson-learned from initial prototype testing, further develop and acquire full length barrel liners for extended life testing and perform testing at Government facility.                                                                                                                                                                                                                                 |                                                                                                         |                                                                     |                |                |
| Non-Standard Weapons Assessments: Will conduct baseline testing of commercial weapon systems and perform capability analysis of unique weapon characteristics. Will continue to conduct market research of commercially available weapon systems.                                                                                                                                                                                                                                                                                                                          |                                                                                                         |                                                                     |                |                |
| Additive Manufacturing (3D Printing): Transitions from FY2015 Research and Analysis. Will continue using Additive Manufacturing (3D Printing) methods to fabricate and test selected prototype weapon components for individual and crew served weapons.                                                                                                                                                                                                                                                                                                                   |                                                                                                         |                                                                     |                |                |
| Recoil Reduction Mechanisms: Transitions from FY2015 Research and Analysis. Selected Recoil Reduction Mechanisms will be fabricated and tested for both individual and crew served weapons.                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                         |                                                                     |                |                |
| Small Business Innovative Research (SBIR) Enhancements: Transitions from FY2015 Research and Analysis. Future efforts will continue to focus on improvements designed to enhance lethality, target acquisition and tracking, fire control, training effectiveness and reliability of weapons.                                                                                                                                                                                                                                                                              |                                                                                                         |                                                                     |                |                |
| FY16 New Start Armaments for Robots: Will initiate the intelligence/networking and weapons design and functions for a man-in-the-loop, small caliber defensive armaments system on an unmanned ground vehicle including the Warfighter/Robot interface.                                                                                                                                                                                                                                                                                                                    |                                                                                                         |                                                                     |                |                |
| FY16 New Start Small Arms Deployable Sensor Networks: Will transition a low cost, prototype munition from Armament Research, Development and Engineering Center (ARDEC) and integrate with the M320, 40mm rifle-mounted grenade launcher system. The munition will remotely deploy a sensor network comprised of 40mm grenade nodes containing an Electro Optical (EO) camera, acoustic and magnetic sensor components networked via robust ad-hoc wireless communications capable of transmitting streaming audio and imagery to provide increased situational awareness. |                                                                                                         |                                                                     |                |                |

| Advanced Hyperspectral Target Acquisition: Continue to evaluate and analyze advance approaches to acquire targets with the use of hyperspectral imaging and assess the effect on current optical systems to include advanced hyperspectral target acquisition.                                                                                                                                                                                                                                                                                                    |                                                                                           |                                                       |         |         |
| Precision Projectile Tracking: Refine projectile production methods and packaging. Illumination and imaging hardware will be refined, and software will be tested and validated. Complete prototypes will be fired, and tracking verification will be conducted.                                                                                                                                                                                                                                                                                                  |                                                                                           |                                                       |         |         |
| FY 2016 Plans:<br>Advanced Hyperspectral Target Acquisition: Will continue to evaluate and analyze advanced approaches to acquire targets with the use of hyperspectral imaging and incorporate technology into prototype hardware.                                                                                                                                                                                                                                                                                                                               |                                                                                           |                                                       |         |         |
| FY 2016 New Start Dynamic Tracking for Fire Control: Armament Research, Development and Engineering Center (ARDEC) developed target solution algorithms and laser beam steering that will be integrated into optics and Fire Control Systems. Systems will be tested for ability to track targets and improve probability of hit (P(h)).                                                                                                                                                                                                                          |                                                                                           |                                                       |         |         |
| FY16 New Start Sniper Rifle Fire Control (SRFC): Will evaluate and assess enhanced multi-functional fire control technologies which will improve small arms accuracy and lethality, and will substantially reduce user's cognitive load during tactical operation. These technologies can be transitioned to the following capability requirements: Mounted Machinegun Optic Capabilities Production Document (CPD); Fire Control Capability Development Document (CDD), Crew Served Annex; Fire Control CDD, Squad Annex; and Fire Control CDD, Precision Annex. |                                                                                           |                                                       |         |         |
| Fire Control Upgrades: Will continue oversight of integration and test of advanced fire control systems for small arms platforms, with focus on modular integration. Will continue to conduct human factors evaluation of Soldier-System interface between the Soldier and fire control. Will continue to evaluate impact of automated target designation on Soldier engagement time.                                                                                                                                                                             |                                                                                           |                                                       |         |         |
| Title: Research and Analysis                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                           | -                                                     | 0.100   | 0.100   |
| Description: Research and analysis of small arms                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                           |                                                       |         |         |
| FY 2015 Plans:<br>Conduct Market Research and Benefit Analysis of ongoing small arms initiatives to refine requirements and identify multiple solution sets. The following programs will be evaluated in FY 2015; Externally Powered Mounted Machine Gun, Extended Range/ Guided 40mm Munition, Precision Projectile Tracking, Advanced Laser Protection for Optics, Additive Manufacturing (3D Printing), Recoil Reduction Mechanisms, Adaptive Lubricious Coatings, Armaments for Robots, Dynamic Tracking for Fire Control, Small                              |                                                                                           |                                                       |         |         |

| <b>Remarks</b><br>In support of Small Arms Initial Capability and Capability Development Requirements, advanced technology of Small Arms Weapons is transitioned from Joint Service Small Arms Program (JSSAP), Project 627, Program Element 0603607A, (Budget Activity 3) to Small Arms Improvement, Project S54, Program Element 0603827A, (Budget Activity 4). After the technology is demonstrated and/or validated the program transitions to Small Arms Improvement, Project S63, Program Element 0604601A, (Budget Activity 5) for engineering and manufacturing development. |                |                |                         |                                                                                                         |                          |                |                |                                                                     |                |                             |                   |
| <b>D. Acquisition Strategy</b><br>Primary strategy is to study, develop, demonstrate and evaluate emerging technologies that ultimately lead to enhancing/improving the small arms inventory.                                                                                                                                                                                                                                                                                                                                                                                        |                |                |                         |                                                                                                         |                          |                |                |                                                                     |                |                             |                   |

**A. Mission Description and Budget Item Justification**

This funding supports the efforts to evaluate and integrate technologies and prototype systems that help expedite Individual Soldier Ballistic Protection technology transition from the laboratory to operational use. It continues incremental improvement of body armor to reduce Soldier load and improve comfort/functionality based on operational feedback. It advances efforts to mature manufacturing readiness levels of advanced high performance fibers and composites for next-generation combat helmets, and supports transition to 6.5 phase of EMD. It continues to increase eyewear ballistics/blast protection, and incorporates advancements in laser eye protection, as well as advancements in variable transition lens technology into ballistic goggles and spectacles.

**B. Accomplishments/Planned Programs (\$ in Millions)**

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | <b>FY 2014</b> | <b>FY 2015</b> | <b>FY 2016</b> |

| <b>Description:</b> Funding line established in FY12. Effort was previously executed in Program Element 0603827 S53. Effort is to increase the Warfighter lethality and mobility by optimizing Soldier protection while effectively managing all life cycle aspects of Personal Protective Equipment (PPE).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                |                |                |
| <b>FY 2014 Accomplishments:</b><br>Continued FY13 efforts initiated in FY13 to develop Soldier Protection System (SPS) Integrated Soldier Sensor System (ISSS) Developmental Testing (DT) 1 prototypes and continued planning for FY15 characterization and human factors testing. Monitored and provided guidance to SPS ISSS contractors to refine design, power management and component integration. Conducted Preliminary Design Review (PDR) of the SPS ISSS test candidates in 2QFY14 and obtained Post PDR Assessment Acquisition Decision Memorandum on 15 May 14. In 2QFY14 completed SPS DT 1 system level plate testing, Vital Torso Protection (VTP), including SPS Torso Protection (TP) ballistic testing. Continued to integrate new and emerging technologies at the SPS component and subsystem level and transitioned mature components and subsystems to System Capability & Manufacturing Process Demonstration (SC&MPD)/VS 5. Evaluate component and subsystem technologies across the PPE portfolio (extremities, torso and vital torso, head and face protection) to counter emerging ballistic/blast threats. Continued efforts to test, characterize, and increase durability and functional service life of existing personal protective systems. Continued development and evaluation of ballistic inserts for female and small statured Soldiers, and plan to transition to SC&MPD/VS 5 through 2QFY15 as the components and subsystems mature. Completed validation testing of multi-sized head forms with expected transition to Army and National Institute of Justice (NIJ) certified testing laboratories to standardize testing of multiple size helmet and acceptance testing |                |                |                |

| in FY15. Supported the Sustainment Center of Excellence (SCoE) in developing requirements for the Next Generation Advanced Bomb Suit (NGABS).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |         |         |                                                                                           |                |                  |                                                             |                     |         |         |                     |            |
| FY 2015 Plans:<br>Conduct SPS ISSS human factors/limited user evaluations and subsystem development and characterization testing 3QFY15, and transition to SC&MPD/VS5 to buy DT/OT test items by 1QFY16. Initiate development of SPS system Modeling & Simulation as a research and diagnostic tool. Continue FY14 SPS Integrated System Design (ISD) efforts to integrate new and emerging technologies at the component and subsystem level, with a focus on reducing weight and bulk at the system, subsystem and component level. Continue to evaluate component and subsystem technologies across the PPE portfolio (extremities, torso and vital torso, head and face protection) to counter known and emerging ballistic/blast threats. Continue efforts to characterize and increase durability and functional service life of existing personal protective systems. Initiate efforts for reduced weight, increased performance, scalability, and integration for the NGABS. Complete Developmental Testing 2 (DT2) of the contractor's candidate Torso and Extremity Protection (TEP), Integrated Head Protection System (IHPS), and Vital Torso Protection (VTP) systems. Complete DT2 of the Government designed TEP candidates in order to inform the Milestone C decision in 3QFY15. |         |         |                                                                                           |                |                  |                                                             |                     |         |         |                     |            |
| FY 2016 Plans:<br>Continue to evaluate component and subsystem technologies across the PPE portfolio (extremities, torso and vital torso, head and face protection) to counter emerging ballistic/blast threats. Will continue efforts to reduce SPS weight and bulk at the system, subsystem and component level - planned focus in FY16 includes reducing the aerial density of soft armor systems while maintaining same or better performance. Will also further develop and test other SPS subsystems, to include new plate sizes and enhanced extremity protection. Will also develop and perform initial validation testing of a vital torso plate smart sensor. Conduct systems development and testing to include improvements for varying operational environments (cold, tropical). Continue blast, ballistic and characterization testing of SPS Subsystems and ancillary components. Will continue efforts to characterize and increase durability and functional service life of existing personal protective systems at the subsystem/component level. Complete an MDD and initiate a Technology Development phase for SPS Increment 2 in 4QFY16. Continue efforts for reduced weight, increased performance, scalability, and integration for the NGABS.                          |         |         |                                                                                           |                |                  |                                                             |                     |         |         |                     |            |

| Programs pursue refinement and integration of new technology at the component and subsystem level, culminating in the transition of mature technologies (TRL 6-7) to EMD and production. This project continues to exercise competitively awarded contracts using best value source selection procedures. |                |                |                               |                                                                                                         |                                |                |                |                                                                           |                |                                   |                   |
